XSURGE

We are pleased to announce the launch of SURGEUSELESS!!!

SURGEUSELESS is the first Tokenomics token in the XSURGE ecosystem. With this addition we have expanded XSURGE even more!

SUSD
SETH
SBTC
SADA
SUSELESS

Within our online XTRADER dApp, you will be able to acquire any of these tokens directly on our website at: https://app.xsurge.net

STAKING

If you currently own any Useless tokens, you will be able to stake your Useless tokens for SURGEUSELESS! Staking, will be available October 3, 2021 at 3:00 PM EST, and will be done through the Useless dApp or the Surge dApp!

*NOTE: **Do NOT** send useless tokens to the SURGEUSELESS contract address for staking or buying, they will be lost!*

This is only the beginning…

SURGEUSELESS

SURGEUSELESS fees:

8% Purchase and Sell – (6% Surge Tax, 0.5% SurgeFund, 1.5% Useless Furnace)

4% Transfer – (1% SurgeFund, 3% burned from existence)

XSURGE

How to Buy using our online XTRADER dApp!

If your wallet supports WalletConnect or Coinbase connect you can use the following steps:

1. Navigate to the XTRADER dApp by visiting https://app.xsurge.net in your browser or wallet (Note: iPhone users need to use their browser)
2. Connect your wallet with the Connect Wallet button
3. Select the Token to trade
4. Select the amount of BNB Smart Chain that you would like to spend or by scrolling left or right on the bar below the BNB entry box to select the BNB percentage you would like to spend.
5. Click accept
6. In the next step, adjust the Gas Limit through the setting icon to 1,200,000 and select confirm.
7. You will need to add the “custom token” in your wallet to be able to see it (Contract addresses are available on the website, or on the third page of this document). You need to select “BSC Network” when creating a custom token.
8. Done!

You can still use the traditional way of acquiring XSURGE. tokens

1. In your wallet, you make sure that you have Smart Chain BNB
2. Click send
3. Enter the SURGE token contract address you desire in the recipient address line
4. Select the amount of Smart Chain BNB you’d like to send
5. In the next step, adjust the Gas Limit through the setting icon to 1,200,000 and select confirm.
6. You need to add the “custom token” in your wallet to see the token (Contract addresses available on the website, or on the third page of this document). You need to select “BSC Network” when creating a custom token.
7. Done!

Congratulations! You are now part of the XSURGE Ecosystem!

HOW TO STAKE USELESS

DAPP Links

XTRADER

https://app.xsurge.net/

USELESS SWAPPER

https://app.uselesscrypto.com/

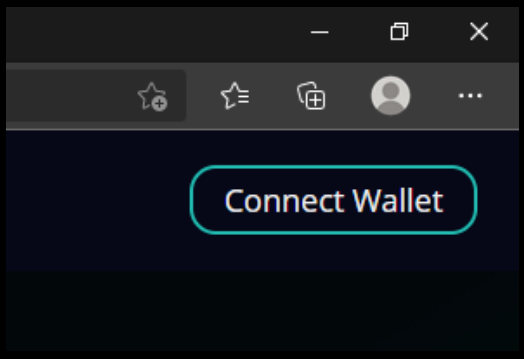
STEP 1

Navigate to the the XTRADER dApp or the Useless Swapper dApp.

The following steps will use examples from the XTRADER dApp

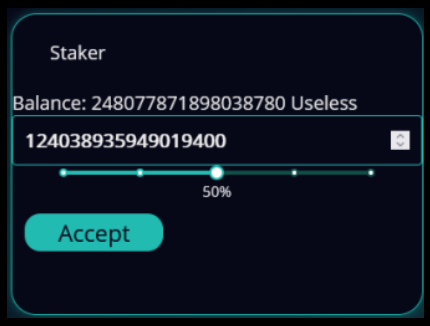
STEP 2

Connect your wallet (E.g. Trust wallet, Meta Mask) with the connect wallet button at the top right corner of the XTRADER dApp. If you need more detailed instructions on how to connect your wallet refer to: How to Use the XTrader dApp : XSURGE



STEP 3

There will be a box labeled Staker, as seen to the right. Here, you will be able to enter in the amount of Useless from your wallet you would like to stake. Once you are happy with the amount, select accept and you will then finish the transfer through your wallet when prompted.



Once the transaction is complete, SURGEUSELESS will be sent to your wallet!

Notes

- Do **NOT** send useless directly to the contract address. It will be lost!
- Staking useless, allows you to buy SUSELESS with your Useless tokens. To sell, you do so through the dApp or the write function of the contract as you would normally sell a Surge token.
- There is a 6% fee for staking useless (5.875% surge tax, 0.125% surgefund).
- Add Surge Useless as a custom token, using the SUSELESS contract address, to see the tokens in your wallet

What about my Useless Reflections

- Useless reflections will be sent to the base asset pool for surge useless. Thus growing the pool and your portion!
- Reflections to the Useless base asset pool, results in a positive price action for SUSELESS! Thus increasing the amount of useless you can withdraw when you sell!
