SPRINTER LEGEND

Fuel Economy; 20–22 mpg diesel

Powered by
Mercedes Benz

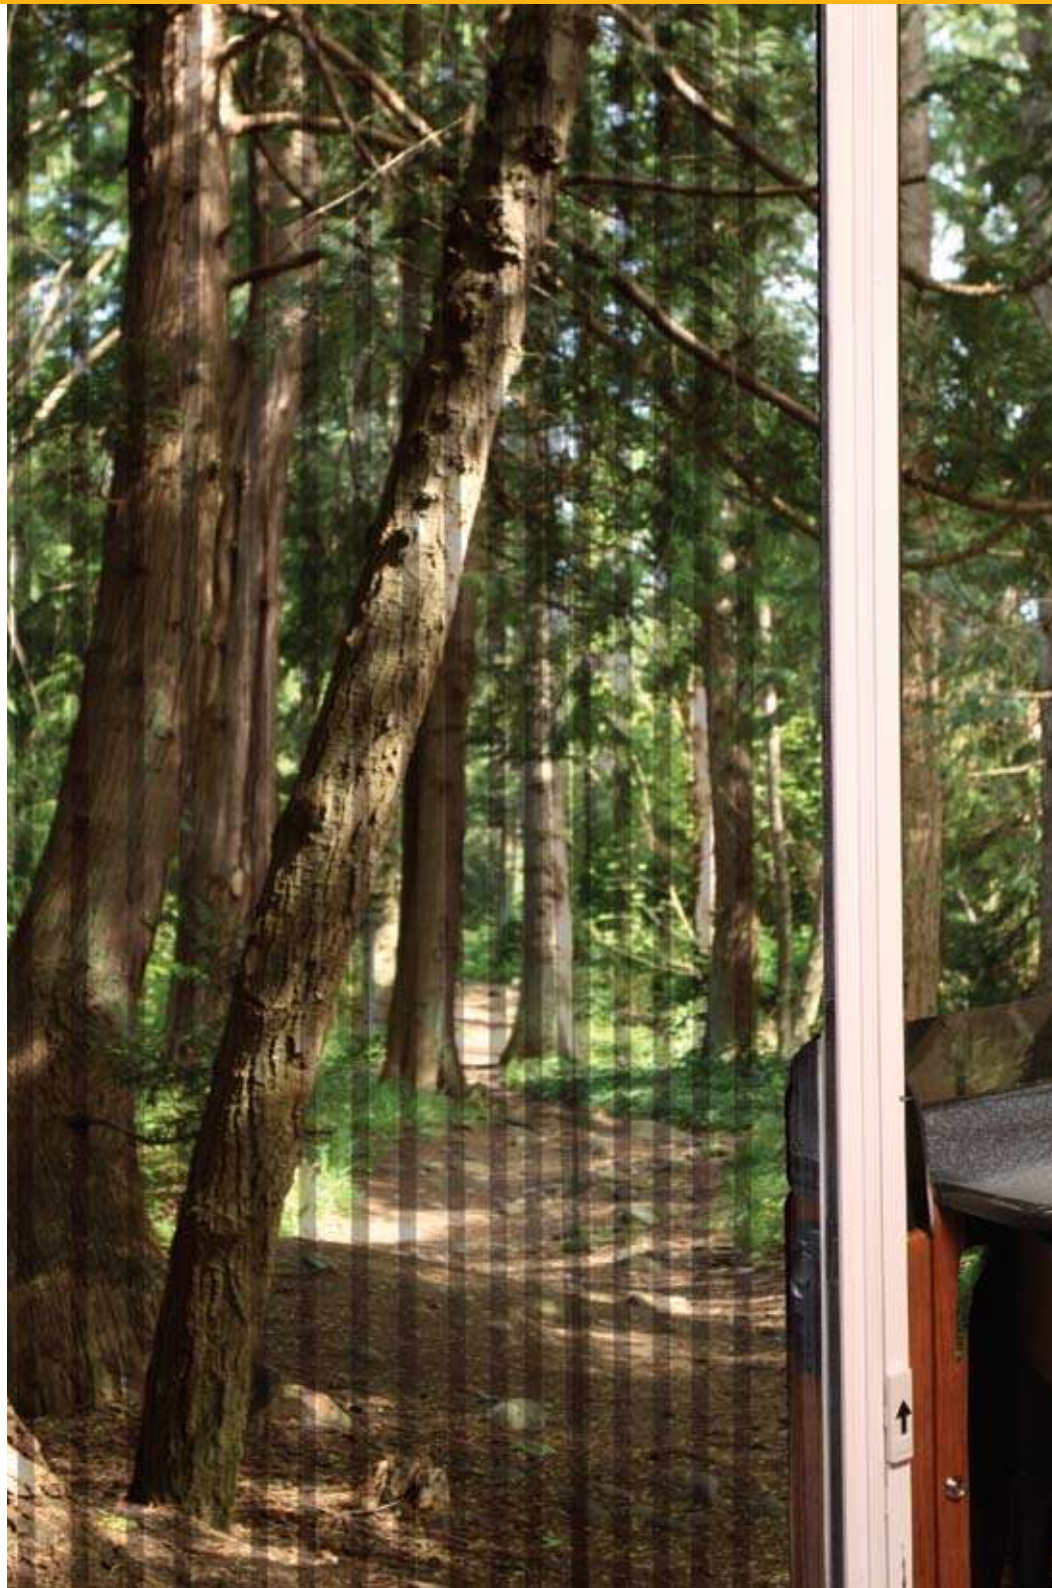

- Dual zone floorplan with front and rear living quarters
- Only electric sofa that can power forward for additional rear storage.
- Innovative and stylish sliding screen door – another Great West Van innovation!

Fuel Economy

During the last fuel scare many people wanted out of their larger cars and motorhomes alike but couldn't because of how quickly the values of these vehicles dropped. Whether gas prices are high or low its good to know at 20-22 MPG the Sprinter Legend is always in style. The new V6 Mercedes Benz diesel engine is quieter and more powerful than the engine it replaced. With its small 26 Gallon fuel tank you won't have to cringe every time you look at the fuel gauge and with an approximate range of 500 miles it's amazing how far those 26 gallons will take you.

A Tradition of Quality and Innovation

Inside the Legend you'll find the quality materials and finish you expect from Great West Vans. With subtle Ultra-Leather seating, rich Corian counter tops and recessed halogen lights with dimmer controls the Legend can take you anywhere in the lap of luxury. Windows are finished with color coordinated vinyl valences and vertically installed day/night shades for a more residential look and feel. The LCD TV, DVD home theatre system, convection microwave, brushed nickel pull-out faucet and programmable coffee maker are all standard, because in a coach this elegant who would expect anything less.

What a view!

The Legend features the full Sprinter window package for superior visibility from the inside and a striking appearance on the outside. We designed the Legend with the bathroom and taller cabinets on the drivers side to leave an unobstructed view out the passenger side. With the interior laid out in this manner the best view from the inside is of your campsite – not your neighbors! Our innovative accordion style sliding screen door also helps to bring the outside in creating an even greater feeling of spaciousness.

Sprinter Legend shown with Cherry wood cabinets and Slate ultra-leather upholstery.

SPRINTER LEGEND

Fuel Economy; 20–22 mpg diesel

Newly designed for 2008, the Sprinter Legend sports an optional sliding screen entry door. Not only will you appreciate the power of the New 3.0L Mercedes Benz Turbo Diesel engine you'll be amazed at how far this little power-house can push you between fuel stops.

Sprinter Legend shown with Cherry wood cabinets and Slate ultra-leather upholstery.

B Stands for Better Investment

Why do class B's cost as much or more than larger motorhomes? There are many reasons including higher initial chassis costs, more stringent safety and testing standards, higher quality materials and hand built craftsmanship to name a few. But the initial purchase price is only part of the equation. Some other questions you should ask yourself are: What is the cost of ownership? and... How much will it be worth when I'm ready to trade it in? Class B's have always had the lowest cost of ownership and highest resale value of any class of motorhome. Don't take our word for it, have a look in one of the RV trader publications or online and see for yourself the difference in depreciation. Count how many used Class A's and C's are for sale compared to Class B's and that will give you a good understanding as to why this is true.

Safety

At Great West Vans your safety is our top priority, which is why we are proud to partner with Mercedes Benz, renown the world over for their advances in vehicle safety. The Sprinter Legend features driver and passenger side air bags, four-wheel anti-lock disc brakes, electronic stability and traction control and a great view of the road around you with large windows and parabolic side mirrors for superior visibility. Climate and stereo controls are mounted in the large center console for easy access from the driver or passenger side. As in all Great West Vans, the Legend also comes standard with smoke, LP gas and carbon monoxide detectors.

The bathroom in the Sprinter Legend is fully equipped with a marine flush toilet, shower, slide out vanity sink, medicine cabinet and 2 - 110 GFI protected outlets. Above the shower is a skylight for increased headroom while showering and to bring in additional light without sacrificing privacy.

Exterior Dimensions

111" H x 273" L x 96" W

The redesigned interior features a longer galley cabinet with a Corian counter top. The 2 burner stove and stainless steel sink are recessed with flush removable covers for more useable counter space. Below the counter you'll find ample storage behind the 2 cabinet doors and inside the many pot and cutlery drawers. The coffee maker is also built in below the counter with a clever tip out trash bin underneath.

An extra wide entry step and illuminated grab handle are standard features on the Legend that you won't find on other Sprinter based motorhomes.

The subfloor storage trunk provides additional storage space in the rear of the coach.

Personal Choice Options

RKB King Bed

ELS Electric Tri-Fold Sofa

TBS Twin Bed

TBS Twin Bed day view

Upper cabinets over the driver and passenger seats are angled to provide easier access to the cab and a more attractive interior.

The fridge is installed up off the floor for easier access, with the standard convection oven located above. Installing all of the deeper cabinets and appliances on the driver's side also allows for a wider main aisle.

The Legend is the only Sprinter based motorhome to have a sofa that can slide forward to create a large rear storage area to keep larger items safely contained while travelling.

Integrated into the drivers side running board is a lockable storage compartment large enough for the power cord, hoses or even camping chairs. Behind in the unlocked compartment you'll find the holding tank dump valves, hose and the outside shower for easy clean up.

TITAN WIDE BODY

Fuel Economy; 12–14 mpg gas, 16–18 mpg diesel

- Class Leading Towing – up to 7500 lbs (6.0L Vortec Gas) or 9500 lbs (6.6L Duramax Diesel)
- Class Leading Stability – Only Wide Body Class B with dual rear wheels
- Class Leading Storage – 3 Outside basement storage compartments

Titan shown with Light Maple wood cabinets and Pecan ultra-leather upholstery.

Power To Pull The Big Toys

Class B's are known for their go anywhere do anything versatility. The only limitation, most class B's have a maximum tow rating of 5000 lbs or less. For those who's leisure pursuits include hauling a car to the race track or their horse or to a weekend competition and want the versatility of a smaller motorhome the Titan is the answer. With 2 powerful engines to choose from the Titan can pull up to 7500 lbs with the 6.0L Vortec Gas or up to 9500 lbs with the 6.6L Duramax diesel.

Wider Body Without White Knuckles

Great West Vans introduced the first wide body class B in 1991 but discontinued the model soon after due to the negative effect the wider body had on the vans handling characteristics. Many manufacturers still use standard body van chassis for their wide body models and add components and wheel spacers in an attempt to bring the van up to the task. In the development of the Titan wide body we decided to start by picking the right chassis for the job. The Chevrolet Express cutaway chassis adds the stability of a dual rear axle giving the Titan the sure footed feel to handle high speed off ramps or gusting cross winds in stride. Underneath the smooth lines is a steel roll cage reinforcing the entire body. The Titan body meets and exceeds FMVSS regulations and is so strong it even passed a school bus roll over crush test. A stronger body on a stronger chassis, drive the Titan and compare, we know you'll feel the difference.

Class Leading Storage

The Titan features a huge slide out storage drawer on the drivers side and large basement storage compartments on both sides behind the rear axle for a total of 3 basement storage compartments, other wide body class B's have as little as 1 outside storage compartment. In the electric sofa model the Titan offers a large rear storage area inside which is accessible from the pass through side compartment doors or large rear hatch. The Titan offers our optional Tri-Fold Electric Sofa which is the only Class B sofa bed that can power forward to create a large rear storage area. The sofa rides on rails that are mounted on the side not underneath so even with the sofa all the way back or in the bed position there is ample room underneath for storage. Longer items can pass through the back under the sofa and down the aisle because unlike some models that have a hard wall at the front of the sofa our soft vinyl front cover will lift, to allow longer items like skis, sailing masts or 2x4's to slide through.

The bathroom in the Sprinter Legend is fully equipped with a marine flush toilet, shower, slide out vanity sink, medicine cabinet and 2 - 110 GFI protected outlets. Above the shower is a skylight for increased headroom while showering and to bring in additional light without sacrificing privacy.

Hidden Roof A/C – The Titan features the same built in roof A/C with heat pump as the Classic. This built in A/C gives the Titan cleaner roof lines and reduces the overall exterior height.

Dual Rear Wheels – The Titan is built on a dual wheel axle for better handling and stability than other wide body models built on single rear axle van chassis. The dual wheel chassis also provides greater towing and cargo carrying capacity.

Sofa Powers Forward – The Titan is the only wide body Class B with an electric sofa that can power forward to create a large rear storage area keeping larger items safely contained in the back while traveling.

Motorhome Door
– Unlike other wide body class B's that use the original van cargo door for entry the Titan features a full size motorhome door for easy entry and exit from the coach.

Storage Drawer – The Titan has the most outside storage of any wide body Class B. The large slide out golf club drawer is more convenient as articles inside can be reached without getting down on hands and knees. There are 2 additional compartments on each side behind the axle.

Fridge – The standard 4 cu.ft. 3-Way Fridge and Convection Microwave oven are installed up off the floor – not under the counter – for easier access.

FORD CLASSIC

Fuel Economy; 16–18 mpg gas

- Conversion van exterior looks with all the amenities of a larger motorhome – ideal for RV restricted communities
- Original van length and width – drives and parks like a car
- Front and rear living quarters with a fully enclosed bathroom

Classic shown with Cherry wood cabinets and Champagne ultra-leather upholstery.

Is it a Motorhome or Conversion Van?

With its low profile aerodynamic top, the Classic offers the fuel economy and handling of a full size SUV for day-to-day driving. On weekends and holidays the Classic becomes a fully self-contained motorhome. The low profile aerodynamic roof design and our built-in roof air conditioner with heat pump give the Classic a conversion van exterior look making it the motorhome of choice in deeded communities where RVs are prohibited. The full body paint, aluminum wheels, stainless steel continental kit and attractive graphics package complete the striking exterior look of the Classic.

The King Bed floorplan features a large galley and a fully enclosed bathroom with flush toilet, shower and slide-out vanity sink. Both front seats can swivel to create a dining area up front, allowing the rear bed to stay made while camping. This model comes standard with a luxurious 6" thick mattress in the rear, which offers a large storage area below the bed. The optional Tri-fold electric sofa folds down to the same size bed (74" x 74") at the touch of a button with the added versatility of being able to carry 3 passengers. The sofa can also be slid ahead 29" to provide a large rear storage area.

Other features include a skylight with sunshade which increases standing height in front of the stove to 6' 4". The skylight provides more natural light inside during the day and is great for star gazing at night. The cabinet behind the driver's seat features an innovative counter top that can flip over and slide out to create a large work desk up front with a work light and 110V power supply close by. With the addition of a fold down hanger in the shower there are now 2 hanging closets in the KBF. Need to use the shower? No problem, just swing the hanger out into the aisle and close the door behind you.

Mounting the spare tire on the door allows both rear doors to be opened easily. The continental kit with stainless steel ring and painted dish can be locked to prevent theft of the full size spare tire.

The Classic is the only std body Class B to offer a slide out golf club drawer so articles inside can be reached without getting down on hands and knees.

There are 2 additional compartments on each side behind the axle. One provides room for tools, cords, and hoses while the other houses the slide out battery tray.

The Classic is the only std body Class B with an electric sofa that can power forward to create a large rear storage area keeping larger items safely contained in the back while traveling.

Your safety is our primary concern.

At Great West Vans we are extremely proud of our excellent safety record. We subject our vans to a battery of tests to ensure the safety and protection of you and your family. Great West Vans is the only Class "B" manufacturer to use a "Double Walled, Double Strength," insulated roof. This unique roof design provides twice the strength of single shell models allowing you to drive with confidence knowing your Great West Van will protect you in the unlikely event of an accident. All aspects of the vehicle are tested to ensure your safety, including seat and restraint system tests, roof testing and even crash testing of the entire van. Each unit is equipped with smoke, carbon monoxide, LP gas detectors and a fire extinguisher. All Great West Vans meet or exceed FMVSS and D.O.T. safety standards for you and your family's piece of mind.

The built-in roof air conditioner provides a cleaner exterior look, more interior headroom in the rear of the coach and features a built-in heat pump

The Classic features a remote propane fill connection recessed in the running board providing easier access for filling. This compartment also houses the remote BBQ connection which is located conveniently on the camping side so you can set up your grill on a picnic table right outside the entry door of the coach.

Great West Vans have been designing and building quality Class "B" RVs since 1976.

Mission Statement

"To design and build innovative recreational vehicles that provide our customers with a truly enjoyable RV experience and the best value of RV in its class."

Warranty Coverage

When you choose Great West Vans you're purchasing more than just a motorhome, you're purchasing piece of mind. With almost 30 years of experience going into every van we make, you can rest assured that your Great West Van will provide you with years of trouble free, driving pleasure. It's also comforting to know that whether you're halfway across town or halfway across the country, there is an authorized service center close by and assistance is just a phone call away.

Chassis Basic Warranty Coverage
(Ford, Chevrolet, and Sprinter):
3 years or 36,000 MI/60,000 KM

Specific chassis components may be warrantied for a longer period. See manufacturer warranty specifications or call Great West Vans for complete details.
