Music Discs

The update adds a brand new music disc that is notable for its brown texture. The observe for it was recorded by Lena Raine. There's a small probability to seek out out the disc in the chests of a stronghold or a treasury.

New World Technology Features

Caves

Now the caves look completely totally different as the results of being reworked. Now they stretch down to $Y = -59$ and encompass two varieties of blocks relying on the depth. Down to $Y = 0$, the caves largely include the peculiar stone block, while the layers under will consist of deepslate. Such blocks as earth, dirt, andesite, and granite should not generated within the deepslate layer, so they are often discovered solely above $Y = 0$. The ores in a cave are generated relying on a block type; that's, in stone caves, the ore can be within the form of a stone, whereas in deepslate caves, they are going to be inside a deepslate.

Fissures and noise caves were added. The fissures are very much like canyons however are slender and stretch much deeper. There are also new ore veins which can be elongated ore formations of monumental dimension consisting of ores and another blocks. They can be of

two varieties - copper and iron. Copper veins are generated together with granite at the extent above 0, whereas iron veins generate along with tuff and are situated below 0.

Mountains

Mountains at the moment are related to six different biomes.

Mountain Meadow

It's the lowest mountain layer, which is an extraordinary meadow however positioned on the foot of a mountain. There are numerous flowers there, and the plants have a slightly totally different coloration resembling a mixture of inexperienced with a light blue shade. It is feasible for villages to generate on this biome. It's a habitat of rabbits, sheep, and donkeys.

Mountain Grove

This biome mainly consists of snow blocks and resembles the snowy taiga. Its vegetation consists of spruce bushes. It's a habitat of numerous kinds of animals, including pigs, sheep, chickens, cows, wolves, foxes, and rabbits. Pillager outposts will also be encountered there.

Snowy Slopes

They primarily consist of powder snow blocks and ice. They're generated on the slopes of a mountain, given there is a plain or a snowy tundra at the foot of it. Very few kinds of creatures reside there: solely rabbits and goats, as well as igloos and pillager outposts when it comes to the hostile ones.

Peaks

Peaks are available three totally different varieties: stone, frozen, and jagged. A rocky peak generates if a mountain is high enough and there may be no less than considered one of the next biomes at the foot of it: desert, jungle, savanna, or wasteland. Frozen peaks are generated if there are snow biomes close to the mountains. Solely goats live there. A jagged peak is a mixture of the rocky and frozen peak biomes. That's, it consists of blocks of snow and stone. Only goats spawn there.

Changes

Blocks

Large Dripleaf

A big dripleaf can now be positioned in the game world solely on certain sorts of blocks, including clay, coarse dirt, dirt, farmland, grass block, moss block, mycelium, podzol, and rooted dirt. It's the checklist of all of the blocks, on which one can put a giant dripleaf, others

will not apt.

Copper Ore

For those who install this update, the copper ore will drop slightly more uncooked copper: as a substitute of 2-3, you may get 2-5.

Redstone Comparator

When the comparator is lively, the texture of its base will likely be different.

Vines and Kelp

Should you minimize off the tip of a vine or kelp, it will not proceed to grow. This equally applies to cave, twisting, and weeping vines. Moreover, the texture of the cave vines has been modified - a gray pixel has been faraway from them.

Block of Copper

A block of copper can now be transformed to 4 reduce copper.

Enchanting Table

The enchanting desk now emits a gentle level of 7. Moreover, one texture has been modified; particularly, the lapis lazuli icon related to it should now be similar to the standard one.

Wither Skull

The wither's skull texture has been up to date and now corresponds to the up to date texture of the wither's head.

Doors

Changed the texture of many door types when they're is within the stock. The textures of another gadgets have also been changed, for instance, the campfire, soul campfire, signal, item body, and glow item frame. <https://system32.info/>

Mobs

Axolotl

Now this creature spawns solely in lush caves and only above clay blocks.

Goat

It could actually spawn solely in three new mountain biomes: frozen peaks, jagged peaks,

and snowy slopes.

Vindicator

The conduct of this hostile mob has been modified: now it does not attack baby villagers. This equally applies to pillagers, evokers, and ravagers. However, the infants will still be afraid of them and run away.

Glow Squid

It now spawns solely below Y=30.

Cod

Now they spawn in water between Y=50 and Y=64. This equally applies to such fish as salmon, pufferfish, tropical fish, dolphin, and squid. However, tropical fish can spawn at any height in lush caves.

Zombie Villager

The texture of this hostile creature has been modified: the redundant pixels have now been removed from it. This can also be true of the weaponsmith zombie villager.
