Collaboration with Brunia Interiors
Handtuft technique

about us

Approximately 20 minutes from Oporto, in a small village called Beiriz in Póvoa de Varzim, custom-made rugs, made of natural materials, are produced by experienced artisans every day. Each client is accompanied by our team from the definition of design, material and texture to the delivery of the rug. Every design is customized to the customer's taste and needs and is produced and finished by a detail-oriented team, so everything is exactly as requested.

Handtufting technique at our factory

our process

Our handcrafted rugs are custom-made in our factory by two techniques: handknotted and handtufted. Our handknotted rugs are made by our experienced artisans using the century long technique of the Beiriz knot, and our handtufted rugs are tufted using a modern technique with tufting guns, produced by skilled professionals. But before the actual production, we have a design team that helps develop the design and a sales team that helps you determine the type of quality to use, the colors and dimensions that better suit your request. After being produced, our finishing team takes care of the last details to make sure the perfect carpet is delivered.

since 1919

The history of Beiriz rugs began more than 100 years ago. In the small village of Beiriz, the first rugs were born. Production grew rapidly and the factory was well known both in Portugal and abroad. Several medals were awarded to the founders at national and also international exhibitions. Nowadays, in addition to the knotted rugs, handtufted rugs are also produced for a more modern approach to the industries needs.

Handknot technique at our factory

custom-made

At our factory, each rug is produced for a specific client. Therefore, each rug can be fully customized, from the color, dimensions and shape, to the finishing details. There are no limits to creativity here. You can approach us with a specific design in mind, or we can work together with our design team and develop a completely original rug. We have vast experience working on large projects with designers and architects for hotels or embassies, as well as producing for individuals who want a unique piece for their homes.

the **textures collection**

In order to give even more texture to our rugs, we created four new qualities. With the combination of the cut and loop technique we present three combinations, the Miragem with cut and loop effect at the same height and in the same color; Dunas with cut and loop with different heights with the possibility of different colors, and Shine, with loop in white wool and cut in tencel, with a variety of color options giving a slatted effect to the carpet. Finally, the Fly quality, in fine wool and with a variety of colors, it's differentiated by the height of the pile, 28mm.

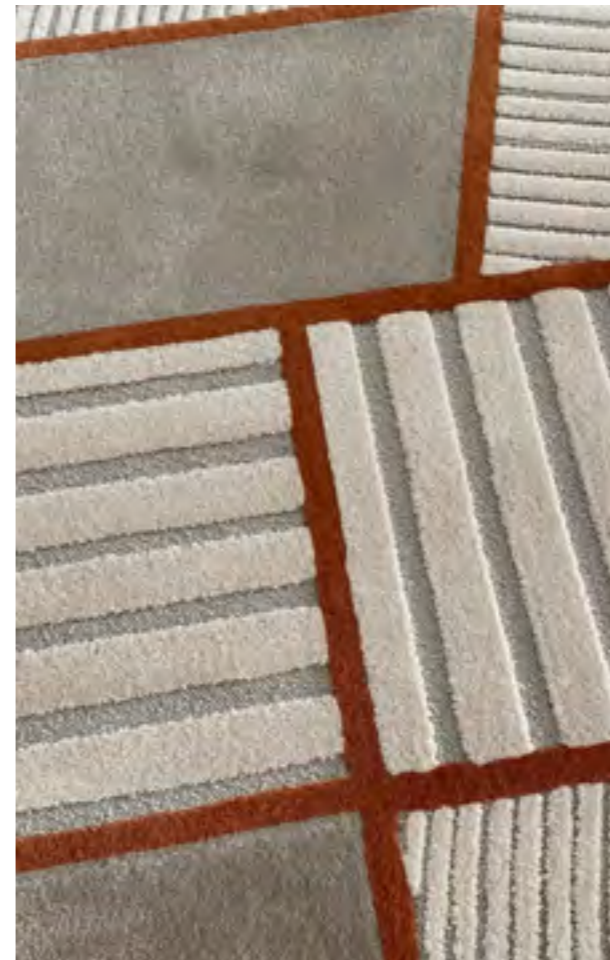

Miragem

Combines the cut and loop technique with the same pile height, giving a unique texture and visual effect. It contains only one color but a variety of designs.

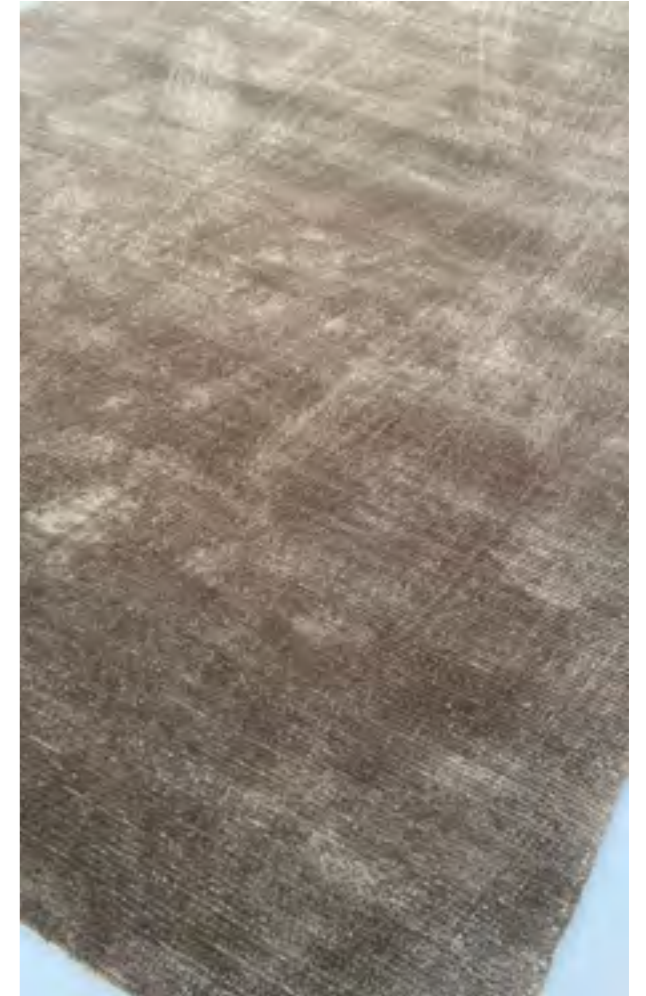

Dunas

It also combines the cut and loop technique, but in different heights allowing a unique design. It can contain different colors, or a single color, also with infinite design options.

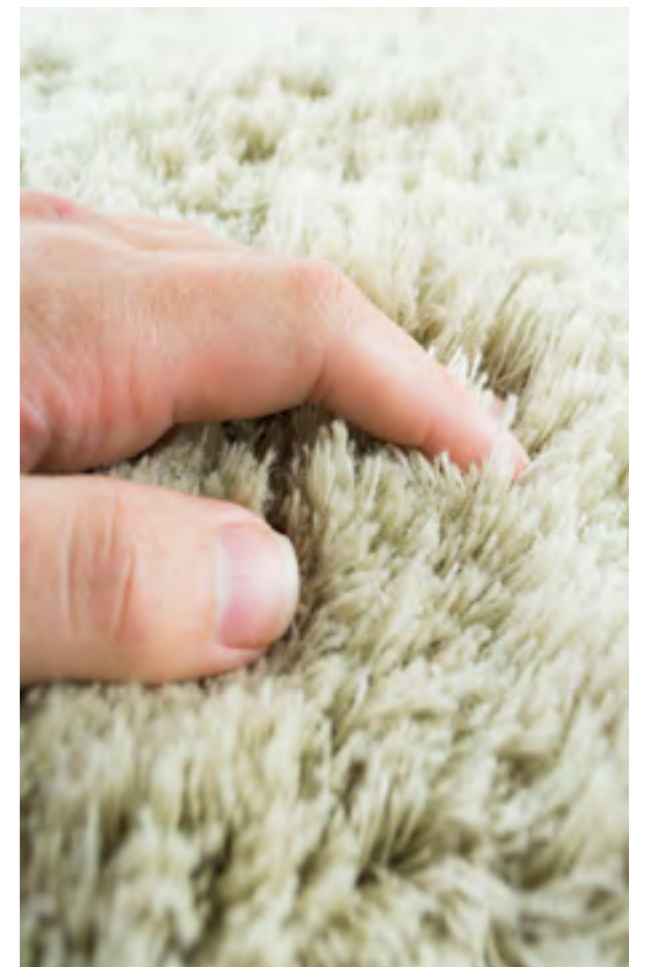

shine

Combining the two materials, wool and tencel, we have a super soft texture. Only available with white wool loop and tencel cut pile, in a variety of color options.

fly

In fine wool and with a variety of colors, they differ from the other qualities by the height of the pile: 28mm. It can have a design, a single color, or a mix of colors. It's up to your imagination.

beiriz by
vanessa barragão

We saw this project grow during the years that this exceptional designer worked with us and we are very proud to represent the Beiriz collection with Studio Vanessa Barragão. The studio is focused on artisanal techniques and waste from local industries to create textiles and interior products. Vanessa grew up in a coastal area and her connection to the sea is the inspiration for the development of her art. Her work is characterized by captivating coral environments, combining handicrafts and recycled materials in tapestries and unique sculptural rugs, both for floors and walls, which can already be seen all around the world.

finishing

The final stage of our production process isn't the least important or the least interesting. Each rug is carefully finished by our very dedicated finishing team. In a completely manual and also time-consuming process, our team trims the excesses, unifies the pile, separates the colors, sculps the rug creating reliefs, thus ensuring that the rug is perfect to be sent to its destination.
