DRIP

DRIP Network is the latest project developed by **Forex_Shark** and his team. The official token of the **DRIP Network** is **DRIP (BEP-20)** on the **Binance Smart blockchain (BSC)** that captures value by being scarce, deflationary, censorship resistant, and by being built on a robust, truly decentralized blockchain.

The recommended exchange for trading **DRIP** is the **Fountain** contract which can be found directly on the platforms website under the "swap" tab, as it allows us to waive the initial **10%** tax on buys and provides the lowest prices and highest liquidity, resulting in less slippage for larger trades. For other exchanges, such as **Pancakeswap**, it is recommended to always cross-check the token address against the **DRIP** address provided on <https://drip.community> as there are many scams and fake **DRIP** tokens currently being listed.

At launch **DRIP** can be deposited into **DRIP's Faucet** contract to provide a consistent **1%** daily return (up to **365%** of initial principal amount) for participation over time. Additionally, players can add their **wBNB** into the **Reservoir** contract to become a permanent liquidity provider for **DRIP** and earn **wBNB** rewards indefinitely from multiple dividend streams and income generated from exchange fees. **DRIP** is the only deflationary daily **ROI** token that pays stakers and referrers from a tax on transactions and not through inflation!

Faucet

The **DRIP Network's Faucet** is a low-risk, high reward contract that operates similarly to a high yield certificate of deposit.

Players can participate by purchasing **DRIP** from the platform's **SWAP** page, joining another user's **DRIP** team (10 **DRIP** minimum requirement) Depositing **DRIP** to the **Faucet** contract earns a consistent **1%** daily return of their **DRIP** (**365%** maximum payout) passively.

Players can also compound their earnings through regular deposits, rolling rewards as well as team based referrals. Unlike many other platforms promising a consistent daily % return, **Faucet's** contract cannot drain and will **ALWAYS** be able to provide the **DRIP** that has been rewarded.

DRIP rewards come from a **10%** tax on all **DRIP** transactions excluding buys from the platform's **SWAP** page. If there is ever a situation where the tax pool is not enough to pay **DRIP** rewards new **DRIP** will be minted to ensure rewards are paid out. Given the ingenious game theory behind the **DRIP network**, the probability that the system will need to mint new **DRIP** to pay rewards is extremely low. Since **DRIP** deposited into **Faucet** are sent to a burn address and **DRIP** is constantly being locked in the liquidity pool through the reservoir contract, **DRIP** is the only deflationary daily **ROI** platform.

The best strategy for **DRIP** is to focus on real world adoption by building out your team through direct referrals, as you will receive bonus rewards from referrals on their deposits and downline bonuses from players they refer based on the amount of **bR34P** held in your wallet (see section titled '**Buddy Referral System/Reward Structure**' for more information). By doing so, you will dramatically accelerate your **ROI** period and allow your team's chain to grow out organically. Not only are players able to passively increase their **DRIP** holdings in **Faucet** through participation over time, but **Faucet** also incentivizes players to participate actively by providing lucrative referral rewards for holding **bR34P** in their wallet and building out their team.

There is also an airdrop feature which is a great way to ensure that your account is in **positive net deposit value standing**, give back to your team, and also build up referrals through frequent giveaways.

Compounding

Faucet's compound mechanism uses your current available **DRIP** dividends and automatically redeposits them into the **Faucet** contract, **compounding** your long term earnings by increasing your daily cash flow and also by increasing your max payout. We have added a compound interest calculator to the platform which will allow you to make a more educated decision and realize the power of compound interest! **Compounding** often and gaining **referral** bonuses will help keep your deposits net positive, allowing you to continue receiving downline **referral** bonuses!

"The most powerful force in the Universe is compound interest."

Albert Einstein

Onboarding System

In order to successfully make a deposit into the **Faucet** staking contract, you will first need to join someone else's team by either clicking their referral link or by manually adding their wallet address into the buddy referral system (minimum requirement **10 DRIP**). In order to receive referral rewards, players must hold **bR34P** in their wallet and the depth of the rewards received will be determined by their individual **bR34P** tier requirements. In addition, accounts must have positive deposit status for direct referral bonus rewards as well.

A rate sheet is included below for how much **bR34P** must be held to receive **10%** bonus rewards on deposits from your downline. If an account is not net positive when the player in their downline deposits, or if they do not hold enough **bR34P** to receive referral bonuses at that level of downline or they were the last person to be credited with a referral bonus from that player, the bonus will go further upline until it hits a player who is eligible for the referral bonuses. Using this round robin system we have eliminated the incentive for self referring and other bad behaviour which is used to leech referral systems, while still greatly rewarding team building through referrals! If a player plays like a solo player, they will not get team based rewards. Rewards are paid as a direct deposit. This will directly and immediately enhance longevity of the platform and also promote long term team building. The **bR34P** tier requirements for downline referral bonus are as follows:

Downlines accessible	bR34P in wallet
1	2
2	3
3	5
4	8
5	13
6	21
7	34
8	55
9	89
10	144
11	233
12	377
13	610
14	987
15	1597

Whale Tax

We have added a whale tax on withdrawals to help hinder whales ability to outpace other players in the game, forcing them to kick back some of their rewards to the community and maintain the sustainability of the project! The tax goes as follows, and does not apply to anyone below these staked holdings.

Threshold	Tax %
< 1M	0
>= 1M	5
>= 2M	10
>= 3M	15
>= 4M	20
>= 5M	25
>= 6M	30
>= 7M	35
>= 8M	40
>= 9M	45
>= 10M	50

Reservoir

Reservoir is **The DRIP Network's** solution for players that want benefit from non-inflationary yield farming through adding liquidity to **DRIP**. Players can participate by adding **wBNB** to the **Reservoir** contract to earn passive perpetual **wBNB** rewards, while also providing locked liquidity to the **DRIP** ecosystem! **wBNB** rewards are paid out instantly and through a persisting drip protocol from the dividend pool.

Reservoir helps provide long-term price support and an ever rising potential price floor, as permanently locked liquidity is added to the **DRIP** token on **The Drip Network's** swap exchange.

Not only are players able to receive perpetual **wBNB** dividends using **Reservoir**, but **Reservoir** ensures that the floor of liquidity for **DRIP** is hardened, providing permanently locked liquidity and long-term price support.
