

# Minecraft Hosting: How to Host a Server On Java Edition

Are you interested in learning more about Minecraft hosting? It is possible to set up your own Minecraft Java edition server to invite your friends or create a multiplayer server to share your Minecraft server with more players. However the initial process may be slow. Here's how you can set up and host your own Minecraft servers.

To get you started with Minecraft hosting, Mojang has helpfully provided free of charge server software that you can download to manage your server. You can download the Java Edition server on the Minecraft website. Before you do this, though you'll need to make sure you have the latest version of Java installed. This is an important step for security. You can check this by accessing Java through your control panel. If you're required to install Java or update the file, download the latest version of Java. While it's downloading, why don't you take a look at a few Minecraft ideas to get your creative juices flowing.

If you've got the most recent version of Java and have downloaded Mojang's server software Here's what you'll need to do next to start setting up Minecraft hosting and get your free Minecraft server up and running.

## How do you host a Minecraft server

You'll need to set up an account for your server during setup. This is because if you run your server from a download folder or desktop it will create configuration files there. By creating a server folder it will be easier to organize all the files.

After you have clicked the file and launched the server, you'll need to set it up. These are the steps:

Open the text file `eula.txt` in an editor for text. Change the line `eula=false` to indicate that you have read, comprehended and agreed to the user license agreement. Once you've set up up Minecraft hosting you'll be able share your server by setting up port forwarding on your router. It is not recommended to host a server on the exact same computer as the one you plan to use.

For a list of frequently asked questions and instructions on how to set up Minecraft hosting, Minecraft recommends this guide, which should answer any other questions or issues that arise from the sometimes difficult and tedious process of setting up a server. You can also check out this official Microsoft help article on the subject as well.

## Minecraft Realms Plus

Minecraft Realms Plus is a different way to create Minecraft hosting. This will save you the headache of making an entire server from scratch. Mojang's official subscription to host servers without prior experience. It will cost you \$7.99 a month, with only the host paying the fee.

Minecraft Realms Plus is the most convenient way to host servers. It can allow up to ten players join your server, but it is accompanied by the fact that you are essentially renting a server from Mojang, which means you won't have the same freedom. Realms will however add new content on a regular basis for subscribers, so there is always new mini-worlds and skins to keep you entertained.
