Includes Limitless Access TO ALL Programs

Mod Creation

Essentials

In this newbie stage Minecraft coding course, youngsters learn actual Java code while making a custom axe that shoots fireballs as well as a repulsion shield that shoots enemies into the air! We cowl key concepts equivalent to conditionals and loops.

- Intro
- Beg
- Int
- Adv

Getting Began

Command Blocks

Starting Our Axe

Starting Our Shield

Mod Creation 1: Forge Your Sword

On this widespread course, college students design their very own customized sword and give it particular powers using Java programming. We deepen our understanding of variables and methods.

- Intro
- Beg
- Int
- Adv

One Sword To Rule Them all

Revenge Of The Monster

Mod Creation 1:

Energy Ore

On this exciting Minecraft coding course, children will create a brilliant-powered pickaxe and custom ore! We cover constructors and variables and deeper college students' understanding of Java

- Intro
- Beg
- Int
- Adv

Preparing our Tools

To Smelt Ore not to Smelt

It is Mine! All Mine!

Mod Creation 1: Create a Creature

In this highly creative Minecraft modding course, students will design and code their own customized mob in Minecraft! Students will deepen their understanding of parameters, variables, and methods

- Intro
- Beg
- Int
- Adv

Getting ready for an Epic Quest

It is ALIVE!

Mod Creation 1: Lucky Block

In this standard Minecraft coding course, college students will design and code their own custom Lucky Block mod! Students will deepen their understanding of randomization and conditionals

- Intro
- Beg
- Int
- Adv

Getting ready To Get Fortunate

What's Within the Field??

Mod Creation 1: Magic Armor

In this motion-packed course, students will design and code their very own customized Magic Armor in Minecraft! Students will deepen their understanding of strategies, variables, and parameters.

- Intro
- Beg
- Int
- Adv

The Glow Up

Mod Creation 1: Brand New Biomes

In this extremely artistic Minecraft coding course, college students will create their very own customized biome! Students will deepen their understanding of methods, conditionals, and more!

- Intro
- Beg
- Int
- Adv

Hearth Up The Forge

Extreme Landscaping

Mod Creation 1: Epic Weapons

In this fashionable Minecraft modding course, students will design and code a sequence of excessive weapons, together with our infamous Cow Cannon!

- Intro
- Beg
- Int
- Adv

Making ready your Weapons

Thunder Hammer

Lava Launcher

Bovine Bullets

Mod Creation 1: Build and Boom!

In this explosive coding course, students will design and code a custom structure after which create massive explosions utilizing Java! Students will deepen their understanding of loops.

- Intro
- Beg
- Int
- Adv

Put together the Explosives!

Increase!

Construct and then Increase!

Mod Creation 1: Home In A Field

On this popular mod, college students will design and code a home that appears instantly with code. College students will deepen their understanding of parameters, variables, array lists, and loops.

- Intro
- Beg
- Int
- Adv

A Home Needs A Basis

The Transformation

It's Bigger On The Inside

Mod Creation 1: Infinite Objects 1.12

On this fiery course, students will customise the AI of their creature (from Create A Creature) to create a fearsome fireball attack. Students will study Synthetic Intelligence and randomization

- Intro
- Beg
- Int
- Adv

Copy That

The Item Manufacturing unit

The Block Manufacturing unit

Mod Creation 1: Synthetic Intelligence and Fireballs

In this fiery course, college students will customize the AI of their creature (from Create A Creature) to create a fearsome fireball assault. College students will study Artificial Intelligence and randomization

- Intro
- Beg
- Int
- Adv

Create an incredible custom mod for Minecraft.

Children learn conditionals, loops, booleans, strategies, and more!

Mod Creation with Minecraft: Dragon Rider

Make your own custom fireplace-ball-capturing Ender dragon and equip it with armor! Study and apply with conditionals, loops, variables, methods, and extra!

- Intro
- Beg
- Int
- Adv

Mod Creation 1 with Minecraft 1.Eight

This Minecraft coding course is CodaKid's original Mod Creation basic and offers a whopping 35+ hours of award-successful pupil tasks. We cover key concepts akin to parameters, variables, conditional, loops, and arrays.

- Intro
- Beg
- Int
- Adv

Create amazing customized instruments, weapons, biomes, and more for Minecraft®!

Kids learn real Java coding using the Eclipse textual content editor

College students be taught conditionals, loops, booleans, methods, and more!

Forge Your Sword

Strike the Earth

Energy Armor

Make Some Monsters

Uncommon Loot

Model New Biomes

Explosions and Particular Results

Custom Buildings

Epic Weapons

Mod Creation 2 with Minecraft 1.Eight

This creative and captivating Minecraft coding course teaches college students the way to make three customized dimensions in Minecraft. We cowl extra advanced strategies, loops, and conditionals.
