

## Forums Charter

01.08.2018 - [forums.eosgo.io](https://forums.eosgo.io)

**Mission:** To be the EOS community's preferred hub for Q&A, discussion, and consensus.

### Objectives:

- **Provide resources** for EOS block producers, governance builders, developers and project managers to self-organize and successfully launch EOS mainnet.
- **Coordinate events** supporting the June 2018 genesis block.
- **Adapt** with the EOS community to continue our Mission after blockchain launch.

### Scope:

**EOS Go forums shall always strive to respect freedom of speech and opinion without censorship.**

Two distinctions will be made, only when instigated by the EOS Go community:

- Hateful/abusive behavior is flagged by three or more community members. Harmful content will be removed and the user given a warning for first infraction, ban for the second.
- Spam is blocked by forum bots and confirmed under review by 3 of 5 admins. Same warning/ban process as above.

**Admin powers include:**

- "Minor changes" including cosmetic, moving miscategorized posts, and software maintenance.

**Admin powers do not include:**

- Post removal or banning of users without following due process above.
- Editing of posts at any time.
- Modification of upvotes.

### FAQ:

- **How are rules made and new forum categories created?**

Suggestions should be posted to the [Forum Improvements](#) category - if a suggestion receives upvotes equal to more than 51% of the community it will be approved. "Minor" rule changes will be made when 3 of 5 admins agree.

- **What gets flagged as spam and how can I dispute?**

Spam will be further covered in a post under the “EOS Go Forum Improvements” category.

- **Why would a user get banned?**

- For repeatedly making posts that are off-topic, unprofessional, or disrespectful of others; being flagged by three community members, and receiving one unheeded warning.
- A pattern of spamming the forum or of using the spam flag maliciously against non-spam content (e.g. flagging content they merely disagree with)
- Further community consensus that they are “trolling”. See: [https://en.wikipedia.org/wiki/Internet\\_troll](https://en.wikipedia.org/wiki/Internet_troll)

- **Who are the current admins and why were they appointed?**

EOS Go started with a group of volunteers and block.one employees to realize the EOS.IO vision of a community launch in 2018. The current admins are volunteers.

- **Why was this platform created?**

To provide a forum in which the community could self-organize to successfully launch EOS public blockchain.
