

# Handheld Vacuums for Easy Cleaning

Handheld vacuums are fantastic tools for cleaning almost any surface with ease. Their compact size and powerful motors make them great for use on stairs, sofas, upholstered furniture, hard floors, even hard-to-reach spaces like the baseboard in your bedroom. The problem many people have is which model to buy. They either love their cordless cleaner or hate it, with no in-between position. This article will help you choose the right cordless vacuum cleaner for you and your home.

Cordless vacuum cleaners are the perfect solution for those who need a powerful clean but don't want the cord that goes with it. The least expensive ones, such as a Black + Decker Dustbuster, may cost less than \$50, while high-end cordless model, such as the Black + Decker Flex can cost more than a thousand dollars. So aside from the obvious advantages of a cordless model, what really makes the difference when buying one? For starters, cordless vacuum cleaners come in both corded and cordless versions these days, and cordless versions have really improved over the years.

Gone are the days of cheap plastic cord that would definitely break after a few months' use. Today's cordless vacuum cleaners feature powerful motors, powerful filtration systems, lightweight (but still sturdy) construction, advanced filtration systems, interchangeable brushes, and many other neat features and functions that make them perfect for all sorts of cleaning jobs, from carpets to hard floors. Most of today's cordless vacuum cleaners have rechargeable batteries. Some can even be used on power outage.

Perhaps the best thing about cordless hand vacuums is that they are much easier to use than their full-sized counterpart. Handheld vacuums can clean all sorts of different messes. shark cordless vacuum handheld Carpets, rugs, upholstery, drapes, etc. can all be completely cleaned with just one push of a button. You don't have to lug around a full-sized vacuum cleaner; you can clean any type of surface from hard floors to carpets, without having to carry it around.

If you are looking for the best handheld vacuums, then you should consider the features that define each of the different brands and models. There are two main types of handheld vacuums: corded and cordless. Cordless are usually considered to be more powerful and efficient than corded ones because they don't have a cord that runs from the back of the cleaner to the nozzle. It makes for a much easier clean, as there isn't any tangling or resistance to move the cleaner around. Both cordless and corded hand held vacuums are available in cordless styles for both commercial and residential use, so you will find one that suits your needs.

Some of the best cordless full-sized vacuums available today are the Dyson V7 cordless vacuum cleaners. The Dyson vacuums are considered by many consumers to be the most powerful vacuums available on the market today, which is surprising given that it is only considered a cordless vacuum cleaner. With its powerful motor and powerful suction, the Dyson can pick up and remove dirt and other pollutants from just about any surface. Even hard wood floors can be vacuumed with ease with Dyson vacuums.

If you want a small handheld vacuum that can pick up a number of different particles, you might consider the Dyson Animal Erogenic Dust Smeller. This small handheld vacuum comes with two power settings, allowing you to pick up and move loose debris on carpet or bare floors easily. It features a powerful fan and a debris bin that is ideal for picking up pet hair and dander. Pet hair and dander stick to carpets, upholstery, furniture, walls, and

ceilings; some of it never gets removed completely. Using this powerful Erogenic Dust Smeller will help you keep your home clean.

For occasional pet stain eraser usage, try the Dyson Animal Cleaner Plus. This is a small enough handheld vacuum that you can use it on the floor as well as the countertop. It features an automatic pet stain remover nozzle and a microfiber surface that is easy to clean. You can use it on the kitchen counters, tabletops, and even the refrigerator.
