Jackson, MS 392205

Dear Brenda:

After reviewing your curriculum and running a thorough computer search we have found no matches in software that could be utilized to implement the Work-Based Learning Curriculum. There are several software companies that produce software that could be utilized in teaching certain components of your curriculum but none that meet at least 50 percent of the SCANS competencies.

I am sorry that we couldn't be of more help to you. We can, however, develop specific software to meet your curriculum needs. We at Aspen Technologies look forward to working with you in the future.

Yours truly,

  
Susan Tierson  
Account Executive
