

Discount Methyl-1-Test 10 mg(Methyl-1-Testosterone)

Methyl-1-Test 10 is an oral steroid derived from Dihydrotestosterone. It is similar in its structure to testosterone-1 and differs only in the addition of the methyl radical in position c-17-alpha. Methyl-1-testosterone can be considered as a kind of union of Primobolan, Stanozolol and Trenbolone. It has a 1-ene from Primobolan structure, Stanozolol's bioavailability and Trenbolone's high activity. According to the standard research, Methyl-1-Testosterone is higher than that of any active steroid sold. It is popular among bodybuilders, the drug is famous for rapidly increasing muscle size and strength, with a certain level of water retention and fat growth. In medicine Methyl-1-Test 10 is indicated in treatment of testosterone deficiency in males.

Buy Methyl-1-Test 10 synthetic androgenic anabolic steroid for bodybuilding. Ok ein paar Ausnahmen wo ich mir mal eine Pizza oder etwas Schokolade gönne gibt es schon aber das voll verdient ☺ #comebackstronger

I was proud as I watched over time that my muscles were growing, and becoming visibly more prominent. I expected to have gained about 5-7 pounds throughout the bulking process, and when I realized I had not, all the pride went away.
