FAQ

- What is ManaCube? - ManaCube is among the main Minecraft servers on Minecraft: Java Edition. We have now had over 4,000,000 players login to our servers and take pleasure in the good variety of our options that can be found on no different server.

- Minecraft servers are worlds that you could play on with different gamers via multiplayer. They offer different experiences and games.

- To join a Minecraft Server, open Minecraft then click on on Multiplayer. So as to add a server, click on on "Add Server" then sort the server's IP in the Server Deal with field. If a server did not specify a port to use, don't type something into the Server Port field. By default, the port is 25565.

- Minecraft Java Version servers usually are not moderated by Microsoft and supply no parental controls not like on Bedrock Edition. At all times play on known and trusted Minecraft servers which have a set of rules to make sure that your experience is secure and clear from any obscenity or harmful content material.

- The preferred Minecraft Server gamemodes are Skyblock, Prison, Towny, SMP, Factions, and Survival. ManaCube has all of those gamemodes and you may join our servers to play with other gamers. We attempt to be the most effective Minecraft server on the market.
