NCP system Ukraine (1)

NCP network is coordinated by 2 persons: Yegor Dubinsky (National Academy of Sciences) and Stella Shapoval (Ministry of Science and Education)

Number of UA NCPs: 38 (33 people), for the various Horizon 2020 Programme sections, areas and functions.

These NCPs are based at Ukrainian universities, institutes of the National Academy of Sciences of Ukraine and other organizations such as NGOs (for instance, Agency of European Innovations nominated as NCP to ICT area).

Most NCP staff members in the network have experience in participation in European projects co-financed by European Commission from FPs. They were involved in international R&D cooperation – the majority participated in FP6 and FP7 projects, and in other European programmes such as Tempus, Erasmus, Erasmus+

NCP system Ukraine (2)

Financing (How is the NCP work financed)

The organizations nominated as NCP finance their activities from different sources – the majority (approximately 10 of them) is funded from the state budget since 2014, which covers salary, materials, services and travel costs.

Some organizations from the NCP network cover the financing from the budget of the host organization or from other, external sources, for instance international projects.

Some NCP members are working voluntary – without any external financing and finance their services from own sources.

Only a few member organizations perform the NCP activities along with their ordinary duties (research), working therefore on a part time basis.

NCP system Ukraine - Webpages

The majority of the NCP members have developed webpages and maintain them to present general information about NCP activities, Horizon 2020 program, open calls, scientific events, partners search support and consultations. They wish to provide for potential proposers an easy access to the most important European information sources about Horizon 2020 and to present the competences of Ukrainian organisations to the European research community.

Some NCP regularly update the webpage paying attention to the most relevant information to the specific area of their activity (like transport, energy or ICT) and publish new trends in European policy relevant to their specific areas as well as providing the information about major Ukrainian and European events dedicated to Horizon 2020 programme and its priorities. Only a few organizations maintain the webpages in foreign languages (English and Russian), as well as making use of social media such as Facebook or LinkedIn as dissemination tool.

Participation in projects

Ivan Kulchytskyi, NCP SME and ICT

FP7-ICT: PICTURE, EECA-2-HORIZON (<http://eeca-ict.eu>)

The overall aim of both projects is to engage the EU and EECA stakeholders from across research, academia, industries, government and civil society to enrich and support the EU-EECA ICT Policy Dialogue, and to reinforce strategic partnerships between EU and EECA ICT organizations

H2020: Idealist2018, National Representatives

Sergiy Shukayev, NCP ICT

FP7: NoGAP, <http://www.no-gap.eu>

NoGAP aimed to bridge the gap between research and innovation. The overall objective of the project was to reinforce cooperation with Eastern Partnership countries to develop a 'Common Knowledge and Innovation Space' on the societal challenge 'secure, clean and efficient energy'.

H2020: Ukraine, <http://www.project-ukraine.eu>

The UKRAINE project was established in January 2015 to capitalize on opportunities for partnerships created by the finalization of the EU-Ukraine Cooperation Agreement in the field of Global Navigation Satellite Systems (GNSS)

ICT NCP system Ukraine

UA ICT NCPs problems:

- Lack of information on statistics and UA organizations participating in the submitted/winning proposals, which makes any analysis very difficult
- Lack of contacts and relations (especially foreign contacts)
- No efficient coordination of NCP network (from National Coordinator)
- Lack of the state funds for the support of the international activities
- Insufficient funding of NCP activities

We also need EU Financial support to experts visiting Ukraine

The Competence Platform is an online service offered through the EU – EECA Gateway on ICT research and development portal.

You can use it to promote your ICT competences and to find information about your potential partners - ICT experts and organizations of the EECA region and Europe.
