

Secure Access To Easier Lobbies With The Best VPN For Gaming

ExpressVPN is often labelled the best service for streaming, but that's not all. It's also one of the best gaming VPNs for many of the same reasons. It offers strong connection speeds and access to a large network of geographically diverse servers, making it a top choice for both streaming and gaming.

Why do you need a VPN for gaming? Besides offering protection for your personal information, a VPN can also level the playing field in games like Call of Duty: Warzone. By connecting to a ExpressVPN, you can hide your real IP address and connect to a secure server in another location. You can connect to a country with fewer gamers, or connect to a country at a less busy time of the day. This reduces the chance you'll meet skilled players, therefore increasing your chance of success.

A one-year subscription to ExpressVPN is on sale for £79.11, saving you 49% on list price. This discounted plan includes an extra three months of coverage and a year of unlimited cloud backup for free. Risks Subscribers also get a 30-day money-back guarantee and the ability to connect up to 10 devices simultaneously.
