Project offers ICO with tokens which will be used to pay dividends to token holders. That means that this token should falls under regulation of SEC in USA.

Official answer of the project developers on the question about status of the token is that they avoid jurisdiction of all countries which have strong regulation of such tokens and countries where status of the token is undefined.

Jurisdiction of the token is **Republic of Seychelles** also known as offshore.

Developers plan to list their token on such exchanges as - HitBTC; Bitshares; YoBTC.

Developers do not care about status of the token and do not see any troubles to list their token on exchanges mentioned above. Also, Developers confirms that they don't relate status of SBL token to security. "Right now token SBL does not have security status"

Здравствуйте. У вас security token?

Да наш токен будет являться секьюрити, только в том случае, если подобное решение вынесет регулирующий орган (например sec). На данный момент, токен SBL не имеет такого статуса.

To pay dividends developers register offshore company which will be used to pay dividends. Russian company and offshore company will have loan agreement to transfer income from Russia to offshore and then to pay dividends to token holders.

Offshore company has been registered on 18 May 2017.

PATTON DYNAMICS LIMITED

Developers confirms that they do not buy offshore company and this company has been registered by them.

Russian company has been registered on 2 November 2017.

Team wants to rise 200k\$ on pre-ICO and 7.2m\$ on ICO

THE STRUCTURE OF THE INVESTMENT COSTS			
THE EXPENSE OBJECT	THE AMOUNT (\$)		
THE PURCHASE OF THE EQUIPMENT	5 000 000		
THE REPAIR WORKS IN THE PREMISES	1 167 000		
THE FLOATING ASSETS ESTABLISHMENT	333 000		
THE PRE-COMMISSIONING WORKS	500 000		
THE MARKETING EXPENSES (PRE-ICO)	200 000		
TOTAL	7 200 000		

Interesting, that team does not provide any documents about construction budget. They estimate "**The Repair Works In The Premises**" as 1167000\$ but do not pointed out why do they need such amount.

Исхожу из информации в WP.

Если вы пишите цифру 70 млн, то должно быть какое то обоснование этой суммы, расчёты и тп.

1:47:49 PM

No documents provided.

In the WP and other shared resources, I did not find any documents which allow me to understand why developers need 200k\$ on marketing. Also, did not find documents which describe equipment estimated in 5m\$.

Team demonstrates very polite communication in telegram and on forum bitcointalk. Team has nice and cute white paper which has nice pictures and design.

Conclusion.

Facts as:

- Really big authorized capital of the new LLC registered without visible justification
- Contract on intentions with equipment seller
- Nice designed white paper without detailed information about amount wanted
- Draft rent contracts
- Offshore company which registered 6 months before company in Russia
- Name of the "Bitcoin developer" in the brewer company
- Little-age domain of the main resource
- Big exchanges names mentioned
- Documents provided by the team do not put any **responsibility** on the team and do not say almost nothing

demonstrate me sweet in a beautiful wrapper and good preparation in the virtual world to show nice pictures and almost nothing in the real world. Team just has an idea and wants more than 7m\$ to realize the idea in the real world and just 5! month from December to May to start a **BEAR FACTORY**.
