

Summary: RV process is underway, and we are waiting for the release of the payments. We hear that the rv has been released in some countries. Paymasters have funds and are waiting for the release codes. Some reportedly already have the release codes. The back wall is the end of the fiscal year, which is the end of September. It is expected that Tiers 3 and 4 will be done by then. Tier 5, the general public, will not exchange until next fiscal year (October).

The Newsletter Update Skype room has now been limited to posts only from me, meaning these updates. So, if you have hesitated to go there because of difficulty in finding the updates, that problem should have been resolved. Posts are still in IDC in the evening. <https://join.skype.com/tJyMbfvwHJG6>

Please feel free to share these newsletters. They are a product of Global Genius Trust www.ggtrust.com . Thanks for those who send in materials for publication. You can find these newsletters in Intel Dinar Chronicles each evening, and at our Skype room at <https://join.skype.com/tJyMbfvwHJG6>

AD: For you folks that do not want to continue waiting for the RV/GCR and want to start earning money now, via investing your time and/or investing money now. I invite you to join our forum on www.wire.com titled: "Project Funding NOW". We have opportunities where you can potentially earn 33-200% yearly on your investment. Do not have funds to invest? You can help us find investors. My wire joel.ggtrust or email me joel@ggtrust.com or Skype: JASEGUROLA

Operation Disclosure: GCR/RV Intel Alert for September 20, 2018

RV/INTELLIGENCE ALERT - September 20, 2018

(Disclaimer: The following is an overview of the current situation based on intelligence leaks received from several sources which may or may not accurate. Other confirmed sources may also be included in this overview.)

The fate of all Western countries hinges on BRICS through control over the USD.

The USD is currently standing on thin ice, doomed to collapse without being replaced by an asset-backed currency.

All nations are prepared for either event, the collapse of the USD or the introduction to a new asset-backed currency (USN).

The bill to introduce the USN was already made (behind closed doors) and is currently sitting in limbo waiting to be voted on.

In order for the USN to be voted on, assets are required to back it.

These assets can only be supplied from China which originates from Zimbabwe. *[What???—dle]*

Zimbabwe cannot provide the assets required for the USN until the country's national debt is forgiven.

Zimbabwe's national debt can only be forgiven through the RV.

Worldwide redemption of 100T 2008 Zimbabwe (Bond) Notes is the key to Zimbabwe's freedom.

This worldwide redemption event (RV) will also cause an isolated jubilee which flood the world with wealthy humanitarians.

The RV will be the trigger toward a cascade of events leading up to GESARA.

TNT Call Report from Yesterday

Tony: Goooooooooooood Morning, TNT! Ray had some cleaning up to do at his house. We had to take care of what we had to take care of. Appreciate everybody and their prayers. His brother in law did have insurance. [House got taken by a hurricane.--dle]

No less than 10 articles out about currency, exchange rates and everything Iraq plans to do. Last week I said **banks looking at between Sept 15-22.** Our guys looking at Iraq putting out lower category notes, 500, 200, 100. Supposed to start on Monday, Tuesday and then next month.

Banks ready to go. Telling people to be in Reno on Monday. All predicated if they did the right thing on Saturday! Sure I said that. What they actually do is important. Iraq says a lot of stuff that never gets done. . .

Saturday they were to establish a GOI. They didn't do that. So far they have a speaker and two deputies. Today article says they are not going to vote till the 25th and another Oct 2nd. Where does that leave everything else? What about LC that were to come out Monday or Tues?

This is pushed out to we don't know where. We don't know because it's Iraq. I do know over the weekend some **people were called to Reno. Told to be there Monday . . . Tuesday and tomorrow. Told they wser ready to start.** Same thing banking system has been told. Told them everything was being finalized and it's coming. They are saying that is still the plan. We may get a surprise. We wait and see.

Here is the latest and greatest. Abadi is not going to be the PM . . . Abadi says he isn't going to run. Guess what? Abadi IS GOING to be the PM. US went and met with everyone over there and said this is the guy we need to accomplish what we need.

Articles out saying Abadi never said he wouldn't be a candidate and that he is the strongest candidate. Do want the person most capable of continuing what Abadi has started.

Maliki and group trying to start trouble - claiming Abadi made deals with the US. Still arguing. They still need another deputy . . . a PM. CBI has said they need stability. Did not say what stability was. Didn't say they need every position in the GOI to be filled. They have yet to define what stability is to them so we have to look at the pieces and put them together.

Will the countries back out? Do they wait 90 days and let something else happen? Maliki and Iran cause problems, rioting breakout or do they change their country forever? I know what sounds right to me; what they are trying to do. What banks are gearing up for over here.

The article that said the 25th said they had 7 days to name the PM. The 2nd of October doesn't do that. Not a lot being said yesterday or today. A bunch of the articles are repeats and over two years old.

Educating citizens once again and entire world. Requirements are things they have already accomplished where they can flip the switch when the GOI and country is stable. The country itself is never going to be stable. It's Iraq! Iran is always going to try and take control. Maliki will fight to the end. Until they make changes and see a better life. In order to do that they have to change the exchange rate . . . so everybody can see that better life. That is where we are today.

CURRENT WINDOW: Tony: The banks still think something is going to happen this month. Yesterday they were told to prepare to go today. They (Iraq) didn't vote today like they were supposed to.

The banks here have a window and time frame but it's based on what Iraq does. It's why I say watch what they do, not what they say. When they actually do it we put our plan into motion.

They could be dragging it out till October and after our elections. Economy is booming; market is up. A lot of things to happen this next month. Are there benefits for it to happen the first week of October? Absolutely! (Tony talked about how the budget at the end of the year has to be spent) That's why this time frame is a little "iffy." It affects not just our country.

The banks still think something is going to happen this month. I hope and pray they are right.

IRAQ: The tide has changed - the worm has turned - In spite of previous articles the latest news is Abadi will be the PM. (articles out the major candidates opposing Abadi have withdrawn their candidacy) Tony said Abadi is seen as the candidate that can carry through what he has already started.

- CBI waiting for stability - They have not defined what they mean by stability.

- Parliament: Did not complete the process last Saturday. Only elected a speaker and two deputies. Waiting for the deputy and then will name the largest bloc. **Tony: All we need is to see the vote - Abadi will be the nominee.** Kurdistan has named their deputy but has yet to vote on it.
- Federal Court: previously ruled last year on a definition for the largest bloc.
- Media: Financially educating the citizens once again. Politically the latest articles are often repeats and over two years old. Articles out now that are saying Abadi never said he wouldn't be a candidate and that he is the strongest candidate.

INTERNATIONAL:

- WTO is trying to change their rules of engagement
- Canada
- IMF waiting for GOI to be in place.
- Emerging Markets: **Tony: This GCR will be the driving force for their economies.**
- Currencies: Tony does not see the South Korean currency being in this first basket.

UNITED STATES: No information has come out of the meeting between POTUS and PM Abadi on Sept 13th.

- Banks: The banks still think something is going to happen this month. Say, they will not get out of this month without this happening based on the information they have. Tony cautioned, **"Iraq has not done what they said they would do."**
- Taxes: No update yet.
- 800 #'s will be posted here, on other Dinar sites and probably on banking web sites. Any valid 800# you can use.

EXCHANGING:

Q. - Have contact with wealth manager with HSBC, NYC. He/she shared **"the banks are waiting just as you are** to start foreign currency exchanges of some currencies you hold. . . Have heard rumors of start times . . .but nothing confirmed at this time. Banks said, "We will take our directive from the UST. They are in charge in this country, not the banks." Would you concur with that? **Tony: Absolutely! . . . that is not what they want the Iraq people to think - that they are going to do this when the US gives them permission. Iraq tried to do this multiple times over the years and each time they were stopped by the USA.**

Caller: question of how Generals64 group will handle exchange? Go to Reno? **Tony: General64 will do what he will do. He has paymasters that have been trained. A lot of them no need to even go to Reno. Because they are such large groups cannot do it all in one day, one week or all at one time. They are going to have to wait for their paymaster to get to them.**

Q. - I know President Obama did not want us to have this/to exchange. **Tony: It was not President Obama. It was people in his administration.**

Quantum Computing Expert Explains One Concept in 5 Levels of Difficulty | WIRED

*This is a very interesting 20 minute video from a scientist in quantum computing at IBM as she explains quantum computing at 5 different levels, from a 3rd grader to a professional quantum physicist. I think that the whole idea of explaining things in this way is very interesting. I also think that this demonstrates **the vast chasm between the state of the art of quantum computers created by humans to the expected Quantum Financial System** we keep being told about.*
