

Run HijackThis As Administrator

I tried to download a modpack using the twitch launcher (modpack on 1.12.2), it wrestle and the minecraft launcher took like 10min to download 15mb, then a crash appeared saying that my connection was too sluggish, so then i uninstalled the launcher and the ".minecraft" folder from my laptop, i tried to install the minecraft another time, it started like 2 sec as a quick download after which wrestle once more on 5, 6kb per/s (additionally my web is 240/20) now i am unable to use the minecraft vanilla and even much less the modpack itself, does anyone is having the identical problem and know how to fix it??

downloadpc

Obtain: <https://sourceforge.internet/tasks/hjt/information/2.0.5%20beta/HijackThis.exe/obtain>
Run HijackThis as Administrator, choose "I accept", then "Do a system scan and save a log file". GAMING NEWS After a while a text file will open. Copy every thing, put the log on <https://paste.ubuntu.com> and provides us the link.

right here is the hyperlink <https://paste.ubuntu.com/p/ZcnS4Mg6DN/>

To save lots of time of typing all the problems with your HJT log, i am going to just go away the reply the bots reply to its evaluation of the log

Discovered: Hamachi(VPN, Bad, Take away, Conflicts with internet itself), Overwolf(Old variations crash, Repair: Update Overwolf), Discord(Flip off Discord Overlay, else disable Discord), Parsec(Recreation streaming, VPN, Overlay), Radmin VPN(VPN), VPN(Any VPN)

many vpn's are blocked on Mojangs methods, and tbh having multiple operating is pointless overkill
