Zolan signal (since 2018) :

Crypto signals for trade .

https://twitter.com/zolan_signal

<https://t.me/zolansignal>

<https://instagram.com/zolansignal/>

purpose :

crypto currency is money for the future . zolan group wants to be updated with the world developing . all institutions on the world need crypto currency for their works and services , like pay personnel wage , sell products and services , and other financial affairs . all of these subjects will be done easily by crypto currency. It seems that all the people and institutions worldwide accepted crypto currency instead of fiat as money and it is obvious on bitcoin price jump on last year .

so ZOLAN VALVE company decided to have own crypto currency to be updated with time .

the other purpose of zolan token is to get profit for zolan signal group members . zolan signal group has been a successful team on last 3 years and have got high profits by trading on crypto by admin signals . zolan group members buy a signal altogether after admin's call and sell the signal with high profit some days or some weeks later . but after btc price jump so many new member can not buy enough btc that can buy signals and get profit by trading .

so ZOLAN SIGNAL group decided to have own crypto currency to make fund for its new members

we made this by zolan token airdrop . members try to make the group bigger by advertising for zolan and received free zolan tokens . after that zolan signal group with members who have enough fund on market are buying zolan tokens on exchanges to push up the price of token that the other members who got free zolan tokens could have enough fund for trading . really by zolan token we made fund for new members and we are developing a new job in the society as the name of trade . yes trade has been a new job on last years and zolan signal group is developing it and zolan token making fund for new traders . specially in the time of corona virus trade could help people have a job , zolan token makes fund for members , and zolan signal make income for traders . in zolan signal group all the members worldwide help each other to have profit , to have money , to have good life.

ZOLAN also works on tourism field on a famous region in IRAN as the name of ABR JUNGLE . so many tourists every year visit this place . for paying zolan group services in guest houses in this place tourists from other countries can reserve place by paying zolan token easily .

So ZOLAN ABR decided to have its own crypto currency to make the work easy .
