

Evil... creates a world of shadows - shadow play - shadow government. It lives by the lie.

"The Big Lie," once thought to be the exclusive purview of the Nazis, has become canonized in our form of government. And it is growing more perverse – more insidious. Like the Nazis before the fall of the Third Reich, we are a nation wallowing in the murky darkness of our own psychosis.

I can think of no contemporary American family more twisted and evil than the Bush dynasty.

The Bush family's rapacious greed and depravity can trace its lineage to New England's Pierce family. Both George Herbert Walker Bush and his wife Barbara Pierce (of Merrill, Lynch, Pierce, Fenner and Smith), as was President Franklin Pierce, are descended from this same family. Originally the powerful Percy family, they changed their name to Pierce and quickly emigrated to America when Thomas Percy's involvement in the Gun Powder Plot to assassinate King James I was revealed.[\[*\]](#)

Bush's membership in the shadowy Yale secret society of Skull and Bones (S&B) has likewise not been widely reported. S&B is made up of members recruited exclusively from the ranks of the wealthy Eastern Establishment.[\[*\]](#) As Hoover Institute professor Antony Sutton writes in *America's Secret Establishment: An Introduction to the Order of Skull and Bones*:

"Those on the inside know it as The Order. Others have known it for more than 150 years as Chapter 322 of a German secret society. More formally for legal purposes, The Order was incorporated as The Russell Trust in 1856. It was also known as the Brotherhood of Death...."[\[1\]](#)

Many historians claim that S&B sprung up as a direct extension of America's oldest Greek-letter college secret society, Phi Beta Kappa. As Sutton writes:

"The Order is not just another campus Greek letter fraternal society with passwords and handgrips, common to most campuses.... Chapter 322 is a secret society whose members are sworn to silence. It only exists on the Yale campus. It has rules. It has ceremonial rites. It is not at all happy with prying probing citizens.... Above all the Order is powerful, unbelievably powerful...."[\[2\]](#)

S&B members occupy key positions in commerce, media, diplomacy, education, espionage, finance, law and politics – having a profound impact on world events. As Sutton adds:

"Among academic associations, the American Historical Association, the American Economic Association, the American Chemical Society and the American Psychological Association were all started by members of the Order or persons close to the Order.... These are key associations for the conditioning of society.... The phenomenon of The Order as the first on the scene is found especially among foundations."[\[3\]](#)

Regarding the Order's influence on historical events as portrayed by the media, Sutton notes that...

"...During the past one hundred years any theory of history or historical evidence that falls outside a pattern established by the American Historical Association and the major foundations with their grant making power has been attacked or rejected — not on the basis of any evidence presented, but on the basis of the acceptability of the argument of the so-called Eastern Liberal Establishment and its official historical line. There is an Establishment history, an official history, which dominates history textbooks, trade publishing, the media and library shelves. The official line always assumes that events such as wars, revolutions, scandals, assassinations are more or less random unconnected events. By definition events can never be the result of a conspiracy. They can never result from premeditated planned group action. An excellent example is the Kennedy assassination when, within 9 hours of the Dallas tragedy, TV networks announced the shooting was not a conspiracy regardless of the fact that a negative proposition can never be proven and that the investigation had barely begun."[\[4\]](#)

The American chapter of the German Order was founded in 1833 at Yale University, established by General William Huntington Russell and Alphonso Taft — father of President and U.S. Supreme Court Justice William Taft. It was during the Taft presidency that the bills which forever altered the Constitution were passed into law. These included the 17th Amendment, calling for the direct election of senators, guaranteeing that elections could be purchased by big money interests; and the Income Tax and Federal Reserve Act (16th Amendment). The Act was quietly pushed through Congress by Senator Nelson Aldridge — maternal grandfather of Trilateral Commission founder David Rockefeller — in the days immediately before Christmas, assuring that most lawmakers, who were home for the holidays, would not be available to vote.[\[*\]](#)

During a break-in by a rival Yale society in 1876 into the S&B "Tomb," they found a small room, with an "always-burning lamp" and "a dilapidated human skull." Upstairs they found a lodge room with its walls covered in black velvet, a table with skull and crossbones, and the "sanctum sanctorum" — room number 322 — "furnished in red velvet" and on the wall a star with a finger pointing to it.

They also found "an old engraving representing an open burial vault, in which on a stone slab, rest four human skulls, grouped around a fool's-cap and bells, an open book, several mathematical instruments, a beggar's scrip, and a royal crown. On the arched wall above the vault are the explanatory words, in Roman letters, 'We War Der Thor, Wer Weiser, We Bettler Oder Kaiser?' and below the vault is engraved, in German characters, the sentence; 'Ob Arm, Ob Reich, im Tode gleich.'" "Who was the fool, who the wise man, beggar or king? Whether poor or rich, all's the same in death." This closely resembles the initiation into the Degree of Regent for the Bavarian Illuminati. Some researchers assert that Phi Beta Kappa is simply the "Bavarian Illuminati... spread to America."[\[5\]](#)

S&B was also the recruiting grounds for the Russell Trust Company, which managed S&B's treasury. Founded in 1824, Russell Trust became the dominant opium trafficking syndicate in the U.S.[\[*\]](#) Russell Trust merged with the number one US trader, J&T.H. Perkins in 1829. By the mid-1830s the opium trade had become "the largest commerce of its time in any single commodity, anywhere in the world."[\[6\]](#)

Russell partner Warren Delano, Jr. — Chief of Russell Trust operations in Canton, China — was grandfather to President Franklin Delano Roosevelt, a Bush cousin. Other Russell partners include John Cleve Green, whose opium fortunes financed Princeton University, Abiel Abbott Low, whose opium money financed the construction of Columbia University, Joseph Coolidge, whose son organized the United Fruit Company (later under the ownership of the Rockefellers, and which provide the impetus for the CIA's replacement of the democratically elected government of Guatemala with a brutal military dictatorship), and his grandson, Archibald Cary Coolidge, who was a founding executive officer of the Council On Foreign Relations (CFR).

The black flag with the white skull and crossbones, which was the corporate flag gracing all Russell Trust ships, became the emblem of S&B — an emblem that even to this day it symbolizes piracy.

Antony Sutton's scholarly works on this secret society, *The Order* and *How The Order Creates War and Revolution*, reveal that half of the board of directors of J.P. Morgan and Company — who profited handsomely from the bloody carnage of World War I — were S&B graduates. As Sutton notes:

“College textbooks present war and revolution as more or less accidental results of conflicting forces.... The decay of political negotiation into physical conflict comes about, according to these books, after valiant efforts to avoid war. Unfortunately, this is nonsense. War is always a deliberate creative act by individuals....”[\[7\]](#)

Bush and the Nazis

“The real menace of our republic is this invisible government which like a giant octopus sprawls its slimy length over city, state and nation. Like the octopus of real life, it operates under cover of a self created screen.... At the head of this octopus are the Rockefeller Standard Oil interests and a small group of powerful banking houses generally referred to as international bankers. The little coterie of powerful international bankers virtually run the United States government for their own selfish purposes. They practically control both political parties.” - New York City Mayor John F. Hylan, 1922

Eventually, Brown Brothers Harriman—the largest private investment bank in America at the time—came to be dominated by S&B members. George Bush’s grandfather, George Herbert Walker, served as the bank’s President. His father, Prescott, served as the bank’s Vice President.[\[8*\]](#)

Brown Brothers Harriman was helped to ascension by the powerful Warburg “Jewish” banking monopoly—one of the principle controlling interests behind the German conglomerate I.G. Farben, which, ironically, provided not only the gas, but much of the funds used to effect Hitler’s “final solution.” Brown Brothers had funded American slave plantations during the Civil War, and former Brown Brothers partner, Bank of England Governor Montagu Collet Norman, was known as the most avid supporter of Hitler within British ruling circles. Brown Brothers-Harriman would become the largest and most politically influential private banking house in the United States.[\[9\]](#)

The elder Bush was also director of the Holland-American Trading Corporation and the Seamless Steel Equipment Corporation—both Nazi front companies. Like father like son, George Herbert Walker Bush would later go on to form similar business alliances with Iraqi dictator Saddam Hussein, taking in personal oil kickbacks, and arming that country with conventional, biological and chemical weapons, both in violation of his own *Arms Control and Armaments Amendments Act*, and as a prelude to a war which he would instigate and precipitate.

The Warburgs and the Sulzbergers, owners of the *New York Times*, used various committees and religious organizations to protect the Harriman-Bush deals with Mussolini and Hitler. Although the government would later seize several of the Bush/Harriman/Nazi assets—most importantly the Thyssen family-owned Union Bank, which played one of the largest roles in financing Hitler—American entrepreneurs such as Bush would be left unscathed.

Bush was Union’s Director.

As Webster Griffin Tarpley and Anton Chaitkin note in *George Bush: The Unauthorized Biography*:

“The 1942 U.S. government investigative report said that Bush’s Nazi-front bank was an interlocking concern with the Vereinigte Stahlwerke (United Steel Works Corporation or “German Steel Trust”) led by Fritz Thyssen and his two brothers.... Germany’s largest industrial corporation, [it] was organized in 1926 by Wall Street banker Clarence Dillon. Dillon was the old comrade of Prescott Bush’s father Sam Bush from the “Merchants of Death” bureau in World War I.”[\[*\]](#)

The authors write that George Bush’s maternal grandfather, George Herbert Walker, founded the banking and investment firm of G. H. Walker and Company. “Walker was one of Hitler’s most powerful financial supporters in the United States. The relationship went all the way back to 1924, when Fritz Thyssen, the German industrialist, was financing Hitler’s infant Nazi party.”[\[10\]](#)

The link between Harriman and Thyssen came through Walker’s Union Banking Corporation, located in Averill Harriman’s offices at 39 Broadway in New York.

“According to our sources,” write Tarpley and Chaitkin, “Union Banking became an out-and-out Nazi money-laundering machine....”

Walker's American Shipping & Commerce became the holding company for the North American operations of the Hamburg-Amerika Line, a cover for I.G. Farben's Nazi espionage unit.

"In an elaborate corporate paper trail, Harriman's stock in American Shipping & Commerce was controlled by yet another holding company, the Harriman Fifteen Corporation, run out of Walker's office. The directors of this company were Averill Harriman, Bert Walker, and Prescott Bush...." [11]

Another example of the perverse interlocking nature of the Bush/Harriman-Brown interests was the Consolidated Silesian Steel Corporation of Poland, two thirds of the stock of which was owned by Friedrich Flick, a leading German industrialist, and Bush/Harriman-Brown. Given the fact that most of the company's output was being directed to Germany's war machine at the time, the Polish government decided that the Nazi and American stockholders should pay their fair share of taxes. The stockholders didn't agree, and responded with a lockout. Fortunately the crisis was solved when Nazi tanks invaded Poland in September of 1939, rescuing their investment, which would now be aided with the introduction of slave labor. [12]

Baron Kurt von Schroder, of the Schroder banking family, was co-director of the Thyssen-Huette foundry along with Johann Groeninger, Prescott Bush's New York bank partner. Schroder, who also had the personal blessings of the Rockefellers, was Hitler's banker.

"The difference is academic. Ford wants the aggressive, bureaucratically savvy Rumsfeld to help him regain control over a White House that is, in the words of author Barry Werth, "riven with disunity, disorganization, and bad blood." Rumsfeld agrees, and names former Wyoming Congressman Dick Cheney as his deputy (who makes himself valuable by initially doing the lowest forms of bureaucratic scutwork). Rumsfeld and Cheney will eventually wield almost Nixonian power in Ford's White House, successfully blocking the "in-house liberal," Vice President Rockefeller, from exerting any real influence, and hobbling Henry Kissinger's almost-limitless influence.

Blocking of Rockefeller and Kissinger for Ideological and Political Reasons - Rumsfeld begins his in-house assault in classic fashion: trying to cause tension between Kissinger and White House officials by snitching on Kissinger to any White House official who will listen. Kissinger eventually tells Ford: "Don't listen to [Rumsfeld], Mr. President. He's running for president in 1980." Rumsfeld and Cheney do their best to open the White House to hardline defense hawks and the even more hardline neoconservatives led by Senator Henry "Scoop" Jackson (D-WA) and Jackson's aide, Richard Perle. (Though Rumsfeld and Cheney are not considered neoconservatives in a strict sense, their aims are almost identical—see [June 4-5, 1974](#)). Kissinger's efforts to win a negotiated peace between Israel and Palestine in the Middle East are held in contempt by Rumsfeld, Cheney, and the neoconservatives; using Ford's press secretary Ron Nessen as a conduit, Rumsfeld and Cheney leak information about the negotiations to the press, helping to cripple the entire peace process. Rumsfeld and Cheney have larger personal plans as well: they want to secure the White House for Rumsfeld, perhaps as early as 1976, but certainly by 1980."

"The documented example of Iran-Contra allows me to explain what I am saying about the users of the COG network, and also what I am not saying. To begin with, I am *not* saying that a single "Secret Team" has for decades been using the COG network to manipulate the US Government from outside it. There is no evidence to suggest that North's actions in Iran-Contra were known to any of his superiors other than CIA chief William Casey and probably George Bush. The point is that a very small group had access to a high-level secret network outside government review, in order to implement a program in opposition to government policy. They succumbed to the temptation to use this secure network that had been designed for other purposes. I have argued elsewhere that this secure network was used again on 9/11, to implement key orders for which the 9/11 Commission could find no records. (6) Whether it was also used for illicit purposes is not known.

It is certain that the COG emergency network program survived North's demise, and continued to be secretly developed for decades, at a cost of billions, and overseen by a team including Dick Cheney and Donald Rumsfeld. It is relevant that the two men's presence on the committee spanned three administrations – those of Reagan, Bush I, and Clinton — even though at one point under Clinton neither man held a position inside the U.S. government. Such continuity was essential for a group so secret that few records existed of its activities. And on 9/11 COG plans were officially implemented for the first time, by Vice President Cheney and Defense Secretary Rumsfeld, the two men who had planned them for so many years. (7)

Whether or not they knew about Iran-Contra, Cheney and Rumsfeld were on the COG planning committee at the time of Iran-Contra. There is no such obvious link between COG planning and Watergate, but the involvement of COG personnel in Watergate is nonetheless striking. James McCord, one of the Watergate burglars, was a member of a small Air Force Reserve

unit in Washington attached to the Office of Emergency Preparedness (OEP) that was assigned “to draw up lists of radicals and to develop contingency plans for censorship of the news media and U.S. mail in time of war.”⁽⁸⁾ His unit was part of the Wartime Information Security Program (WISP), which had responsibility for activating “contingency plans for imposing censorship on the press, the mails and all telecommunications (including government communications) [and] preventive detention of civilian ‘security risks,’ who would be placed in military ‘camps.’”⁽⁹⁾ In addition, John Dean, perhaps the central Watergate figure, had overseen secret COG activities when serving as the associate deputy attorney general.⁽¹⁰⁾

In the case of the JFK assassination, I wish to focus on two men who functioned as part of the communications network of the Office of Emergency Planning (OEP), the agency renamed in 1968 as the Office of Emergency Preparedness (to which McCord was attached), and renamed again in 1982 as the National Program Office (for which Oliver North was the action officer).⁽¹¹⁾

These two men (there are others) are Winston Lawson, the Secret Service advance man who from the lead car of the motorcade was in charge of the Secret Service radio channels operating in the motorcade; and Jack Crichton, the army intelligence reserve officer who with Deputy Dallas Police Chief George Lumpkin selected the Russian interpreter for Marina Oswald’s first (and falsified) FBI interview.⁽¹²⁾

Lawson has drawn the critical attention of JFK researchers, both for dubious actions he took before and during the assassination, and also for false statements he made after it (some of them under oath). For example, Lawson reported after the assassination that motorcycles were deployed on “the right and left flanks of the President’s car” (17 WH 605). On the morning of November 22, however, the orders had been changed (3 WH 244), so that the motorcycles rode instead, as Lawson himself testified to the Warren Commission, “just back of the President’s car” (4 WH 338; cf. 21 WH 768-70). Captain Lawrence of the Dallas Police testified that that the proposed side escorts were redeployed to the rear on Lawson’s own instructions (7 WH 580-81; cf. 18 WH 809, 21 WH 571). This would appear to have left the President more vulnerable to a possible crossfire.”

<https://whowhatwhy.org/2014/10/05/the-hidden-government-group-linking-jfk-watergate-iran-contra-and-911/>

“The authoritative command system appeared to be below ground in the PEOC (Presidential Emergency Operations Center) **where Dick Cheney was leading the activities**. The TSD document released by FOIA shows that when Assistant Division Chief Spriggs arrived in the PEOC, at 9:30 am, Cheney and Rice were already there along with ten other “Presidential and Vice Presidential staff.” Carl Truscott was the lead Secret Service agent in the PEOC, the one who was in coordination with Garabito, and the one who was most closely coordinating with Dick Cheney.”
