100mgs/day of the oral version is a safe estimate for reasonable gains& for women, you could get away with less; perhaps 25mgs/day. Even though the acetate ester has a 2-3 day active life, your liver will do some damage to oral primo, so every day dosing will still be necessary. During the test you will be given an injection of a contrast agent (an X-ray 'dye'), which highlights your kidneys and bladder making them stand out much better than on an ordinary X-ray image.
