Not easy to clean the water stains and also easy have the dirt and hazy on the surface for without Nanotechnology Glass.

Using the Nanotechnology Glass easily clean the water stains and the shower room will more integrity and be the best investment for customer.

Nanotechnology glass surface modification enhances the subtracts surface without changing its properties by exhibiting hydrophobic effect amphiphobic oleophobic, hydrophobic angle (water contact angle) of about 120 degrees, surface smoothness, water droplets roll easily, quickly fall without leaving water stains.

The products possess superior adhesion and friction control performance for high-end bathroom products can be more than 5 years warranty; substrate surface has very low, such that cleaning of the substrate surface can be completed by normal water erosion or a wet rag.
