BEP-20 Audit

Performed at block **DRAFT**

PERFORMED BY DESSERT FINANCE

FOR CONTRACT ADDRESS: 0xb3fa62eD37e885e3F6b98F1Bf9EAa724BB9afF39

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Website Part 1 – Overview

www.dogebtc.finance

Above images are actual snapshots of the current live website of the project.

Website was registered on 07/15/2021, registration expires 07/15/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✗ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

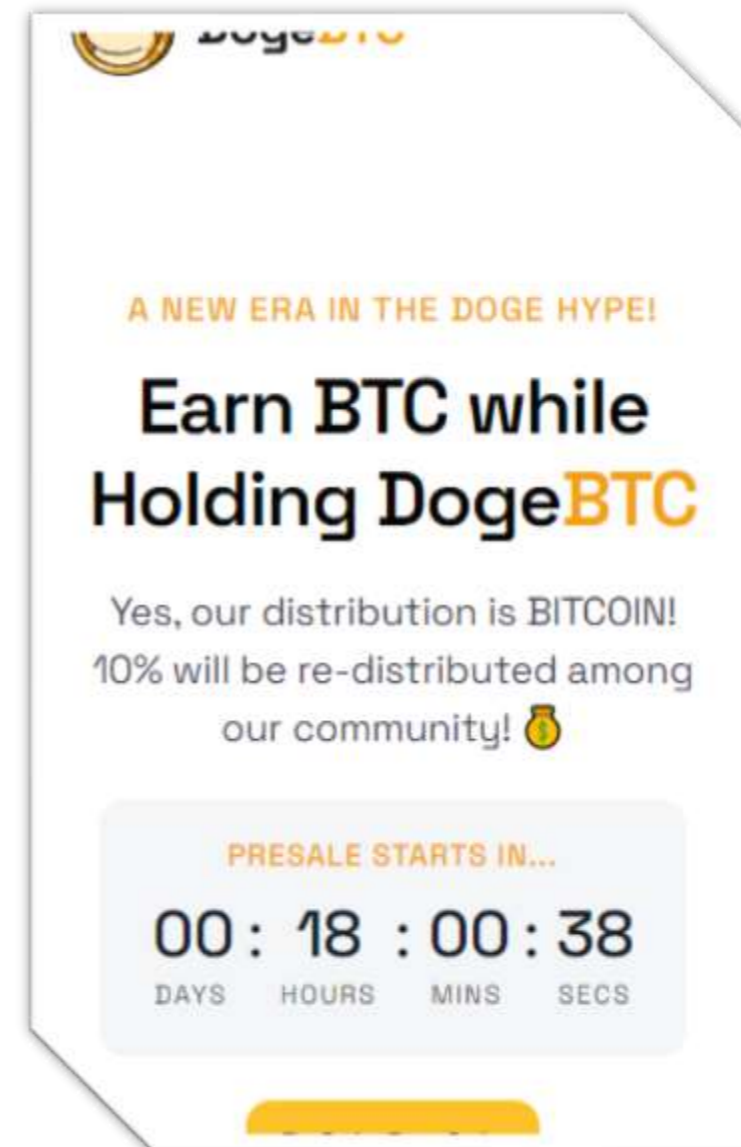

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

Some JavaScript errors were found. No issues with loading elements, code, or stylesheets.

SPDX-License-Identifier: MIT

pragma solidity ^0.8.0;

// Provide information about the current execution context, including the
// sender of the transaction and its data. While these are generally available
// via msg.sender and msg.data, they should not be accessed in such a direct
// manner, since when dealing with UUPS-style transactions, the account sending the
// msg for execution may not be the actual sender (as far as an application
// is concerned).
//
// This contract is only required for intermediate, library-like contracts.
abstract contract Context {
    function _msgSender() internal view virtual returns (address payable) {
        return payable(msg.sender);
    }

    function _msgData() internal view virtual returns (bytes memory) {
        this; // silence state mutability warning without generating bytecode - see https://github.com/ethereum/solidity/issues/2691
        return msg.data;
    }
}

// Contract module which provides a basic access control mechanism, where
// there is an account (an owner) that can be granted exclusive access to
// specific functions.
//
// By default, the owner account will be the one that deploys the contract. This
// can later be changed with {transferOwnership}.
//
// This module is used through inheritance. It will make available the modifier
// 'onlyOwner', which can be applied to your functions to restrict their use to
// the owner.
abstract contract Ownable is Context {
    address private _owner;

    event OwnershipTransferred(address indexed prevOwner, address indexed newOwner);

    //
    // @dev Initializes the contract setting the deployer as the initial owner.
    //
    constructor () {
        address msgSender = _msgSender();
        _owner = msgSender;
        emit OwnershipTransferred(address(0), msgSender);
    }
}
```

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Correct Token Standards Implementation
- ✓ Timestamp Dependency for Randomness
- ✓ Unexposed Private Transfer Function
- ✓ Transaction-Ordering Dependency

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

Social Media

We were able to locate a variety of Social Media networks for the project including Twitter, Telegram and Reddit. All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Reddit](#)

✓ **At least 3 social media networks were found.**

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, and Reddit. All social media channels had a healthy amount of activity.

It is important to note that there is an 15% tax on EVERY transaction including buys and sells. 10% is converted to BTCB and distributed to the holders, and 5% is sent back to the team for marketing. Please also note to receive your portion of the 10% distribution, a minimum of 200K tokens must be held. If you have less than 200K tokens you will not receive any portion of the distribution.

Dessert Finance appreciates projects that self identify as hypecoins without the need to solve a greater purpose as long as it is clearly stated as is the case with DogeBTC.

Suggestions for Improvement

1. Fix JavaScript errors on the website
2. Update domain registration to 3+ years

Top Token Holders

The entire supply was in two wallet at the time of audit. As this project has not launched yet, we expect this to change very quickly. Please visit the link below to view the most up-to-date list of holders on BSCScan.

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We are unable to find any information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

Potential Signs of Risk

1 YEAR DOMAIN REGISTRATION

PROJECT HAS COMMON USE-CASE
(REFLECT TOKEN)

The above listed are the top 2 risk indicators of the project. These are by no means assigning the project as a risky project. Every project will have the top risk indicators posted. It is crucial to note that some may be more important than others.

Potential Signs of Confidence

1

TEAM HAS BEEN VERY
RESPONSIVE IN
ADDRESSING QUESTIONS

2

TRANSPARENT FEE STRUCTURE

3

CONDUCTING AUDIT
PRE-LAUNCH

4

SELF IDENTIFYING
HYPECOIN

5

SSL CERTIFICATE WAS
FOUND AND VALID

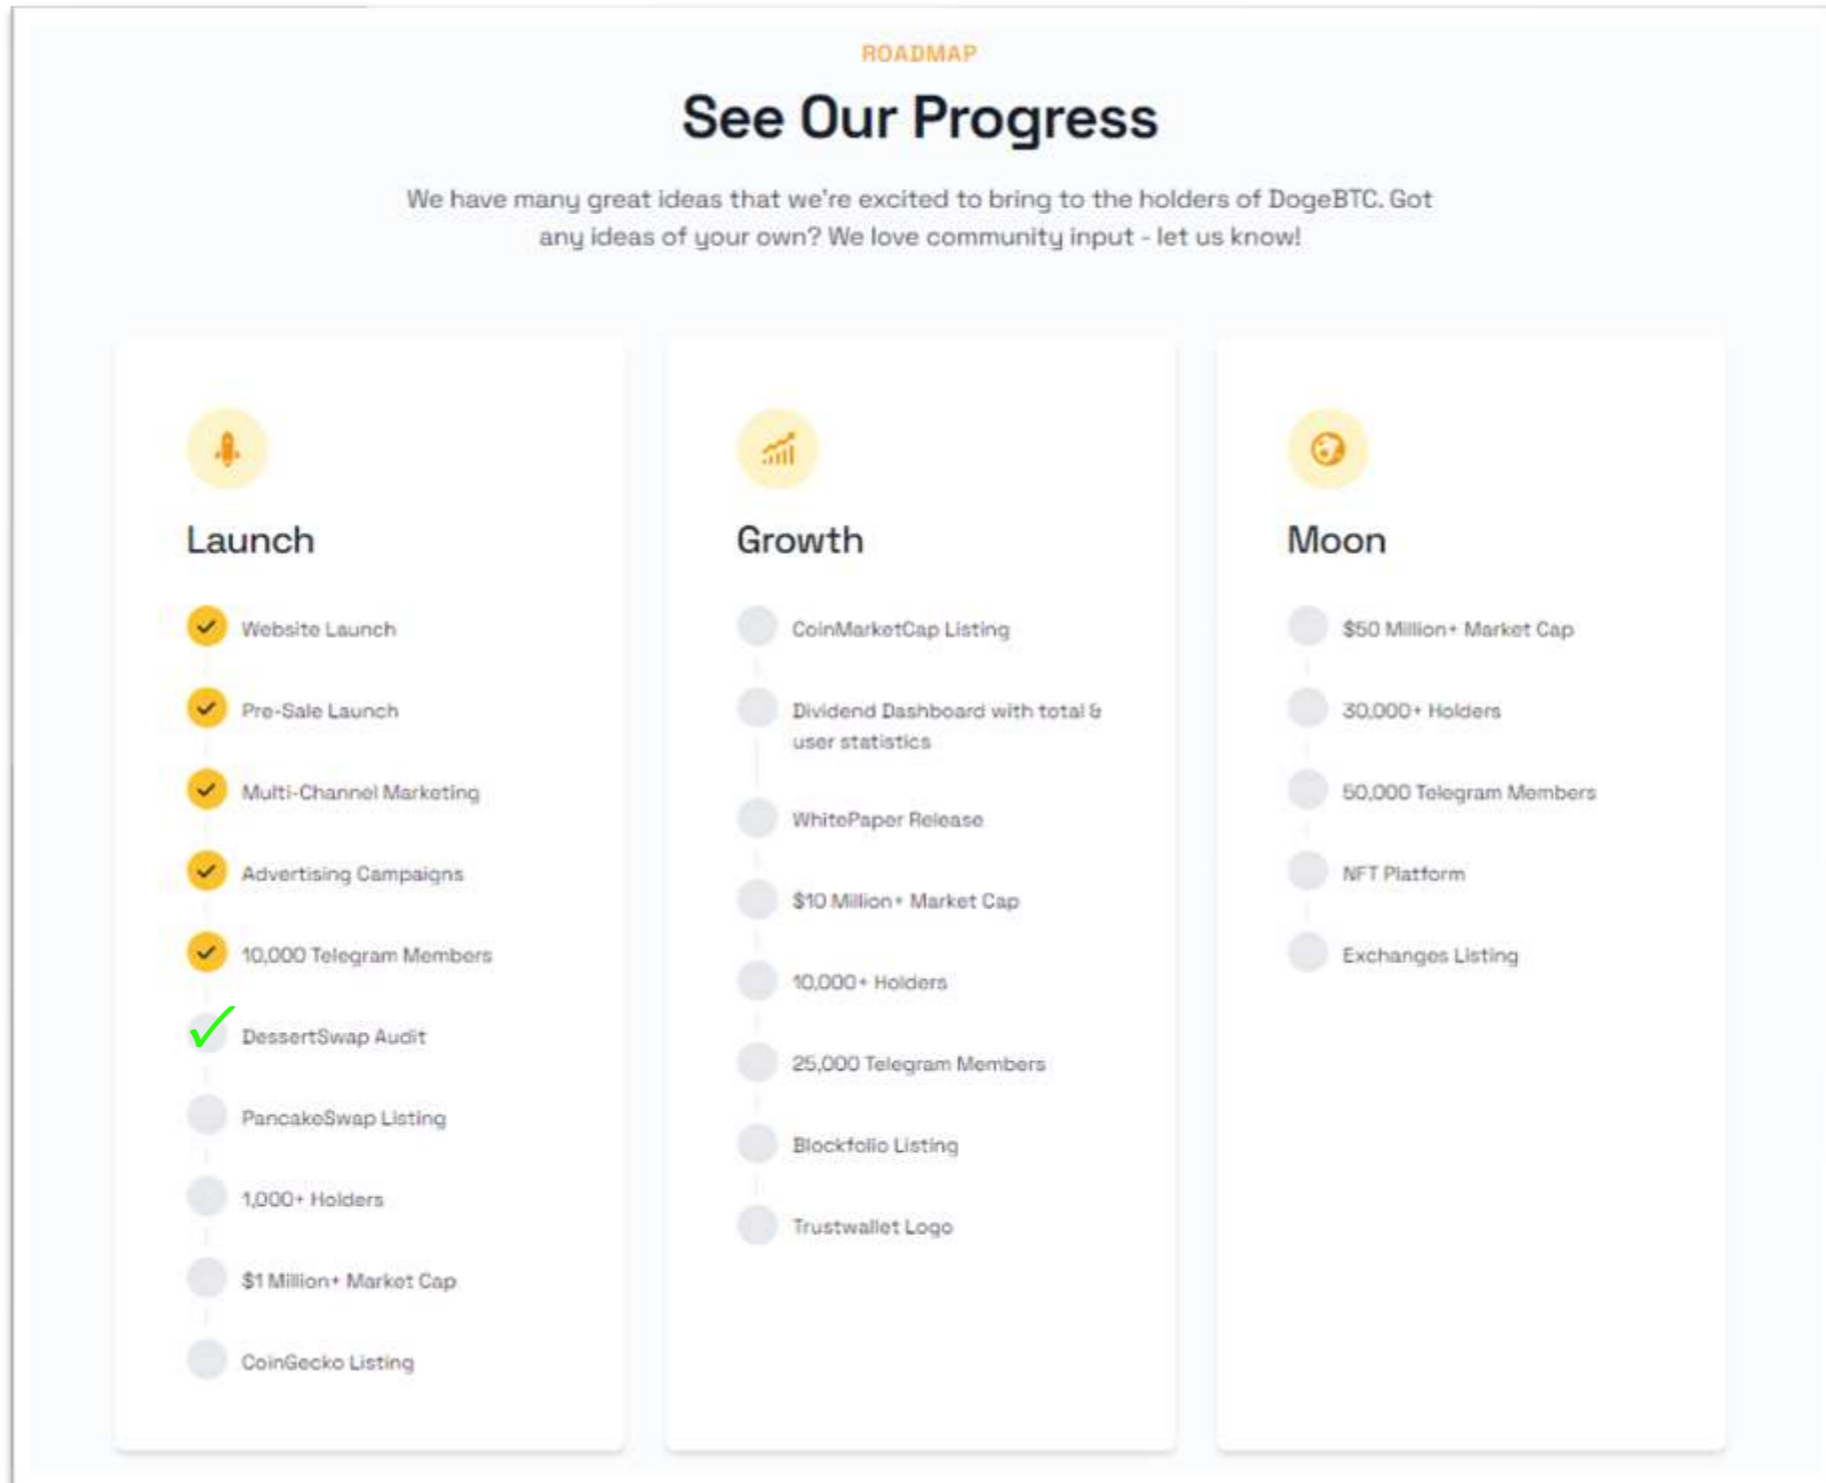

6

ACTIVE SOCIAL MEDIA PRESENCE

The above listed are the top 6 confidence indicators of the project. These are by no means assigning the project as a confident project. Every project will have the top 6 confidence indicators posted. It is crucial to note that some may be more important than others.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You

DESSERT FINANCE PROJECT AUDIT HAS BEEN COMPLETED FOR DOGEBTC (DOGEBTC). 1 DSRT HAS BEEN SENT TO AUDITED PROJECT'S CONTRACT ADDRESS FOR VERIFICATION OF THIS AUDIT AT BLOCK NUMBER: **DRAFT**
