

One KYC for all needs: Welcome aboard **KYC.CRYPTO!**

Say goodbye to costly and time consuming KYC services, and help put an end to scams and money laundering. The globally available KYC Sharing platform allows users to save their KYC information and share it with any participating crypto exchange or digital payment service in the world. It's 100% decentralized, secure and all information remains strictly confidential.

KYC Service for governments

Government agencies, for example in Germany, can request for access to our database and use it just like any partner to check and validate KYC clearances as per their requirements.

Using KYC.Crypto is easy:

Complete the KYC

Share with partner

Partner verification

Confirmation

Our Solution - All Exchanges at one place KYC regulated

Government control through Country and Area specific KYC access

No coin transfers allowed without active KYC ("No money laundering")

100% decentralized KYC sharing

KYC data of all users securely stored on the blockchain with IPFS

Decentralized Wallet transitions tracking

For Partners: On-boarding process

Complete your KYC successfully at the portal

Share your KYC with KYC.Crypto

Send an email with your KYC email address to: support@kyc-crypto.com

After receiving confirmation, fill out the Google form

Register in the Partner Dashboard (with KYC email) at: <https://partner.kyc-crypto.com>

Install the API in your portal

Start validating your users' database for KYC clearance!

For Users

Save all personal KYC data

Upload a selfie with handwritten note with text "KYC.Crypto" and the current date

Upload passport/driving license/ID card based on country

Confirmation or Decline

Start sharing your decentralized saved KYC
