

**A Texas couple was trapped in this burning vehicle due to dangerous repairs.
Its roof was glued on instead of welded due to insurance corner cutting.**

SAFE REPAIRS SAVE LIVES

There is a safety crisis in our state that threatens every Texan.

Many insurance companies are dictating unsafe auto repairs in pursuit of profit. Because of pressure from the insurance industry, manufacturer safety procedures are being ignored and inferior parts are being used in major repairs.

Shortcuts cost lives.

We need immediate changes to our insurance laws to protect the public from this safety crisis. HB 1348 by Rep. Travis Clardy would protect us by **ensuring quality parts are used to make quality repairs in the quality shop of your choice.**
