

BABY  
SQUID  
GAME

WHITEPAPER

# BABY SQUID GAME

On our platform we will deliver a reliable, transparent and decentralized solution in which both betting and gaming lovers and people looking for a place to invest their high-risk funds may participate, or simply entertain themselves by investing in the token and receiving a cut of the profits.

# BABY SQUID GAME

We have detected a huge problem in different areas of gambling. One, everything has been built to extract as much money from you as possible. There is no real enjoyment in the monotonous games on offer currently. Which we will face with a simple solution. By creating new and innovative variations on the current gambling games you know we can provide a new experience and capture the imagination of the player. It is not just about winning that bet but experiencing these new and innovative games for the first time.

# BABY SQUID GAME

Nowadays betting platforms are using cryptocurrency, but they are still working on the same basis betting has been working for centuries, where the casino holds your funds and may decide to not pay out your winnings. At Baby Squid Game we change that philosophy, all the pay-out systems are automated. There is no middleman in processing your pay-outs. We also offer the solution of anonymity. Why should you have your personal information being tracked?

# BABY SQUID GAME

Our mission is to produce a Decentralized casino DAPP where people can play games such as blackjack, ludo, craps, roulette and dice. As 'plain and simple' that anyone with a limited understanding of decentralized finance can join. We want to bring back the fun by releasing new and innovative ways to gamble. Player duels, whether it be with dice or by more traditional methods of playing a skill-based game.

# BABY SQUID GAME

\$SQUIDS was created with the idea that a crypto project should be both fun and rewarding. The gambling market in 2021 was an astonishing \$34.15 billion, up from \$29.98 billion in 2020 and 19% up from 2019. We believe that by establishing a foot in the door as an alternative from your generic casinos you are familiar with, we can bridge the gap between gaming and gambling and bring in a new type of clientele.

# BABY SQUID GAME

**\$SQUIDS** goal is to become a mega player in this space. Holders and players can both benefit from our platform. Holders benefit with rewards from the tokenomics in the form of dividend payments made on cashing in and out of the casino. If you don't fancy the gambling element, holders will receive shares of the profits from the revenue generated by the casino. Airdropping our holders weekly with a cut of the profits. Being a part of an ever-growing industry such as the gambling blockchain space will provide a beneficial passive investment with higher returns than you would ever find in the Fiat space.

# BABY SQUID GAME

We will also be releasing seasonal collections of our Baby Squid NFT's. These will be available for purchase and for participation in playing our casino games. As well as given as incentives for our community. Our NFT's will be our collection of baby squids in all their different forms and player numbers. We plan on releasing 456 players for collection 1.

# BABY SQUID GAME

With plans on expanding back through the years giving us the opportunity to make some interesting collections. (Think the 1980's or back to the future 2077) What's more you will receive rewards for these NFT's so it will be worth holding them...

The tokenomics are sweet and simple, 12% tax on buys and sells with the majority going in the rewards pool for the holders. A 2% burn is implemented on every buy and sell creating a huge and fast burn. 3% goes to marketing to push this campaign into the outer hemisphere.
