Why not improve your shower enclosure with sandblasting, patterns or in tinted glass.

Commonly, an angled inline panel may be created to go either side of a door. There might be some exceptions so you are welcome to ask about the feasibility of your concept. Your design should as a result incorporate a door with a rectangular shape. It is of paramount significance that your vertical measurements are from the prime of the tray, just after all, this is exactly where the door and/or panel will sit.

Bespoke Bathroom Products

No matter if an enclosure is framed or frameless will also factor into whether or not the glass wants to be thicker. A frame presents strength and assistance to thinner glass whereas a frameless panel relies entirely on the thickness of the glass for strength. There are several old wives tales about how thick glass should be.
