

**KYList**

# ABOUT US

It all started with a simple question: “Why is it so difficult to verify, to share or to buy high-quality, luxury products with cryptocurrencies?” Could there be a way to secure the Product Quality, to protect the payment process without a third party, or to verify, in a decentralized way, the owners of the process?

KYList is the luxury goods shopper's ultimate crypto solution. Tokenize, buy, share or sell real estate and luxury goods from verified sellers with integrated escrow service. No fakes, no scams. Ever.

## The Problem

You want to sell or buy a luxury goods product, but you don't know whether the product is original or a copycat?

You want to pay for the luxury item, but you are scared of the high escrow service fees or whether you will get the product.

You want to buy your property with other people or you want to have the option later to easily sell or share your property.

# The Solution

- **Tokenization**

For a car, real estate or your luxury bag, we will create for your property a Decentralized Ownership Certificate.

- **Payments**

All our payments will be distributed through the Blockchain Technology secured through a Smart Contract Escrow Service. Zero fees and 100% security.

- **Sharing**

You can buy luxury goods all by yourself or you can buy it as part of a group of people or companies. With your Token Ownership Certificate, you can anytime share or sell your property partially or completely!

- **Quality**

We don't leave you alone with your luxury goods. Our KYList Brokers will verify all products from you and for you to be sure that the Asset Quality meets the highest level.

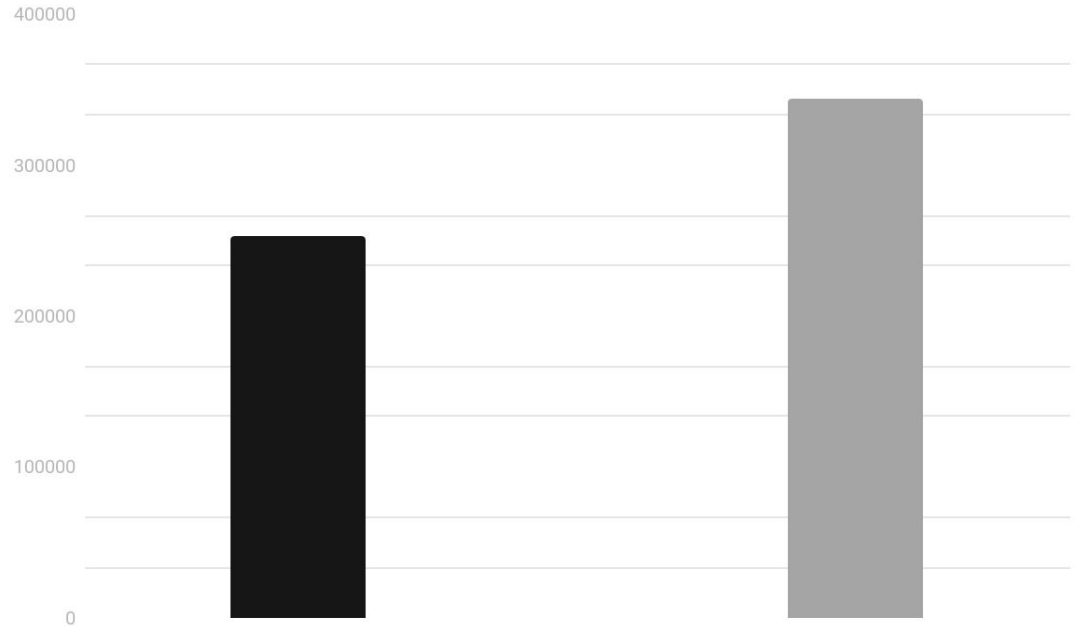

# Worldwide Market

# Luxury BOOM!

Sales in the luxury goods market in 2020 will be approximately €252.523 million. According to the forecast, a market volume of 343.636 million will be reached in 2025, which corresponds to an annual sales growth of 6.4%.

# LUXURY ROAD

The KYList Platform is not just a platform. KYList combines everything that buyers and sellers need with the newest technology!

## BUYER & SELLER

## VERIFICATION

To secure the transaction process, each buyer and seller needs to be KYC verified! All personal data & documents will be saved and encoded in a decentralized way!

**BUYER \$ SELLER**

### **SELECT OR SUBMIT**

As a buyer, select your desired luxury item, or as a seller submit your luxury item.

**SELLER**

### **ASSET REVIEW**

To provide our clients the best quality assets, your item will be reviewed by one of our brokers to ensure the asset meets the quality norms and terms!

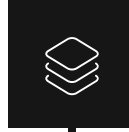

**BUYER**

### **DECENTRALIZED ESCROW SERVICE**

When the buyer selects his asset, we will provide him a decentralized payment option with integrated escrow service, which secures the payment process for the buyer and seller! Release happens after the handover is confirmed.

**BUYER**

### **ASSET TOKENIZATION**

The selected asset will be tokenized using smart contracts. The tokens represent the ownership rights in the chosen asset. The tokens can then be shared or sold to partially or completely change the ownership.

**BUYER & SELLER**

### **HAND OVER**

Our KYList Brokers will support you through the completely process until the payment, the luxury item and tokenized assets are handed over!

30 Days Crypto Value Insurance\* - Sample: When you select a property for say, \$100k and deposit the crypto into the Escrow, and if your crypto's dollar value falls due to price volatility, you can close the deal before 30 days are over and the difference will be insured! If the deposited crypto has a higher value when the deal is closed inside 30 days, then we will release the difference to your wallet! This insurance is active only if the deal is closed within 30 days.

# TOKENIZATION

Tokenization is the next evolution. Tokenizing an asset involves issuing a digital token on a blockchain, whereby that token represents an underlying tangible or intangible asset. In this way, the economy value of the asset is conferred to the token. Ownership of the asset is represented by ownership of the token on the Blockchain.

## Ownership

Buy / switch ownership in seconds through tokenization.

## Investment Group

You want to purchase or to invest in properties within a group - you can split the tokenized property ownership like shares but faster and way more securer.

## Verified Ownership

To hold or to transfer the tokenized assets, you need to be decentralized verified, which protects your ownership.

## Decentralized Cash Flow

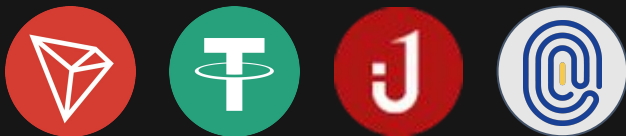

You can rent out your private jet or your house, and receive the rent payment directly into your Smart Contract and distribute the rent automatically to all token holders.

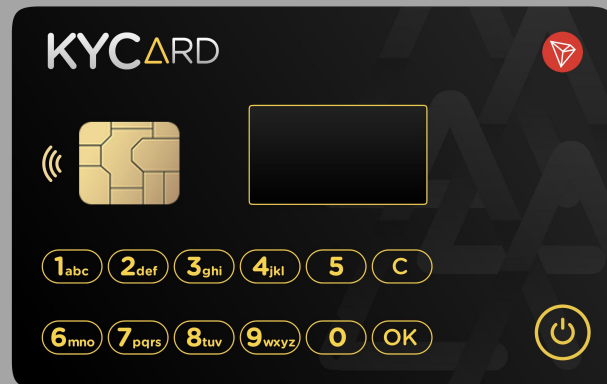

## DECENTRALIZED PAYMENT PROCESS WITH CRYPTOCURRENCIES

For users of cryptocurrencies, the decentralized network helps prevent fraud and fake transactions. It also helps make transactions efficient and cheap. These networks operate through passing cryptocurrencies directly to other users. As each exchange takes place, it gets regulated by others in the network!

Store your  
Assets secure

## KYLIST is Unique Because...

Asset Tokenization - Decentralized P2P Buys and Sells - Broker Verified Luxury Goods -  
Identity Assigned Assets - Decentralized Payments & Escrow Service - 30 Days Crypto Value Insurance

COMPLETE FINANCIAL FREEDOM - JUST LIKE YOU ALWAYS WANTED!
