

Coming November 2 To Xbox Game Move For Computer: Minecraft Java And Bedrock Editions

And even better, you'll have access together for the first time ever because the Minecraft: Computer Bundle consists of each the Java and Bedrock Editions!

With cross-play, you may play the ground is definitely lava, not pretend lava like we played as children with your mates in Minecraft, no matter what platform they are on - Windows 10, Home windows 11, Consoles, your new fancy wifi-enabled refrigerator (I made that last one up, nevertheless it could be really cool if that had been true). Rapidly change between Minecraft-servers.Biz from the unified Minecraft Launcher, sooner than you can clarify the foundations to the faux lava ground game once you have been a child.

I'm tremendous excited to carry this iconic recreation to Game Move for Computer - there are millions of players in the global Minecraft neighborhood, and we're thrilled to soon rely the game Go Laptop group amongst them. Keep your eyes peeled here on the Xbox Wire, and @XboxGamePassPC on Twitter for updates on exactly when you can start taking part in, and @Minecraft on Twitter for the remainder of the news coming from Minecraft Dwell.
