GATHERING YOUR MEDICAL RECORDS

Average Dose: Men 50-200 mg daily. Water Retention: Extreme Liver Toxic: High Acne: Yes Aromatization: No . General Information Oxymetholone is a drug made by Iran Hormone Co.. This product is probably one of the best if you aim for rapid mass gain and the same time it is the most risky steroid from the side effects point of view.

I see this so many times. Here's what happens. They start dieting and doing lots of cardio and they DO lose weight but when they do a body fat percentage test they find they have more fat. How can that be???? Well its because your body broke down muscle!! In a typical diet alone or diet with just cardio you lose an average of about 50% muscle. So if you lose 10lbs, 5 of those pounds could be muscle.
