Dragon Pharma Anavar 10mg. Anavar 10mg is an anabolic steroid that is created in a synthetic way and is used by beginners and experienced athletes to form a qualitative, relief structure of muscles.. The active substance of the drug is a synthetic steroid Oxandrolone, created in the 60's for medical purposes (as an immunostimulator for HIV patients, anemia).

The sooner we uncouple concepts like fatness and ugliness, beauty and goodness, and health and respect, the better we'll all be.

Oxandrolone 10 mg is very expensive. A 10mg tab could be priced in the range of two to five dollars each, but this depends on the brand and where you get it from. Also, when it comes to 100mg, it really does not make sense to take more than this amount because it won't work any better. Oxandrolone seems to peak at 100mg.
