

Fildena 100mg Pills Can Help to Get the Desired Intimacy

About Fildena

- Fildena contains active ingredient similar to branded Viagra i.e. Sildenafil Citrate and is FDA approved.
- Fildena 100mg Pills is a PDE5 inhibitor and works by enhancing the movement of blood into the penis, which results in secure erections that lasts longer.
- Fildena is broadly and smoothly available, safe, and operative, and remarkably result-oriented.

What is ED?

- Clinically called erectile dysfunction (ED), male impotency is a disorder where a man is not gifted to get or preserve an erection that is fit for sexual intercourse.
- This ailment is common in males aged 40-70 years

Causes of ED

- o Proceeding Age, andropause, or circumcision
- o Hormonal difficulties
- o The high blood pressure issue
- o Alcohol or tobacco dependance
- o Cardiovascular Diseases and / or Diabetes
- o Depression, Stress, and anxiety
- o Physical damage

Working of Fildena Tablets

- Fildena contains medicine Sildenafil Citrate which is a PDE-5 inhibitor
- By blocking the enzyme PDE – 5, Fildena rises the stream of blood into the penis
- [Fildena 100mg Pills](#) leads to stable and maintainable erections

Mild Side Effects

- Headache
- Nausea and vomiting
- Stomach upset
- Unclear vision
- Nasal crowding (runny nose)
- Muscle discomfort
- Reddening of the face

A man and a woman are smiling warmly at the camera. They are in a brightly lit pharmacy, with shelves of medicine boxes visible in the background. The man is wearing a light blue button-down shirt, and the woman is wearing a light-colored top. They appear to be a happy couple.
