Masculine effects usually were avoided by single weekly injections of 25-50 mg nandrolone decanoate and 25-50 mg of Durabolin (nandrolone phenylpropionate). In both men and women, this method seemed to result in more "quality" muscle, less water retention, less gyno for males, and good retention of gains after the cycle ends. Sooo, start consciously focusing your energy on what you want and align you values with your actions.
