

B2B INTERCHANGE OPTIMIZER

Interchange Optimization Made Simple.

With the B2B Interchange Optimizer App, you can be confident that your Merchants are qualifying at the best possible rates for all purchasing and corporate cards.

Our proprietary technology identifies the proper data fields necessary to meet the preferred Interchange categories for all major card brands with no additional prompts or data for your Merchants to enter.

Best of all, the app is free for the first 30 days on newly boarded accounts!

DID YOU KNOW?

Did you know that Purchasing and Corporate cards are eligible for significant savings when processed with optional enhanced level II and level III data?

LEVEL II & III

When the B2B Interchange Optimizer App is enabled, our proprietary solution verifies that the additional Level II and Level III transaction data needed for those payments is provided during the authorization so that your Merchants receive the best possible rate.

LOWER RATES & INCREASED REVENUE

Lower your Merchants effective rate, while increasing revenue. The B2B Interchange Optimizer App is available exclusively in the MX Merchant Marketplace App Store.
