

What is Fildena?

The famous **Fildena 25**, **Fildena 50**, **Fildena 100**, [Fildena 120](#), [Fildena 150](#) brand is a close representative of PDE5 inhibitor drugs. The Fildena brand represents the pharmaceutical group of Fortune Healthcare, a pharmaceutical manufacturer based in India. Fildena's treatment is a prescription for men who have difficulty achieving their desired erection.

These drugs are very effective for impotence or Erectile dysfunction due to the active prescription of sildenafil citrate. This drug specifically inhibits PDE5, an important chemical in the penile erection mechanism.

How does the Fildena work?

The active ingredient sildenafil citrate of Fildena is a selective inhibitor of the cGMP-phosphodiesterase type 5 (PDE5) enzyme. Selective inhibition of this enzyme relaxes the smooth muscles of the spongy area of the penis called the corpora cavernosa. This vasodilation increases blood flow inside the penis, causing an erection.

Use of Fildena 100

Fildena tablets are used to treat erectile dysfunction in men. This medicine used to treat ED is also used to treat pulmonary arterial hypertension. Fildena pills relax the tissues present in the blood vessel walls, increase blood flow to the male organ and help men to have a firm erection, which is the natural response to sexual stimulation. However, Fildena tablets will only work if you are sexually aroused.

FAQS

Fildena how long before takes effect?

[Fildena 100](#), normally starts working 30 to 60 minutes after you take it in oral tablet form. It may take up to 2 hours to work.

How long does Fildena stay in your system?
