**Anonymous' #Op\_Tibet To Launch Winter Olympics Attack On Chinese Government, Mass-Surveillance And Corporate Targets**

# HACTIVISTS FOR TIBET

On January 18 2022 Yang Shu, Executive of the Beijing Organizing Committee, issued a warning to athletes participating in the Chinese-hosted, 2022 Winter Games.

His barely veiled threat, suggested punitive action against anyone making comments not approved by China's regime. So, remarks on Tibet, human rights, torture, forced labor-camps, and Hong Kong are off the table.

Welcome, to the land of censorship. Is anyone surprised? Even the Games' official mascots feature a Tibetan panda, locked inside a perspex suit and helmet!

China would have the world believe this is a fun and harmonious event. Free from, and beyond politics. Or, is that the position of the International Olympic Committee? Hard to tell the difference, right? The truth is, every aspect of China's hosting of the Winter Olympics is politicized, and crassly used for relentless propaganda campaigns.

But beyond the fake snow and disinformation, is the disturbing reality that such staged public-relations promotions, are set against a background of brutal totalitarianism. A tyranny that murders, tortures, and enslaves. Waging also cultural genocide against Tibetans.

Meanwhile, the censorship and digital intrusion; which is daily life under the rule of the Chinese authorities, is being targeted at all those attending the Games at Beijing venues.

Its been reported by Citizen Lab that a requirement of entry is a mandated app called Em why twenty twenty-two. This malicious and invasive application gets installed on the cell-phones of spectators and others in stadiums.

It makes redundant, encryption protection, consequently exposing and harvesting sensitive medical information, geographic, and travel history data. Imposing search censorship, by restricting certain keywords, which include any mention of Tibet or issues linked to human rights, Hong Kong, Uyghurs or violations.

This is just one more reason why, in a **coordinated global strike, Operation Tibet commences on February 4. On that opening day of the 2022 Winter Games, and throughout the event. Including Tibetan Independence Day on February 13, Chinese government and mass-surveillance servers, and Olympic-linked corporations are legitimate and justifiable targets.**

The scale, details and impact engineered by this ethical activism will be downplayed, denied and ignored.; This is due to the censorship which characterizes the public output of China's government.

The facts, however, are that Chinese regime and Olympic-related corporation sites, along with surveillance servers. Operated by companies such as Huawei, Baidu, Ten-Cent and Alibaba. Which design, manufacture and implement mass-surveillance systems, oppressing every aspect of daily living for Tibetans. **Will be hacked, poisoned and crashed.**

**We are Anonymous. We are Legion. Expect us!**
