November 2021

# Introduction

Welcome to Shkooby Inu, a decentralized & community-driven meme token on the Ethereum Blockchain. The Shkooby Metaverse (Shkooby-verse) will feature a Swap, Games, NFTs, and an NFT Marketplace.

SHKOOBY's products tie together to become one big, intricate, and fun platform, where every feature complements each other. The only thing you need for access? The \$SHKOOBY native token.

As an early community member, you will have the opportunity to join a movement whose sole purpose is to build a Metaverse and community for people of all ages and cultures worldwide. Together, we will bring utility across the entire meme-coin universe.

How will SHKOOBY take over the meme-coin space? Simple. We combine memes, a steady community, and actual utility.

# The Vision

SHKOOBY's vision is to empower early community members and bring utility across the entire meme-coin universe. The financial system is a confusing and tedious part of our world. We want to make it a rewarding and fun experience for everyone. Inspired by our favorite childhood show, we will build the greatest meme community crypto has ever seen.

To do that, we will provide our community with several products that will allow us to capture the attention of, the most notable among those, a Metaverse.

This is where SHKOOBY INU arrives. SHKOOBY will provide a seamless metaverse experience, combining DEFI's best opportunities by allowing you to farm the token and NFT rewards while using them inside of the SHKOOBY-VERSE. Our goal is to capture the meme market with proper utility with the help of our community, the #SHKOOBYGANG.

# The Shkooby Story

My name is Doobie, and I have been the backbone of Mystery, Inc all these years. However, my days of catching humans in monster-shaped suits have been over lifetimes ago. I did make some good \$\$\$ from it and have lived my life with high-class escorts, supermodels, and drugs. Most importantly of all, in that time, I have developed an addiction to the finest strains of Shkooby snacks. And let me tell you, it is truly addicting.

But it seems like I am the only one that shares the fascination with Shkooby snacks. It's all so tiresome, bros.

Luckily, I've found a solution to my problem.

My most successful companion catching monsters in Mystery, Inc, Velma, has given me a new purpose. She told me of the wonders of decentralization and how blockchain will change the world. After years of research, I must say I wholeheartedly agree.

I will combine the innovative technology that blockchain offers together with my beautiful digital Shkooby Snacks.

And from that? I will build an empire.

I have wandered with my members of Mystery, Inc — With Fred, Shaggy, Daphne, Velma, and Candy — Now we will wander the dirty streets of 4chan, Reddit, and crypto Twitter. And dare I say it... Yes.

We will rival the biggest meme-coins.

You see, on my journey through Mystery, Inc and the high-end parties I've attended due to my fame, I have gathered connections that most people only can dream of.

And I will use them all for one purpose. One common goal.

To build the newest, hottest, SKHOOBIEST meme-project there ever is. But this won't be your daily shitcoin. \$SHKOOBY will have actual utility.

# The Shkooby Ecosystem (Metaverse)

The SHKOOBY-VERSE (Metaverse) will comprise different components that will create an exciting virtual world containing exciting events and games. Everything in the Metaverse is accessible for \$SHKOOBY token holders, giving our native token a massive use case.

A villa with different rooms will represent our Virtual Metaverse. These rooms will have a description of what they represent:

## **Events Room**

Live music events, DJs, Celebrity Meet & Greetings, Exclusive Parties, Premiere Streaming Events

## **Community Gatherings & Networking Room**

Join Celebrities and your favorite community members in the Metaverse for a casual hangout, or discuss the hottest memes.

## **Games Room**

Use our NFTs, and native SHKOOBY token to participate in a fun and exciting P2E game experience.

In addition to the virtual Metaverse, where you will have various events, gatherings, and games, we will also bring utility to the SHKOOBY token by integrating rare NFTs, and farms for other popular meme-coins. This way, SHKOOBY will bring utility to the entire meme-coin universe, giving our community members the opportunity.

## **Elite SHKOOBYGANG Room**

Only accessible for the top 200 SHKOOBY holders. Alpha leaks, and mysterious perks await, only for those who are deemed worthy.

## **Avatar**

Farm your Avatar! From our farms, you will be able to farm NFTs that can be used as a visual depiction inside the Metaverse.

# Farm

Farm rare NFTs, only released for those who stake SHKOOBY tokens.

# Swap

Farm, swap, earn, lend and become the king of dog coins. Our SHKOOBY SWAP includes the most popular Dog Coins in crypto, giving your favorite dog coin additional utility.

# NFTs

We will have a range of NFT collections. But among our rarest will be the SHKOOBY PUNKS. Our NFTs will be fairly launched, continuing our principle of rewarding loyal community members.

# SHNACKS

SHKOOBY SHNACKS will give further use case to our NFTs and native SHKOOBY token by allowing you to stake \$SHKOOBY for extra APY.

- Stake NFTs earn SHNACKs
- Stake SHKOOBY earn SHNACKs
- Stake SHNACKs earn SCHNACKs (APY 100%)
- SHNACKs official game currency

# GAMES

Fun, interactive games within our Metaverse, only accessible with our two-token system, \$SHKOOBY and \$SHNACKS.

- Treasure Hunt to find more SHKOOBY NFTs and SHNACKs
- NFT Marketplace to trade SHKOOBY NFTs using SHKOOBY/SHNACKs as currency

Our five products are deeply intertwined, combining DEFI, NFTs, Games, and two-token systems, ultimately making up a complex Metaverse with one main goal in mind. Increasing the inherent use case of our native token SHKOOBY.

# The Shkooby Plan (Roadmap)

The Shkooby Plan below introduces several essential pieces of the puzzle, which will bring an enormous use-case for \$SHKOOBY. However, the most important piece will be you, the #SHKOOBYGANG. We will host several community events that will reward active community members through meme and skill contests.

- Launch**
