

# Looking For The Best Minecraft Servers?

Minecraft servers allow players to play with others instead of playing alone. Finding the right server can be a challenge with the potential reward of collaborative builds, PvP zones, creative challenges and friends. There are a variety of servers in many countries that rise and fall with players that come and go. Some are active for a number of years, constructing large cities, backstories and long-lasting relationships. Enjoy your time on the server for as long as you are having fun!

Find the best Minecraft server for you is a challenge.

There are a variety of servers available that you can use to trade and collect resources to survive, create your own role-playing characters or play action-packed mini-games. We suggest filtering by country. The less lag you experience during the game the closer to the server. After that, you can narrow by the category or search for keywords that match what you're looking for in an online experience. You may prefer a more traditional server, or want to start in a new realm with a determined server administrator. Ultimately, you won't know whether the server is the right one until you join.

## Java Edition Minecraft Servers

You are currently browsing servers that predominantly accept Java Edition Minecraft clients. This is the original version of Minecraft and is still the most customizable server experience. Minecraft online can offer an entirely different experience than vanilla Minecraft. Servers usually employ developers for custom plugins to provide an amazing experience for their players. The modding community is talented and running an effective Minecraft server requires planning, technical skills, budget and of course active players.

Are you in search of the best Minecraft Servers available?

Explore an alternative Minecraft Servers list to find the ideal multiplayer server for you and your friends. Browse popular server categories like survival, skyblock and prison.
