User Instructions: This SB Guide does not use a fixed decklist to determine the ins and outs of each matchup, it rather uses a gauntlet. You can find the full gauntlet in the primer at mtgsalvation. The idea behind that is, because each decklist is different, to provide a guide which is suitable for everyone. This guide uses a priority list. It indicates, which cards are more important to bring in/out in a given matchup compared to others. The priority simply increases from left to right. And with that information, you can work yourself through the sideboarding according to your personal list. If you don't have a given suggested card in your decklist, simply skip it and go to the next one.
