

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is available for sale on G2A including: **Gift-cards**, **Activation Keys** (for games and software) and **Hardware** as well.

### How it works?

It's really simple. We will use a Tampermonkey script which changes our browser's timezone whenever we make a new order on g2a. As soon as we get redirected to the payment page, our timezone will change – which will result in our order getting marked as “Expired” on Bitbay's side, but NOT on g2a's side. So, if we pay for the products – our order will get processed and delivered by g2a anyway, but the money will get INSTANTLY refunded to our wallet by Bitbay.

### Short summary of the process:

1. Install a Google Chrome extension named “Tampermonkey”
2. Install a Script that changes your browser's timezone after making an order on g2a.
3. Create a new order on g2a and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by g2a)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for g2a. They will refund your money, because the order is marked as “Expired” on their side due to the timezone conflict.)

### Important – Please read this:

Keep in mind that Bitbay will refund your “Expired” order only if it's above 0.005 BTC. Any lower amount is not prioritized and will require you to contact their support to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.

Basically you have to add to your cart items that are worth **at least 0.005 BTC**, it could be one or multiple products – doesn't matter.

There are absolutely **no limits on the maximum worth**. I personally purchased Red Dead Redemption 2, and it was instantly refunded to my wallet with no issues.
