

## Order MASTO E 200 mg(Drostanolone Enanthate)

MASTO E 200 (Drostanolone Enanthate) is an anabolic/androgenic steroid. It is known to be highly androgenic and mildly anabolic. It is incapable of aromatization and has similar properties to dihydrotestosterone. It has been successfully used as a breast cancer drug but because of the high risk of virilization safer options are prescribed. MASTO E 200 is not clinically used for weight gain (as is common with most steroids), so this makes it a very unique steroid from that perspective. Unfortunately, much of the information on MASTO E 200 available in medical journals doesn't focus on weight or strength gain or even fat loss, for those reasons.

- Product: MASTO E 200 mg 10 ml
- Category: Injectable Steroids
- Ingridient: Drostanolone Enanthate
- Manufacture: Para Pharma
- Qty: 1 vial
- Item price: \$114.40

The recommended dose of CIMZIA for adult patients with psoriatic arthritis is 400 mg (given as 2 subcutaneous injections of 200 mg each) initially and at week 2 and 4, followed by 200 mg every other week. For maintenance dosing, CIMZIA 400 mg every 4 weeks can be considered [see Clinical Studies (14.3)].
