

5 Reasons to Get a Satellite Phone

Unexpected disasters can strike any time. They can cause destruction to homes, buildings, infrastructures, and even leave people in a state of poverty, injured, or dead. In the event of earthquakes, hurricanes, or other disasters the power could be shut off and roads could become inaccessible, and water and food might run out. Your family could get separated too in case of emergency evacuations. It is essential to plan ahead in order to reduce the damage and protect yourself. Find a satellite phone that will keep your communication lines open.

What is a satellite telephone?

Satellite phones are form of mobile phone which connects to the phone network and other phones via satellites orbiting the Earth. Satellite phones do not rely on cell towers or sites in the ground as smart phones. They offer a greater coverage and can be used anyplace in the world. Whenever you decide on to discover effective information on thuraya satellite phone Dubai, you've to check it out here at <https://www.datavox.ae/thuraya-satellite-phone-dubai/> website.

In 1979, the first thuraya satellite phone Dubai technology was invented. It was utilized for sea and marine life monitoring, beaming signals to and from satellites in the geostationary orbit around the Earth offering almost all-global coverage.

Satellite phones are an essential component of any disaster kit. Satellite phones are utilized by explorers, trekkers, and travellers as they travel to remote areas. They're roughly the size of the early mobile phones, but with smaller screens, a tiny keypad, and antenna.

Why would you need a satellite phone?

Satellite phones provide many advantages. Here are some great reasons why you should get one:

A satellite phone keeps your family members and you in touch during disasters or emergencies.

Are you living in an earthquake or hurricane-prone area? Did your local government recently issued a volcano alert?

Emergency evacuations are typically conducted in the event of natural disasters, such as volcanic eruptions, earthquakes, hurricanes or tsunamis. You will need a satellite to allow your family and you to be in touch in the event of the occurrence of a catastrophe. It isn't easy to contact the others in the event that you only rely on your smartphone, laptop or even your landline phone, as there's a good chance that electric, internet cell, telephone, and internet lines are affected and could not be fixed for days or even weeks after.

Satellite phones enable you to reach the police, fire department, or other government agencies in the event of an emergency.

Imagine you and your family living in your house in the aftermath of a hurricane. Internet, power and telephone services are down. What do you do if someone in your family is injured and your

basic first aid skills is not enough? What do you do if you need to call an ambulance to get the medical attention that is needed? You should be able to call the nearest hospital and request assistance using your satellite phone. Satellite phones are able to work wherever and anytime.

A satellite phone gives your family and friends peace of mind when you are away from the main road.

Are you a fan of travel who loves to explore the less well-known areas? Are you a lover of nature and prefer to explore the rural and isolated places on the planet where cell phones and internet aren't as readily available? Do you want a simple and easy way to connect with your family back home to alleviate the stress of being traveling?

When you are traveling around the world, it's always best to keep in touch with your loved family members every couple of days. This lets them know that you're safe, well, and still alive. If you're a Thuraya satellite phone Dubai, that and more can be done without difficulty. In addition, if they want to contact you and ask you to stay home since there is a sudden issue that you personally have to deal with, they'll be able to make that happen quickly.

Satellite phones have better coverage than regular phone.

Satellite phones can be used to offer quick and convenient connections worldwide, unlike mobile phones. If you are in an emergency situation even if your electricity and telephone lines are down it should be possible to call anywhere in the world. You can make calls to your loved ones, even when you're in a remote forest or halfway up the mountain. With a satellite phone, you don't have to find and walk to a higher elevation and hope for a signal that will be able to call. Make sure you stay where you are to connect.

Satellite phones are easy to use.

Finding out how to utilize the [satellite phone](#) shouldn't take a lot of time. Even with the most modern and cutting-edge technology it is, it's used in a similar way to how you use a regular cellphone. If you decide to purchase a satellite phone, it should include a user's instruction manual that will outline how to set-up the phone as well as how to charge it, how to get the voicemail service activated as well as other essential details. You should have all the necessary accessories to be able to start using the phone as soon as it is purchased.
