

An astronomy project for all people

Science 4 Girls

Intended target group: Africa

This project is a spin-off of the project Stars shine for everyone :

<http://www.vvs.be/subsite/sterren-schitteren-voor-iedereen/stars-shine-for-everyone>

Through this project we mainly want to reach out to African schools. As this is for charity; our main resource will be donations. The schools will ensure the delivery of the telescope (a 11cmF8 Newton). Schools or school group applicants will be screened: Guidance on how to use a telescope must be guaranteed, and of course there has to be a section for girls in the school. This initiative is possible thanks to the unconditional support of University Ghent Public Observatory Armand Pien. ASTROMARKET sponsors for these telescopes Baader solar film, secondary mirrors and viewfinders. For further information: please do not hesitate to contact us: [kijkerbouw@ugent.be](mailto:kijkerbouw@ugent.be)
