Most of the people look for cages of which it is impossible to get out because it is connected with their imaginations about full submission and dependence on the Master\Mistress.

If the length of a rope is 4,5 - 5 inches, you will suit a ring with a diameter of 1,5 inches

If 5 - 6 inches – diameter are 1,7 inches. If 6 - 6,5 inches – diameter are 2 inches

If it is more – the diameter is 2 inches and more

But this cannot be realised: it is impossible to limit the man for 100% safely without risk to do much harm to it.

Mans genitalia varies between one man, and its almost impossible to make suitable for everyone cages. It is necessary to focus not that you can be released and on the essence of submission.

CB-3000 Male Chastity Cage Kit

Cool designed and reliable cage.

- It's perfect for extended play, entirely transparent and comfortable.

What induces people to buy this device for their plays?

- Three locking pins;
- One key;

- Any lubricants will approach this cage;
- Doesn't contain latex;

Cons

- The material does not allow the skin to breathe.
- Existence only of one key will not allow you to be released quickly in an emergency.

- The strange, but the existing problem: your cock looks in it very little. It is pleasant to someone, and to someone can undermine a self-assessment therefore before purchase think of how you will feel in it.
- Easily can be noticed under tight clothes.
- Suitable only for average length.

- Hard to clean.
- Can be painful.
- Too expensive.

Lovers cage

This device – merely great way to diversify the sexual life and to add to it peppercorn.

Bright feelings in sex, non-standard and lovely design and the thought-over design – what else is necessary?

Pros

- Full-length cage leaves head free for the best sex ever;
- 3 inch (ca. 8 cm) length;
- Testicle support;
- Waterproof.

Cons

- Bullet vibrator isn't so good, works hard.
- It can grate very strongly tender skin of your partner, and even the sea of lubricant cannot help.
- Testicle support doesn't work if your balls are not so big.

- Too little for average cock size.
- The arrangement of the vibrator a little strange and if you have sex with the woman, it can not get on her clitoris. Its mechanism very strongly differs from the woman to the woman; therefore its existence can be utterly useless.

- Doesn't give any chastity at all.
- The cock cannot get entirely into the partner because of a cage for the vibrator bullet.
- Very tight, can be painful.
- Can pinch balls hard.

Only one proof this device is cheapness. It is undoubtedly not the best male chastity device.

What the male chastity device is?

Male chastity device relatively recently appeared on counters of intimate shops.

Products are in demand for advanced buyers.

Having put on such belt on the member of the beloved, the woman can be sure that her man remains faithful.

The male chastity device imitates the shape of a penis. Modern models are made of:

- metal;
- genuine leather;
- soft silicone.

As the belt directly contacts to the flesh, it is crucial that the special device was made of ecologically safe and hypoallergenic material.

Male chastity device: why it should be bought?

Using an intimate accessory, partners will take a particular satisfaction.

The unique toy is pure entertainment. Only present how you put on to the man a fidelity belt, you latch the lock, and you hide a key in a handbag.

The man and his member belong only to you. At any time it is possible to release the soulmate from sweet captivity.

The male chastity kindles passion and desire to belong only to the beloved. The belt of fidelity will help the couple to reach a new level of relations. If sex became boring, suggest the partner try something brand new.

The absolute bans with devices of male chastity

- Even if the thought of full helplessness gets very strongly, once the model chooses from which it is real to be released independently.
- If the device to you is small, presses or otherwise hurts, do not choose it as a cage for constant carrying.
- Try to avoid models with thorns inside.

- You do not sleep in a cage. Night erections can cause severe pain, and even to damage your body.
- Do not give keys to the person if you do not wholly trust him. It seems obvious, but it's essential.

- Do not forget about regular cleaning of the device regardless of that; you carry it regularly or periodically.
- Before constant carrying surely checks the feelings. Put on a cage at several o'clock, and you resemble it. At this time it is better for the partner not to abandon you, but also not to excite too strongly.

How choose the best male chastity device size?

Ideally, the length and width of a belt have to be equal to the length and breadth of a penis at rest, for example, after a cold shower.

Take an inelastic rope or a thread, tie with it a penis with testicles and make a robust small knot.

Your finger should not creep under a string. You resemble so several minutes. To you it is comfortable? Does not press anywhere, does not press? Perfectly, such sizes will suit you. Otherwise, repeat the procedure once again. Accurately scissor a rope and on a ruler measure its length.

That the hump did not stick out of your trousers, the belt should be focused a penis down.

- ☐ Council for convenience: give preference to models with a short tube.

Model weight also plays an essential role. The belt is more massive, and then it is more inconvenient to wear it, especially for beginners.

We advise you to begin with more accessible options.

And at last, notice that there are design models ready to realise any your imaginations.

Do you want to try on on yourself an image of the gallant equestrian? – Please! Do you wish that it was impossible to touch your penis? – Easily! Is it necessary to close the member completely? – Voila!

The main thing – to choose only the best male chastity devices. With our article it is easy.
