Plant and Bloom booster

METROP AMINOXTREM is a concentrated liquid fast-acting plant and flowering stimulator for the growth and flowering phase of the plant, universally developed for cultivation in pots, the open ground and in hydroponic systems.

Plants have a lot to do with stress in the growth and flowering cycle.

Stress is, for example, caused by weather changes, transplanting, vermin, cold and pruning.

DNA in the plant cells is damaged as a result and goes off like a switch. This means that certain enzymes, hormones or phytonutrients are no longer produced by this cell.

Plant cuttings from mother plants are particularly subject to stress due to the factory production of cuttings.

Weed plants for example express this by giving leaves with only 3 fingers.

Amino acid helixes repair and amplify plant DNA, but must be smaller than 1500DA before they can pass through a plant cell wall.

Due to the extremely small Amino Acid Helixes in the METROP AMINOXTREM of 700DA, it stimulates and repairs the plant cell DNA immediately within 7 hours.

1

You can quickly notice this with for example weed plants because the new leaves will quickly create more fingers.

Flowers, cut or not, stay with AMINOXTREM longer beautiful.

The secret of beautiful flowers in Dutch flower gardens is many times AMINOXTREM.

AMINOXTREM makes every plant and flower healthier and stronger and gives it a longer life.

AMINOXTREM together with METROP MR2 you will get the best plant flowering in your garden.

Metrop AminoXtrem is a concentrate plant and bloom booster.

- Max 90ml per 100L water - Hydroponics/potting soil

- Max 2,5Litre per Ha - Agriculture

- Max 10ml per 5Litre water - Homegarden foliar
