

Was there a World-wide, "orchestrated" campaign of Govt. policies regarding Covid??

Which Government Techniques and Policies were applied world-wide with almost no exceptions, bar Sweden maybe (Note that the exception often proves the Rule):

- Mask mandates, even for school children; even outdoors, (despite overwhelming majority of scientific studies showing no effect for airborne respiratory virus).
- Social distancing mandates, heavily policed, even walking outdoors. Including restrictions on numbers of people per sq.m. in hospitality and other venues
- QR codes restricting entry to many places including restaurants and Gyms for those not participating.
- PCR Tests.
- Concept of A-symptomatic transmission
- Lockdowns, isolating people in homes, flats, small apartments even boarding home rooms etc.
- Curfues, including limited exercise, restricted parks and playground use.
- Closing schools, despite children being at almost no risk.
- All countries indemnify Big Pharma.
- Demonization and prohibition of HCQ and Ivermectin. Including demonization on Social media leading to cancelled accounts.
- Failure to recommend any other treatments other than Panadol prior to Vax being released.
- Mandatory Vaccination for almost all areas of society. Massive job-losses result.

- Excluding even transplant recipients from operations due to unvaxxed status.
- Vaccinating pregnant women despite almost no studies.
- Vaccinating children, even though there was no risk
- Censorship, including Social Media coercion (80 FBI agents seconded to Twitter offices, 77th Brigade in U.K., Dutch Govt's direct line to social media Companies to cancel account of dissidents).
- Coercion of Doctors to remain silent on all questions related to Vaccination safety and efficacy at risk of being de-registered, including persecution of any Docs who wrote exemptions for masks or vaccinations, even in dire circumstances.
- Worldwide denial that the vaccination was actually a gene-therapy, including media manipulation and literally redefining the term Vaccine to include Gene-therapies!
- Almost all countries do not do their own testing of the vaccination product, instead relying on the USA's CDC and FDA to do its limited safety testing assessments.
- Clear plastic screens, domes etc.
- Phrases like: "no one is safe unless we are all vaccinated" and "A pandemic of the unvaccinated".
- Threats of "making life Hell" for the unvaccinated (France and Canada), and similar statements by leaders in many countries USA, Australia, and in Netherlands "We know where you live".
