

# The Foolproof Minecraft Strategy

## Minecraft Information

Minecraft Information is one of the most useful sources for information on the game of Minecraft. There's an abundance of information about Minecraft that it's almost overwhelming. I felt it was time to compile all the lists and guides required to fully enjoy the game. Here are some essentials I would recommend.

A Minecraft ID List contains all the blocks and item ID's in the game. There are also Minecraft Crafting Recipes for all items. You can also find constructions created by Minecraft players. There are also a lot of Tutorials. I will be adding more information on this site to allow people to view all the different kinds of buildings that people have created. There is also an Items list and a Blocks list that provide more information about certain items and blocks you can find in Minecraft.
