-- Should Be Given As Follows Treatment: 150 mg orally every 6 hours or 50 mg intermuscular/  
intravenously every 6-8 hours intermittent bolus or infusion; alternatively, 6.25 mg/hours intravenously  
by continuous infusion. One of the most common knee injuries is a meniscus tear. This injury usually  
occurs during an activity that causes your knee to forcefully rotate or twist. When this happens,  
especially if you put full weight on it, this can lead to a torn meniscus. [resource](#)
