This document is a technical description of Engage Tokens and doesn't convey any type of investment offers or recommendations to make investment. Potential NGA token holders need to consult with professional advisers before proceeding. This technical specifications document is published only for informational purposes. Project Engage doesn't guarantee accuracy and completeness of document contents and thus is not responsible for your actions based on your studying of this document. Cryptographic NGA tokens are not issued as investment instruments of any sort from any jurisdiction perspective. This document is not a prospect for emission of securities, neither a request to invest in any type of securities and can't be viewed as offer to buy securities. Unfortunately, you do not have rights to obtain NGA tokens, if you are citizen of USA. ICO will be restricted from U.S persons and token issuer entity will be incorporated outside the U.S

1. MISSION AND VISION

The experience and skills of our traders and financial experts is the key to success of the token holder funds. The markets in which our traders work are highly risky, but professionals know effective ways to minimize risks and derive maximal revenue. Profits gained through the work of our specialists are fairly shared between the fund and private token holders, our clients. The company is attracting token holders to benefit from the effect of scale, the higher the purchases of tokens, the higher the return.

With the aim of massive user adoption, Engage Token hopes to implement within all E-commerce sites and gaming platforms. By doing so, we bridge the gap between using fiat currency and purchasing online items and accessories. We have already partnered up with many smaller E-commerce sites and after a successful ICO and payment gateway wallet, we are going to be able to use Engage token as an additional source of payment.

The ICO funding will allow us to build state of the art Desktop and Mobile wallets as well as payment gateways to be used on all E-commerce websites and Gaming Platforms.

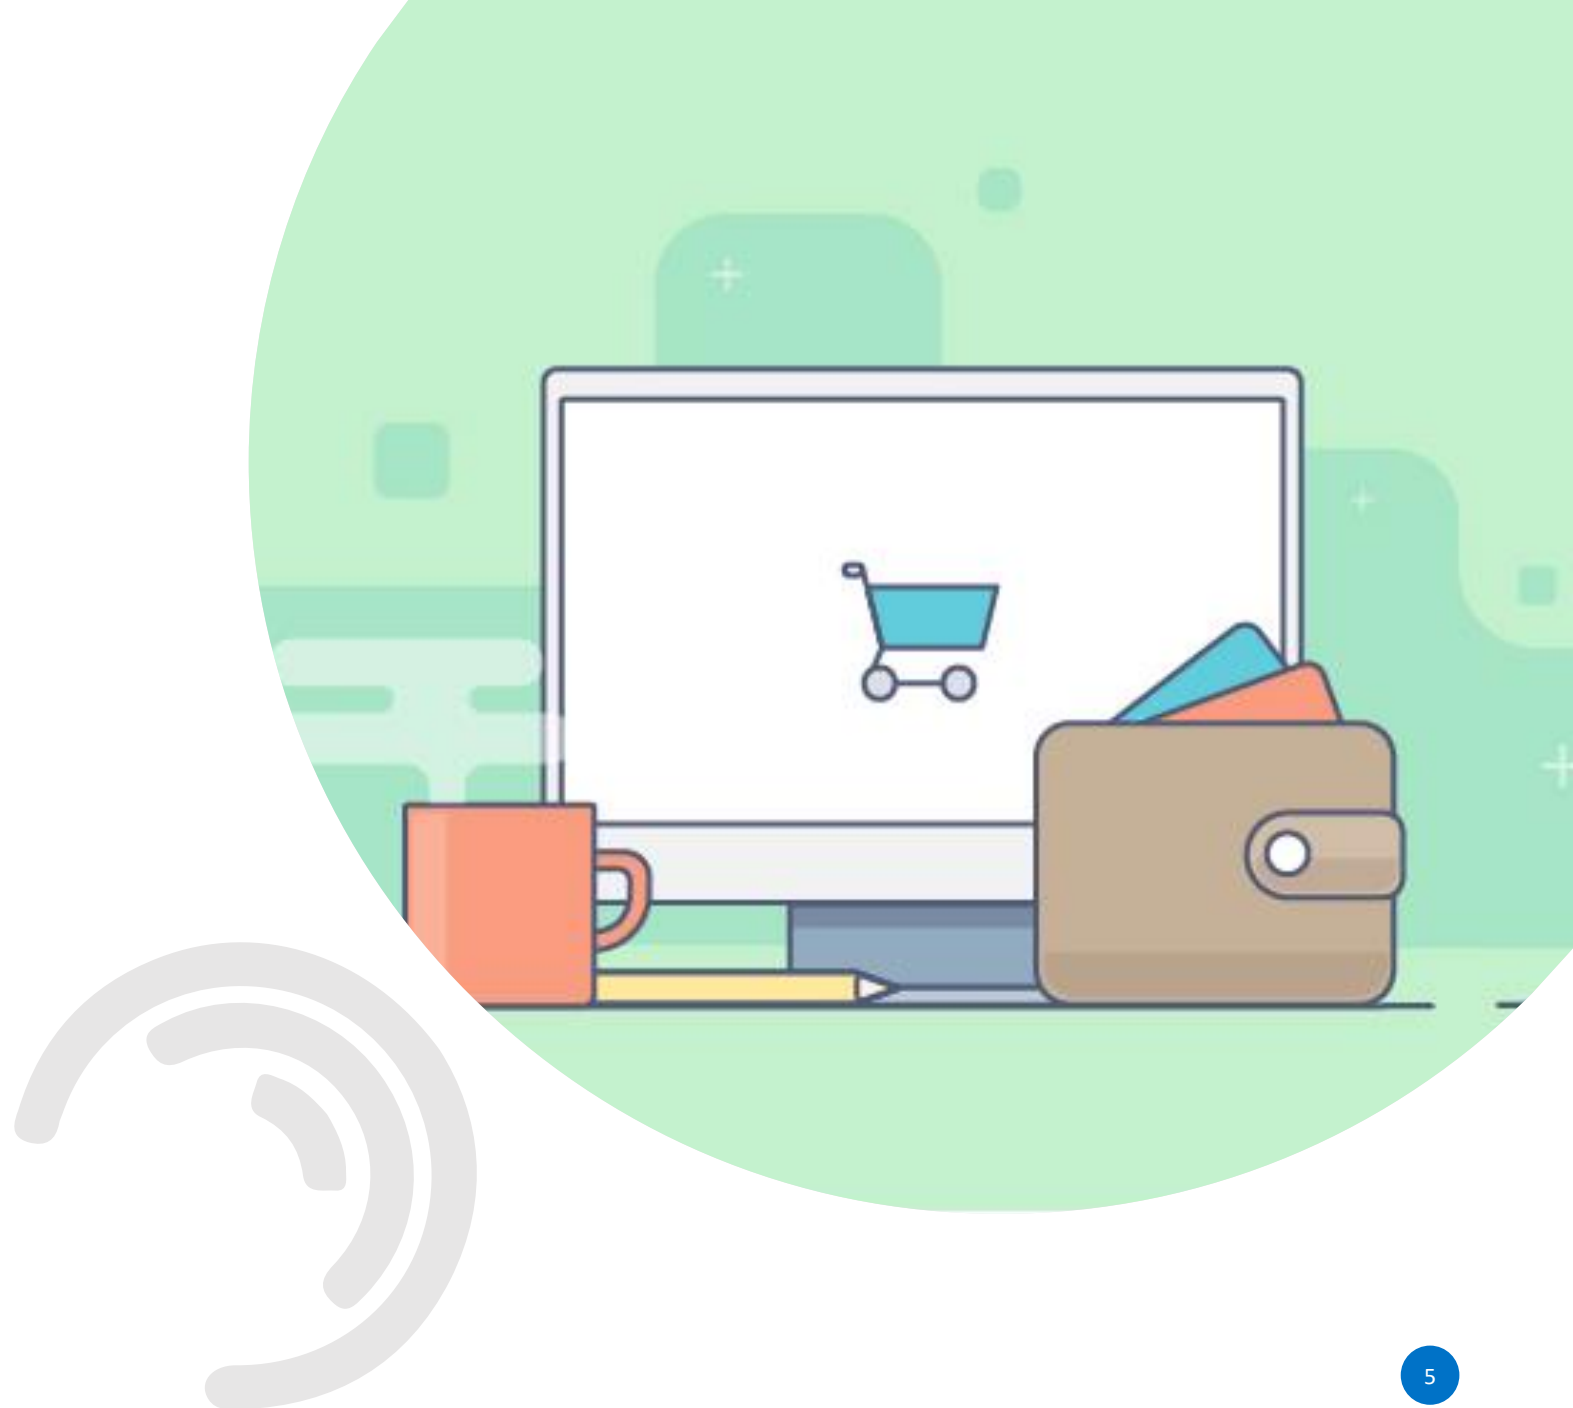

What makes us truly unique from every other cryptocurrency coin or token, is that we charge ZERO fees on our own built platforms. How does that work?

E.G Simon has 10,000 NGA tokens. He wants to send 5,000 to Peter. The transaction fee would probably range from 0.001-5 NGA – However, on our custom built platforms that we have designed, Simon will not have to cover this fee. Engage will cover all fees in order for Simon to send his coins to Peter.

The above Example works the same as if Simon would want to purchase an Item online by using our payment gateway.

E.G Simon wants to buy a music concert ticket or a ticket to a major Esports event. If Simon paid with a credit/debit card, he would be charged an additional fee of anywhere around 0.1-5% per transaction. When Using Engage Platform with either a Gaming Platform or E-commerce Website, we at Engage cover the fee for Simon. Now Simon gets what he pays for as the true value of its price, with zero fees!

Our mission is to build a platform for the people. We are tailoring each aspect for our community to benefit you as the individual, rather than ourselves.

2. What is Engage Token

Engage Token is an open source Ethereum blockchain based platform. With our cutting-edge, fast, user-friendly platform we will bridge the gap between digital and Fiat currency bringing people all around the world to digital currency platform. Our tokens will be used by merchants all around the globe for Peer-to-Peer payment methods. Token holders can transfer Engage Token anywhere in the world within seconds and zero fees, by which making it the primary source of peer to peer transfers and getting rid of high transfer charges one have to pay as compared to the fiat currency.

Engage Token is a peer-to-peer electronic monetary system based on cryptography like Ethereum. It exhibits properties similar to physical currencies, however, what makes it distinct is that it allows for instantaneous transactions and borderless transfer-of-ownership. As all the payments are processed through secured servers, so that users do not need to worry about any risk involved, it is the most user-friendly system that allows your trust and control over it. Engage Token is accessible and available wherever and whenever you are in need, no boundaries, which means you can purchase or sell products and services, transfer money to your family and friends at an extremely low cost by an instant confirmation network without any interruption. Unlike many other digital cash, Engage token is designed to not only become a digital currency that can meet the highest advanced technology standards but also become the most user friendly digital cash currency.

3. THE BREAKTHROUGH SOLUTION OF ENGAGE TOKEN

Engage Token is an advanced solution which could allow users access to a simpler, safer and faster transaction methods. People from all walks of life can take advantage of Engage Token for their own sake, Engage Token provides users with a global fastest money transaction yet absolutely safe and with no fee. You can use Engage Token, of course, to transfer money, to purchase and sell goods and services worldwide, with no fee and within seconds.

3.1 Introduction

Engage Token is kind of digital cash that you can use to make your payment or any money transaction whenever and wherever you need to. By using Engage Token, your e-commerce online business, private payments, your online gaming business or your gaming store can speed up its money transaction with both clients and suppliers, therefore, which allows you to save money and even boost your business growth.

Engage Token inherits and develops the Ethereum technology platform as an ERC20 Token, with open source peer to peer accelerates all transactions quickly, minimizes risk, enhances high security and does not involve any third party, Engage Token has a clear transparent development roadmap, All Engage Token wallet versions will be fully up to date where users can secure their wallets and trade seamlessly on trading platforms.

Our trading uses Ethereum blockchain technology to ensure all token holders enjoy safe and secure processing on our stable platform, our decentralized platform does not involve any third party involvement thus allowing transparent transactions between token holders.

Our platform will allow users to purchase items from their favourite shops, retailers, suppliers and gaming platforms. It allows Engage Token holders to search through our patented web or mobile applications for a favourite item or accessories they might want through a partnership store and purchase it by using Engage Token as a type of currency. Engage Token prices will be that of its current price to the price of the item. Eg Engage is valued at \$0.50 at the time and an item costs \$1, you will need 2 NGA tokens to purchase such item – *this is an example and not a price prediction*. Engage Token removes all added fees on all of its platforms – please see *How the fees work* section.

3.2 Initial Token Offering

An Initial Token Offering (ICO) is an event in which a new cryptocurrency project sells part of its cryptocurrency Tokens to early adopters and enthusiasts in exchange for funding. For the party offering the Tokens for sale, this has become a well-documented and well respected way to raise funds to upscale an existing product or service.

3.3 Why an ICO?

Bringing developers, marketing personnel, a legal team, designers and many other talented people on board will require additional funds. Offering an ICO instead of a traditional venture capital round enables the community to participate in Engage Token's success story, rather than limiting it to a small, selected number of traditional venture capital funds. Furthermore, by giving Engage Token to users of the Engage Token Wallet, they will benefit from Engage Token's future success. An Initial Token Offering is fast, transparent and efficient for exactly this purpose

4. ADVANTAGES AND FEATURES

Advantages

Zero Fee : The users of bitcoin or other cryptocurrencies are being charged a high fee and have to wait for a long time when they make transactions. Engage will cover any and all fees on our wallets and platforms.

Secured Crypto Asset Deposit: Engage stores the vast majority of the crypto asset deposits in an offline multi vault, which requires 5 out of 8 geo-distributed hardware security modules to open.

High Performance Engine: Engage proprietary order matching engine can process millions of orders with sub-millisecond latency. The whole system is designed to be fully distributed, highly-available

Features

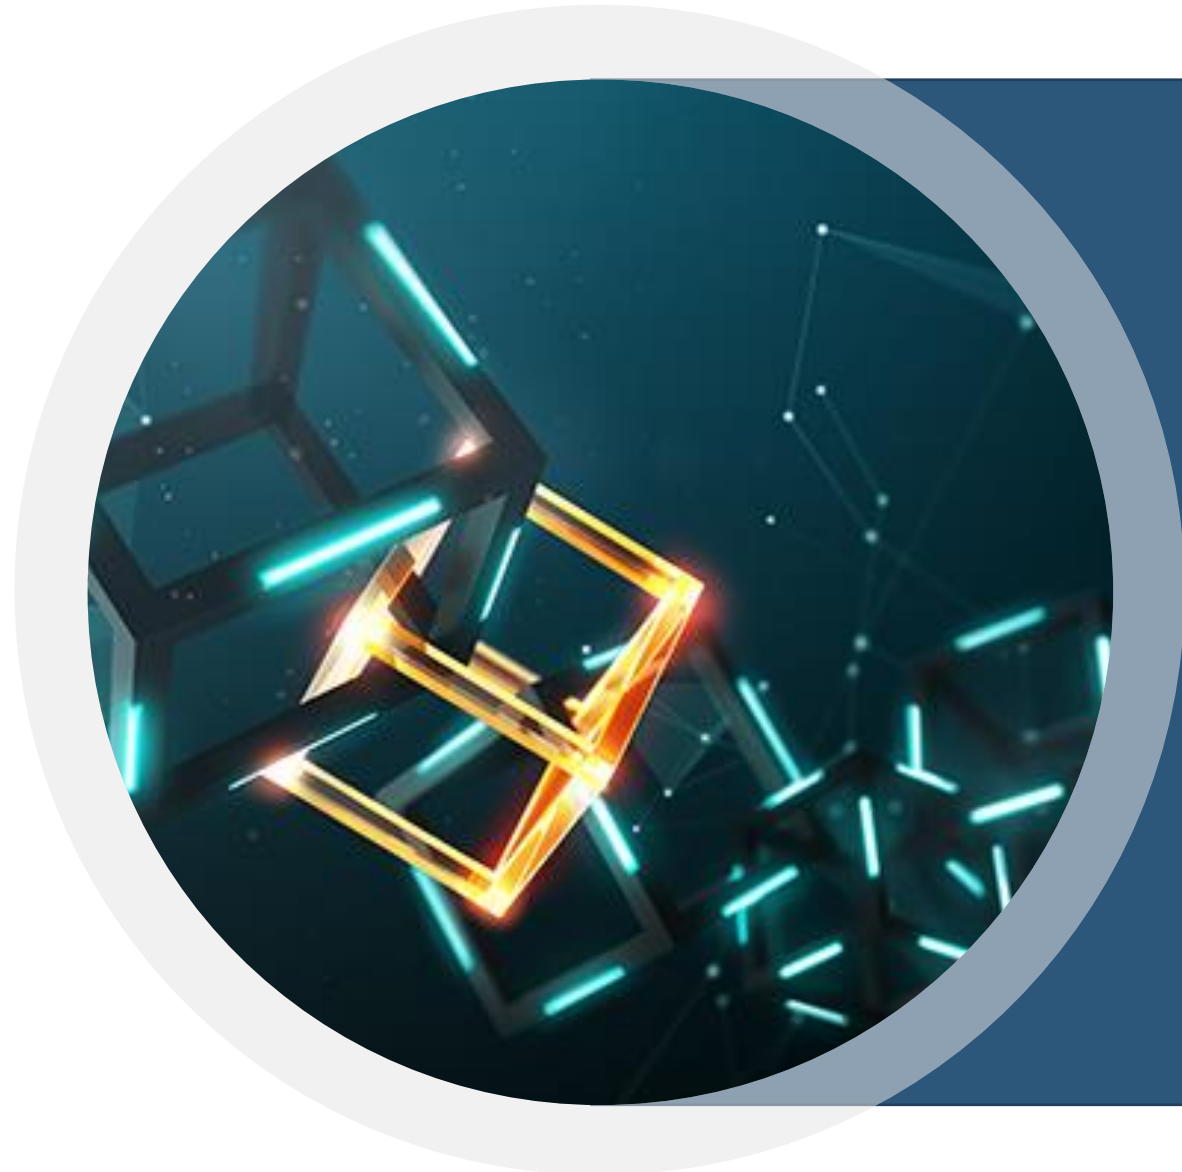

Fast: Engage Token is fast. Engage is an ERC20 token and runs off the Ethereum Blockchain. Ethereum blockchain transactions are known for their speed. Much quicker than bitcoin

High Level of Security: The Ethereum blockchain system allows you the ability to protect your account from all attacks. Your transaction cannot be interfered under any circumstances.

Simple: No matter whom you are, a professional gamer, an online e-commerce entrepreneur, an amateur gamer, or an individual gamer desiring to transfer your money to your acquaintance, Engage Token is, your best choice.

Privacy Guarantee: All of your private information, including money sender, money receiver, amount of money, etc... Have no chance of being leaked on the Ethereum blockchain technology security.

Efficient: The more Tokens we sell, the greater the value of each Token. As an investor, you will have the opportunity to have first-hand the first and only Token to ever hit the market that will target the entire gaming industry and E-commerce online shopping industry. We will achieve great things with you by our side

5. ABOUT ENGAGE TOKEN

Engage token is designed to be implemented in all major gaming organizations and E-commerce businesses to adapt the use of digital currency and remove the need for fiat currencies. By purchasing Engage Token, you will be able to use the Token to buy real time items and accessories on all the platforms we partner with.

With major partners such as EA, Valve, Wootware, Action gear, Gumtree, Blue hole productions and much more, we know we can bring you a major portfolio with Engage Token. By owning an Engage Token, you will be able to purchase any in game item you desire at the required cost per sale. EG. Engage Token value is \$5. You would like to purchase an item for \$15. It will cost you 3 Engage Tokens to purchase the item. *The above is just an example and should not be viewed as current price of the Token. The Same applies for any E-commerce site using our wallets as a payment gateway.*

Our Engage Token platform will bring you real players, real accounts and real items to purchase anytime and anywhere. With mass adoption of Engage Token, we could really see a digital Token taking on its full potential. Our cross platform website, will help find you the best prices on all platforms so you can make easy use of purchasing anything, anywhere at any time.

Engage Token will be paired with Ethereum and utilize its blockchain until we create our very own blockchain for the token. We want to utilize all our surrounding cryptocurrencies to maximize all digital assets involved in cryptocurrency. We are a community of designers and influencers aiming to assist the gaming and E-commerce industry and further adapt all cryptocurrency in our day to day lives.

6. Escrow

Escrow is a way to safe keep the funds where a third party guarantees the performance of obligations specified in the project's whitepaper and token sales and purchase agreement.

- 1. security** - To ensure the security of the collected funds they are kept in a multi-sig wallet, access to which has been restricted by the parties
- 2. Trust** - it increases trust between Engage and token holders by protecting backers and their funds and holding project founders to their obligations
- 3. Transparency** - It improves project transparency for buyers and guarantees the return of funds if the token sale is cancelled or terminated

7. E-COMMERCE ONLINE INDUSTRY

Right now as you are reading this, we are seeing an explosion of E-commerce websites being built and millions of people doing what they refer to as “drop shipping” to their customers all over the world. In 2016 E-commerce sites bought in just over \$394.9 Billion. That was the estimate for two years ago, said to quadruple that amount by 2020.

Engage Token will be getting in with these E-commerce sites and using our wallets to bridge the gap between paying with Fiat currencies and high fees to using our token with zero fees (*please see paragraph on Mission and Vision*).

WIX

weebly

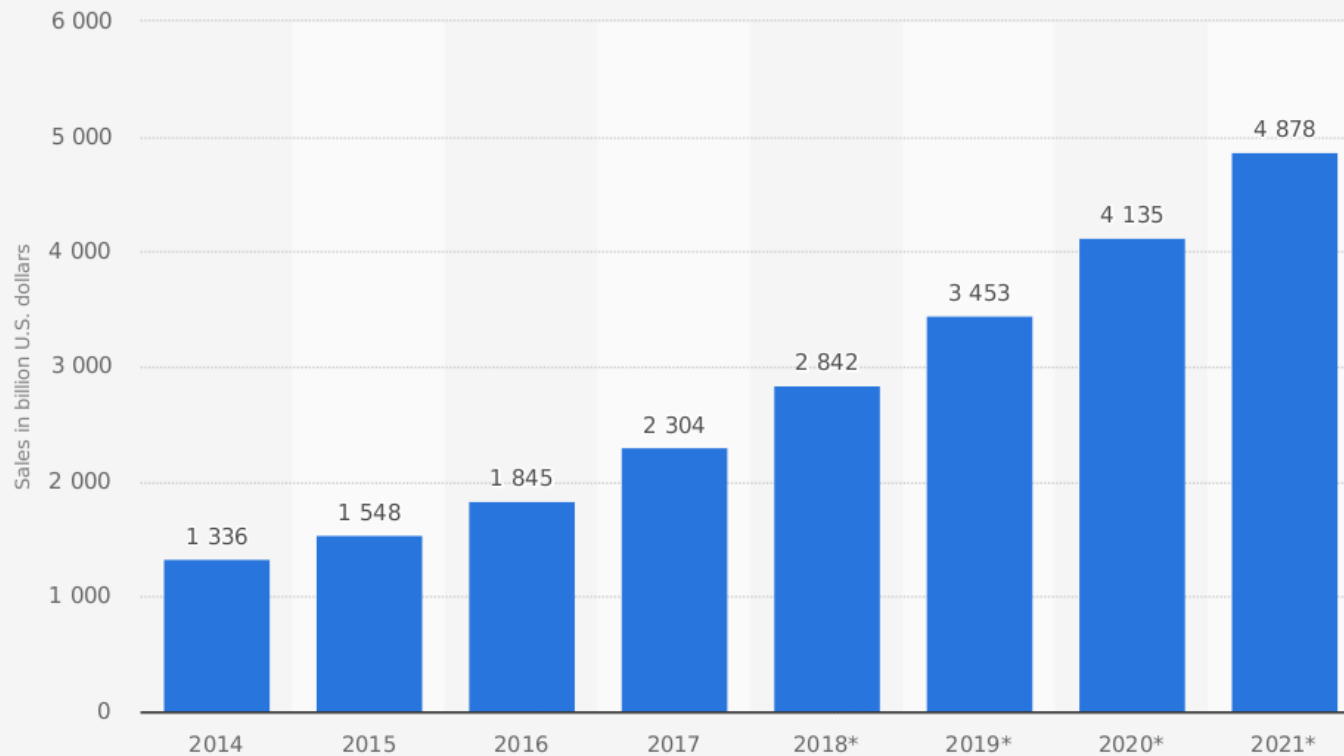

We have already lined up a few online retail stores that will be made available after ICO has completed for all our token holders to participate in. The more we can achieve user adaption and success of this token, the greater the value each Token will become

Shopify is one of the biggest E-commerce online website builders in the world, alongside the likes of Weebly, Wix and many more. We are aiming to achieve full integration with these online website platform providers after we successfully launch our ICO. Before we can be used on the above mentioned platforms, we need to first prove that our systems are valuable and meaningful within the industry. So we will implement our wallets in smaller platforms to get the project running. Don't be surprised if you start seeing Engage Token popping up in random stores all over the world.

7.1 E-COMMERCE REVENUE AND SALES

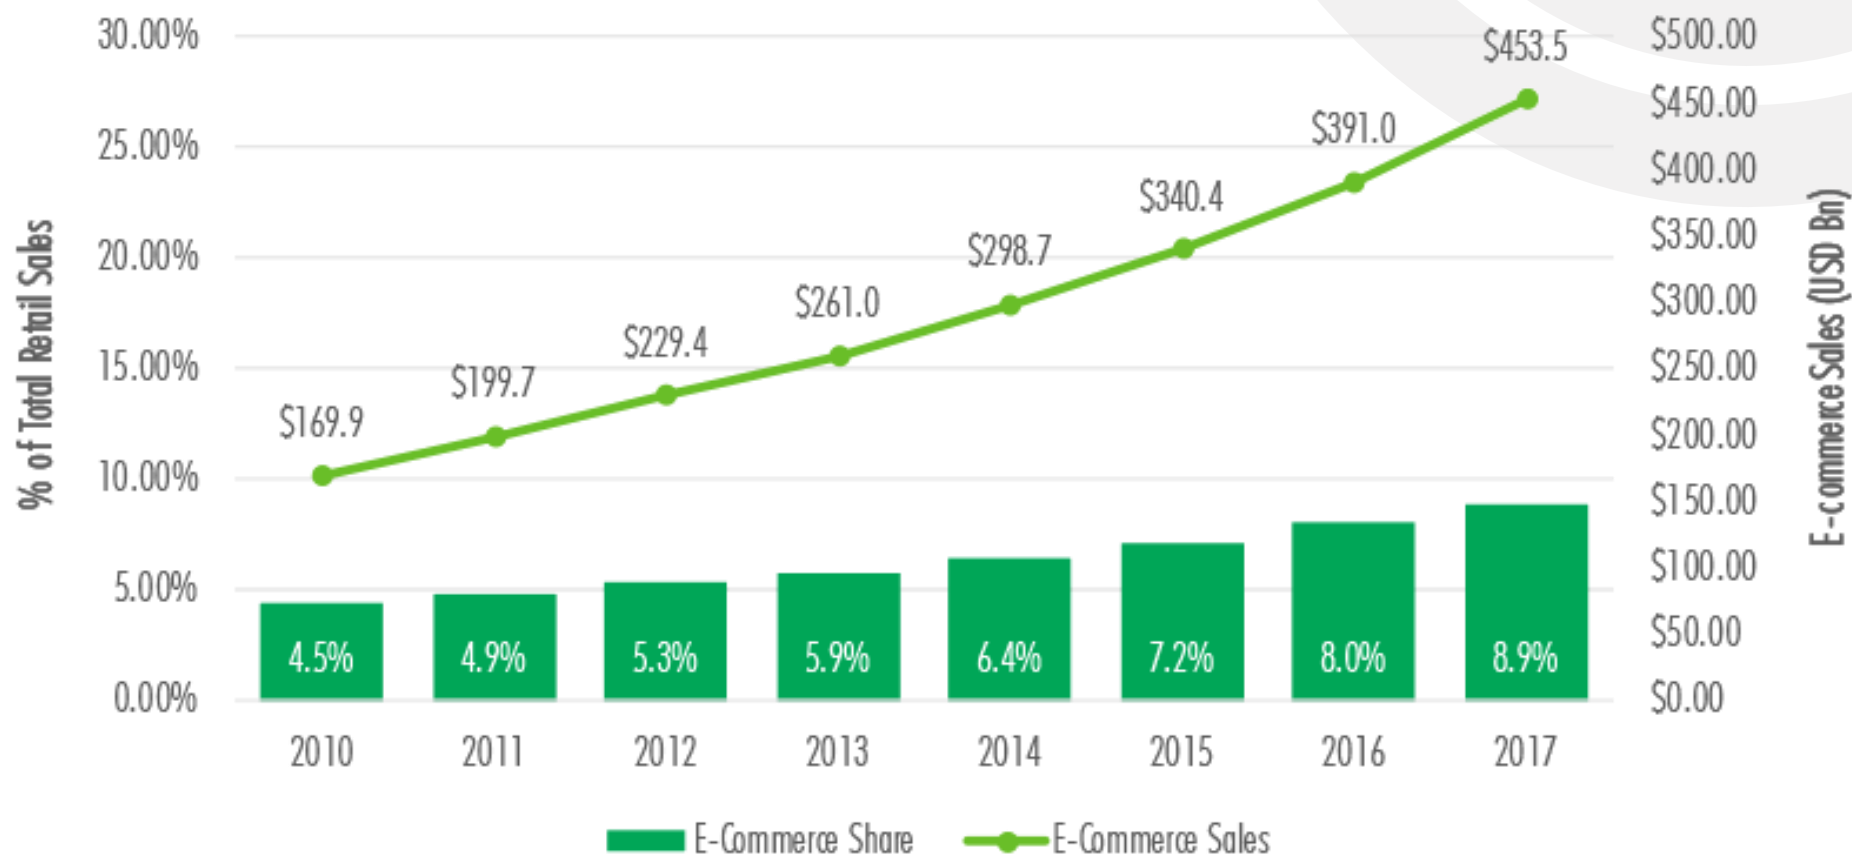

Retail e-commerce sales worldwide from 2014 to 2021 (in billion U.S. dollars)

The following depicts the E-commerce sales ranging from 2014-2021. An increasing growth can be seen from every year onwards

7.1 E-COMMERCE REVENUE AND SALES

Figure 1: E-Commerce Retail Share and Total Sales

7.1 E-COMMERCE REVENUE AND SALES

As we can clearly see from both graphs, E-commerce is a very fast paced growing industry. Each year depicted in the graphs has seen more growth and sales. This is an internet generation industry and we won't be seeing it disappearing anytime soon. Our aim at Engage is to achieve a payment integration structure that will allow our token to be used to purchase items and products on a global structure. Yes it may seem as very daunting task but it can be easily achieved with a lot of hard work and dedication.

Engage has the vision and the team to create a huge token value that will take over the way you purchase anything online.

8. GAMING INDUSTRY

We are currently living in an era where social media, technology, gaming and alike have taken over our day to day lives. We are seeing gamers especially in today's world making an absolute fortune, sitting on their butts and playing games. If we take the likes of Shroud who plays Player Unknown's Battle Grounds(PUBG) or even his friend DRdisrespect, who have over \$500k in sponsorships alone, we can then truly understand the vast amount of money flowing into the gaming industry. In 2017 the Video Gaming industry was said to have brought in a revenue of \$108billion, set to double that by 2020. We are hearing everyday of new and upcoming twitch streamers who are making thousands of dollars a day just by having viewers subscribe and donate to their channels while live viewing them play. Its an extraordinary amount of money in what may have been frowned upon 10 years ago.

There are even major championships and tournaments that feature exceptional players and teams from across the globe, competing against one another to see who is the best gamer in the world. The Dota 2 International 2018 saw a total of \$25,532,177 in its total prize pool. That is 1495,76% up from last year's total prize pool. We can see an absolute astonishing amount of money and time that goes into the gaming industry, an industry that will only get bigger and bigger over time.

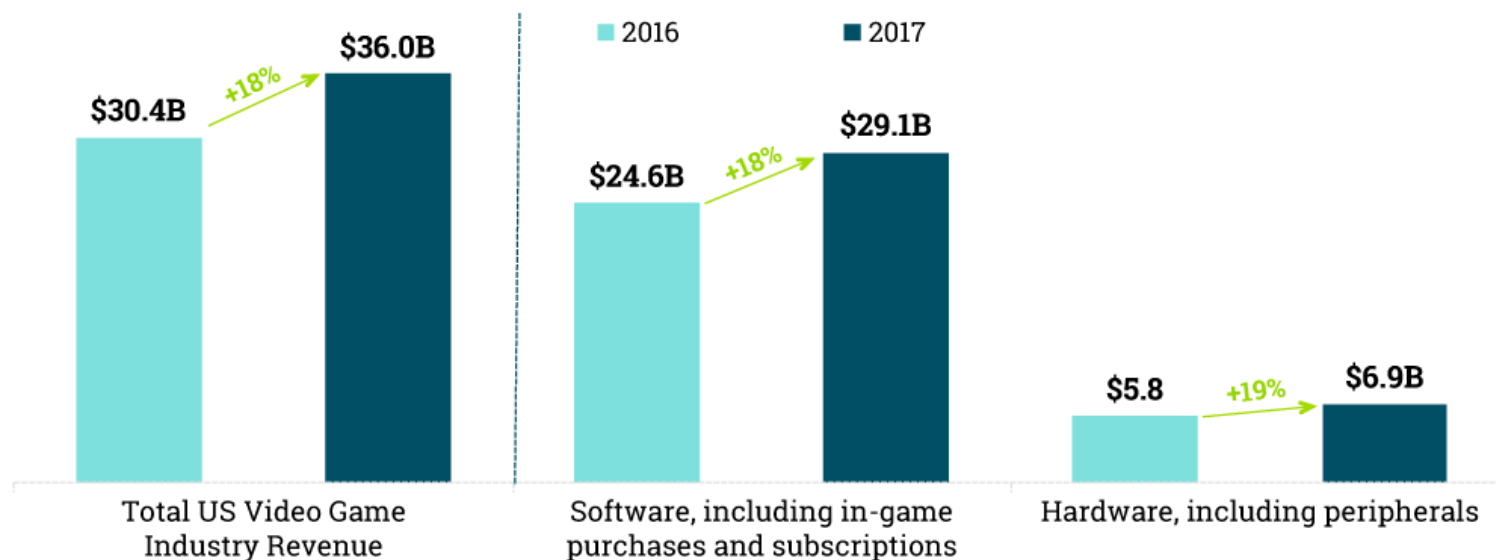

That's where we come in with Engage Token. Engage Token wants to adopt the gaming industry into using its Tokens for all purchases. Whether you are buying in game items, accessories, skins and games, Engage Token is aiming to be at the forefront of it all.

We are already in talks with Steam(Valve), Origin(EA), Bluehole Productions, Supercell and Blizzard to have Engage Token Fully functional within a few months after ICO completion. The only way we are going to be able to achieve this monumental achievement, is by having you as the token holders on board with us and believing in the vision we have long thought of!

8.1 ONLINE GAMING REVENUE AND SALES

US Video Game Industry Revenues

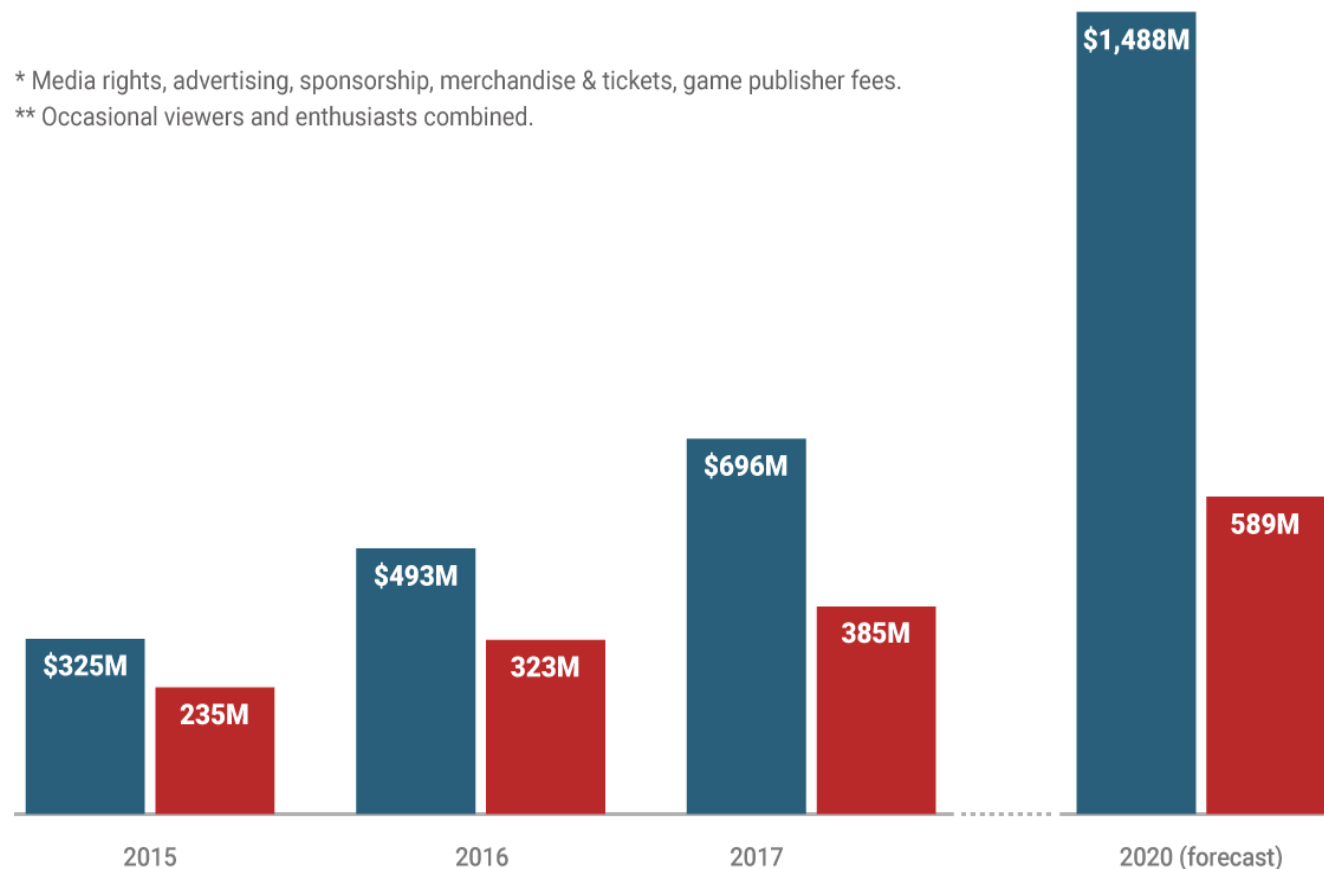

The following depicts the Online Gaming Industry in the US alone. Revenues ranging from 2016-2017. An increasing growth can be seen from every year onwards

8.1 ONLINE GAMING REVENUE AND SALES

ESPORTS REVENUES AND AUDIENCE GROWTH, 2015-2020

■ Total revenues* ■ Total audience**

The following depicts the Online Gaming Industry ranging from 2015-2020. This graph shows the revenue for Esports and Audiences. We can see an ever increasing revenue per year for Esports teams and associations.

8.1 ONLINE GAMING REVENUE AND SALES

With the two types of graphs above, we can clearly see and understand the power the Gaming Industry has over us today. There are teams and players who get more to play video games than professional football players get paid to play a real engaging sport. An industry that we will not see fade away anytime soon. The growing sensation of the entire gaming industry is quite overwhelming at times. We see Esporting events fetching 100,000 fans and audiences live at any given time to view their favourite players play a game before them, lets not forget the millions who watch them live at the same time.

At Engage, we aim to be apart of the industry by making our payment method easy to use and user-friendly. We want to bring the already awesome and reverting gaming experience a new outlook and easier to use system. Making us the most pleasant user experience possible.

9. HOW THE FEES WORK

What do we mean by ZERO fees?

Simply put, it just means from now on, if you use one of our software applications, you will no longer have to worry about the extra fees you are charged, whether that would be through fiat handling fees, conversion fees, TAX or VAT and so on.

Lets break it down further

Simon finds a product he really likes while surfing through his favourite stores online. He decides he wants to purchase the item. After filling in all his details and getting to the checkout cart, he notices that he only has \$5 in his bank account. The item he wants to purchase cost \$5. So Simon proceeds to checkout. At checkout, Simon notices the order book states his product for \$5 but also there's a service fee, VAT or Tax fee added on for an additional \$2. Now Simon is in quite a pickle as he only has \$5. So what must Simon do? Unfortunately there's nothing he can do unless he can add another \$2 to his account to cover this fee. Now Simon is unhappy and wishes there was an alternative...

Well there is!

Now imagine the joy on Simons face, when he checkouts of the store, and his bill is only \$5! Yes that's right, Simon is not charged any fees as Engage will cover the fees for Simon.

Question is, is that business logic for Engage?

By adopting this method, we know our token will be widely adopted. Who wouldn't want to purchase an item with zero added fees?

We have allocated 10.000.000 tokens during pre-sale that will offset the costs of fees. These allocated tokens will be used to pay your fees.

The only applications where the zero fees will be used is on our desktop, web and mobile apps.

Our website, desktop and mobile applications will be so easy to use that even your grandma will love it! All your checkout and delivery addresses will be saved and linked to each platform you use, your tokens will be in a very secure online vault that will be password and online key protected, your personal information will be protected from anyone being able to see it, you will even be able to customize your own profile to show others what you want them to see. We will have member to member transfers so you can share your tokens with friends, a gifting method to send your friends tokens or products you think they may like and so much more.

Our applications are going to bring an exciting and dynamic change to the way you purchase an item online from now on and forever.

10. HOW ENGAGE TOKEN WORKS

By purchasing Engage Tokens, you will be one of the early adapters into the gaming and E-commerce industry by utilizing digital cash to make all in game and out of game purchases as well as online store purchases at your favorite shops. The best part of it is that you don't even need to be a gamer or even understand the gaming market or e-commerce business side.

All Engage Tokens will be valued to its true value. Meaning: if the Token is worth \$5. 1 Engage Token will represent \$5. Be careful of websites and shops that represent the fiat currency of \$15 per item but are charging you 6 Engage Tokens. Our Token represents its true value of its current price. Don't fall victim to scams or malicious sites.

In order to make an in-game purchase, purchase of a game on one of the major platforms or an online purchase of some sort you will have a balance of Engage Tokens in your wallet on your profile. These Tokens can be purchased through our website or during the ICO pre-sale and crowd sale rounds.

Once you have a sufficient balance of Engage Tokens, you can then purchase the desired item of your choice. There are no credit/debit card fees, network fees, VAT or TAX fees when doing it this way.

The biggest problem we encountered over years was the fact once you sold an item on steam or alike, you are unable to get your funds back into your own bank account. You were pretty much forced to having to buy something again on steam or whatever platform you are using. With Engage Token, you can freely send and receive your Tokens anytime and anywhere. This is one of the MAJOR breakthroughs we have managed to overcome!

Why not just use another cryptocurrency and payment gateway? why must we use Engage?

It all comes down to a few simples reasons.

- Zero fees
- Easy to use software applications for mobile, web and desktop – Our design is so simple to use and will be full of fun activities and exciting competitions to incentivize all our token holders
- Ground breaking – with the amount of time, thought and effort that has already gone into this project, we are going to bring ground breaking solutions to all e-commerce and gaming platforms purchases. Solutions such as money back guarantees and the ability to relieve any funds on gaming platforms back into our client's personal wallet's
- Amazing sponsorships and partners – We have worked hard for the past year to bring some awesome sponsorship deals and partners in on the gateways and platforms. Big gaming Organizations such as Inexorable Gaming and Numinous Gaming are current sponsorship clients. We are in talks with Mettlestate (A South African Gaming organization) to sponsorship their tournaments for upcoming events and so much more.

- Rewards and association – We will award our customers with special prizes when they use our gateways as payment systems. Can be anything from cash back prizes to giveaways and even more NGA tokens. Association – Being associated with our Token will open more opportunities for our clients. By using our token as a payment gateway we will incentivize our clients with cool events and rewards. Win trips to major sporting tournaments, meet their favorite online player, create their very own powerful e-commerce store, attend world renown shows and events to help our client's grow their store and much more.
- Instant Redemption – the moment a purchase is made; our clients can immediately redeem the item. Whether it's a new video game or an item through our verified product list, it will be theirs to own. For video games, our client's will receive their redeemable key to install their new game on their preferred gaming platform.
- Member 2 member transfers – Our clients can add a friend on any of our software applications and send tokens to and from their friend list. All of this is highly secured and safe.

11. HOW THE PAYMENT GATEWAY WORKS

In order to use Engage payment gateway, you will need to own Engage tokens. This can be purchased via our pre-sale or ICO rounds.

With the aid of the ICO, we will create state of the art desktop, iOS and Android wallet apps to hold and store your tokens safely and being able to use these apps as your very own payment gateways with our partnered stores and platforms.

So how does the payment gateway work?

iOS/android version: By having the android or iOS version on your smart phone, you will be able to make purchases with your Engage token on any affiliated store world wide.

Step 1 - Select the item or accessories you like through our wide catalogue of shops and suppliers on our mobile app.

Step 2 - Enter your delivery options and/or shipping details

Step 3 – Click “Purchase with Engage”

Step 4 – Voila. All done. Your item(s) is on its way and out for delivery

Its as easy and simple as that! Your tokens will be automatically subtracted from your Engage Wallet and paid to the supplier/vendor for your purchase – any and all fees per transaction, we will cover for you!

Desktop/Mac Version: After ICO rounds have been completed, we will launch a new Engage website where all your purchasing and tokens will be available to use. During ICO, when you purchase your coins and receive them to store safely in a compatible ERC20 wallet you will be given the option to have your tokens kept of our ICO website for your safe keeping. Once the new site is launched, we will transfer all your coins on the ICO website over to the new website where you will create a profile and have your tokens kept. Once you tokens or part of your tokens are within the new website, you may start purchasing new items with any of our affiliate stores.

Step 1 – Create your new profile. Send/receive your tokens onto the new website

Step 2 – Browse through our affiliated stores and suppliers for new and used products worldwide

Step 3 – purchase any item you desire directly by clicking “use tokens”. The website will automatically deduct your tokens from your website wallet for each purchase(s)

Step 4 – Enter your shipping details

Step 5 – Voila. You are all set. Your purchase is now on its way

Online Payment Gateway: In the likelihood that you choose not to use our website or apps for your direct purchases and find yourself on a affiliated store or gaming platform with our tokens as a payment gateway, you may select our payment method as an option to purchase an item or product.

How does this work?

Very easy and simple to use. When checking out of a store, select Engage tokens as a payment method. You will be provided with a QR code or a longer Alphanumeric code.

In your **mobile wallet** app, use the QR code to scan your wallet and make the purchase.

In your **desktop wallet** version, use the alphanumeric code to make a purchase.

In the event you do not have access to your web or mobile app wallet, you will be given a very secretive code when you sign up on either web or mobile. This code will be for your eyes only and can be used to make purchases anywhere and anytime. If you lose this code or someone steals it, they can access your wallet and use your tokens for online purchase. This can be further protected with different passwords and digital codes.

**** A video presentation will be released on the different applications for each described above with the new website details

Technological Advances Within Payment Gateway:

The Engage mobile store will use a customized and proprietary centralized payment gateway solution built by our developers. This payment gateway is going to be beta tested in Datcroft Ltd. games.

This gateway will offer Engage Tokens as a featured payment option for purchasing in-game content. Gamers will be able to acquire Engage Tokens directly within the payment gateway with Bitcoin, credit cards, and other local payment methods without ever having to leave the mobile app.

Gamers will get more for their money using our mobile store. Game developers will incentivize gamers to use Engage Tokens through in-game coupons and rewards. Engage token holders will be able to earn additional discounts when using Engage Tokens to purchase in-game content.

Our platform payment gateway allows gamers many more options for payment. Google and Apple only allow deposits from credits cards. The Engage Tokens Mobile Game app will allow the use of credit cards, Engage Tokens, and local payment methods. Unlike Google and Apple that have strict deposit limit amounts, our platform will allow for unlimited deposits.

12. FACTORS TO CONSIDER

1. Payment Methods

Choosing the correct payment method to save the client money from fees, over charging or any purchases online is our number one objective. With Engage token, you are assured that all purchases are validated and cost effective

2. Cost of Transacting

High fees and being over charged is a thing of the past. With a zero fee payment structure, you gain on purchase you make

3. Supported by e-commerce platform

With partners already made with many e-commerce stores, our payment gateway will bring you the best service and product delivery to your door step

4. Security

With high end security we can guarantee all your purchases are safe.

5. Purchasing Experience

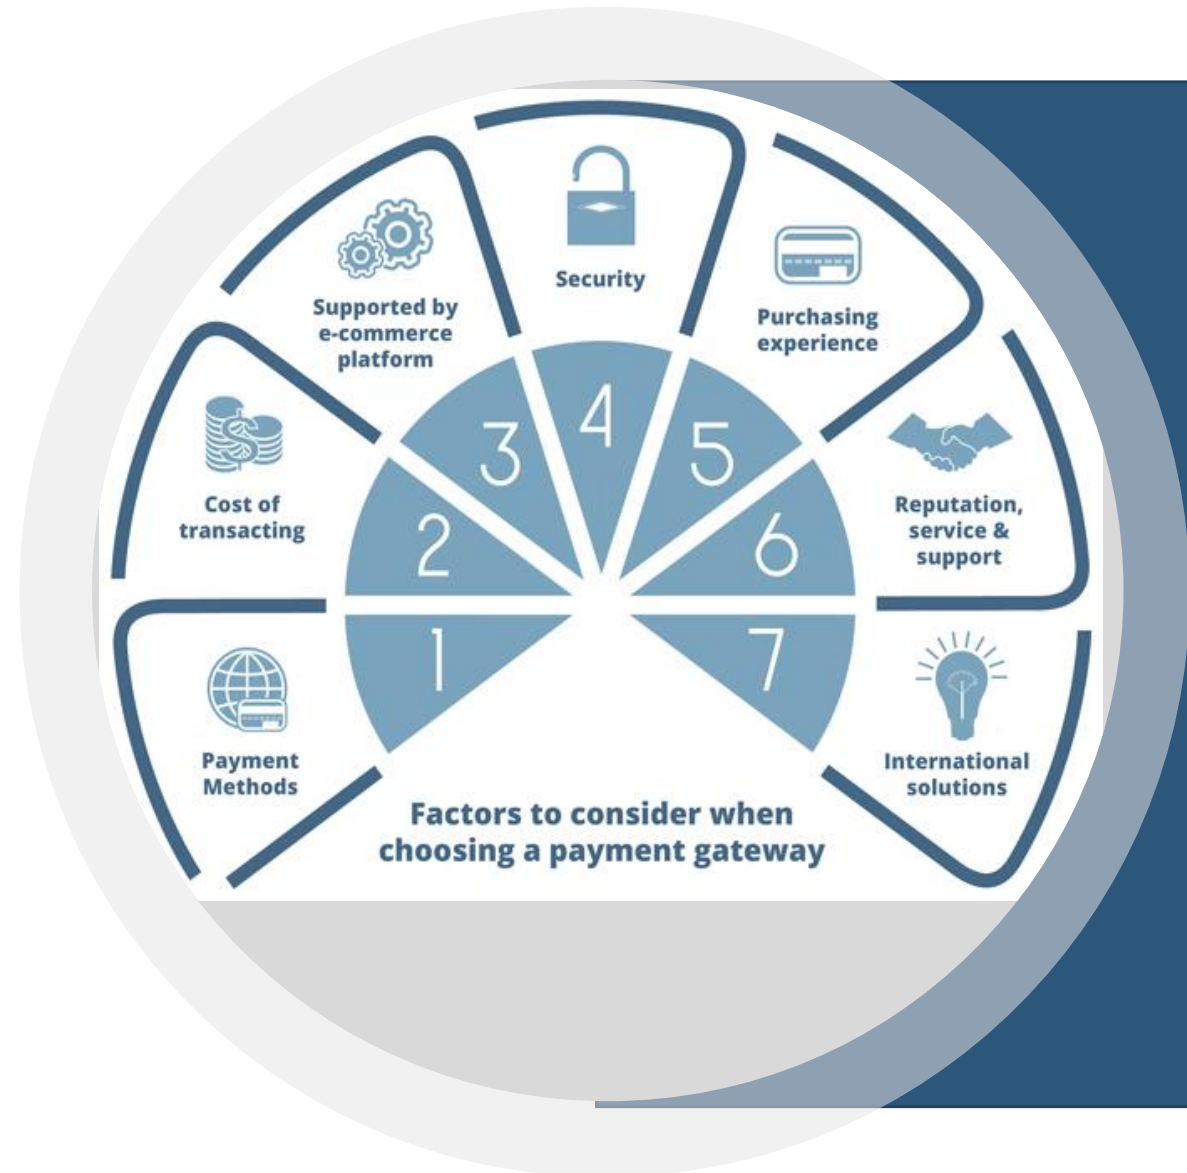

Our user-interface is easy to use and will make lengthy checkouts a thing of the past. Save your details for easy checkout process

6. Reputation, service and Support

Our reputation and service will guarantee you a safe and secure environment. With 24/7 support, you will always be able to make a purchase or enquiry

7. International Solutions

We aim to be part of all local and international online businesses and making it as easy as possible for you to purchase anywhere and anytime

13. OUR GIVEBACK PROGRAM

Part of Engage's core structure is giving back to the community and making things easier for our community. We have carefully designed and structured our Giveback Program to assist young and old, inspiring and enthusiastic online entrepreneurs to have a chance in trying something new. The aim of this program is to provide an opportunity for any token holder or token holder nominee the chance of creating he's/her very own E-commerce website. Engage will choose between 50-100 applicants per year and personally help them gain vast knowledge and skills to launch their very own online store. Engage will provide this program absolutely free from the start to allow each applicant the opportunity to make the online store work. This package will include the following and not limited to:

- A state of the art E-commerce online store with current trending products. Between 100-200 products
- A website assistant to teach you how to run your own site and provide you with training and skills to develop yourself in the industry
- \$5000 google AdWords campaign and social media advertising.
- Full training from a verified expert coach on how to open an online business and be successful in doing it
- Full business package for your website, hosting and domain.
- Full training on any and all E-commerce tips and tricks.
- Live support at your fingertips.

How do I qualify for this Program?

The aim of this program is to target individuals less fortunate than others. Individuals who don't have access to funds to even start their own E-commerce business. Even though our main goal is to help and aid the less fortunate, all token holders and nominees will be given their fair chance in this program. All you have to do is show a keen interest and be motivated to work hard while we help you build an online store.

The program will be made available to our loyal token holders and/or their nominees. Engage will select a few participants off social media and other platforms even if they are not holders of the token. These individuals will solely represent the less fortunate.

For all token holders. Do you have a family member; friend or work colleague you know is struggling to make ends meet? They are unable to pay off their monthly debt due to over piled bills and outstanding balances? Can't help feed the family? – Then nominate them, they do not need to be token holders if the nomination for a participant comes from you as the Token holder. At Engage we care about the community and we want to help you!

****All E-commerce sites, will have Engage Token as one of their payment gateways.**

This Giveback Program will begin immediately after ICO ends and the first online store payment gateway has been built.

14. TOKEN SPECIFICATIONS

Token type:	ERC20
Consensus Algorithm:	Proof of Stake (POS)
Mineable token:	Yes
Smart Contract:	Smart contract address will be accessible on company website during token sale.
Etherscan validation:	Yes. Will be made available during token sale

15. TOTAL TOKEN SUPPLY

Token Name: Engage Token

Token Symbol: NGA

Total Supply: 750,000,000

ICO Supply: 500,000,000

ICO Bonus: 150,000,000

Pre-sale Supply: 30,000,000

Number of Decimals: 18

Bounty Program and Airdrops: 5,000,000

Team Consultants and Partnerships: 52,500,000

Sponsorship programs: 2,500,000

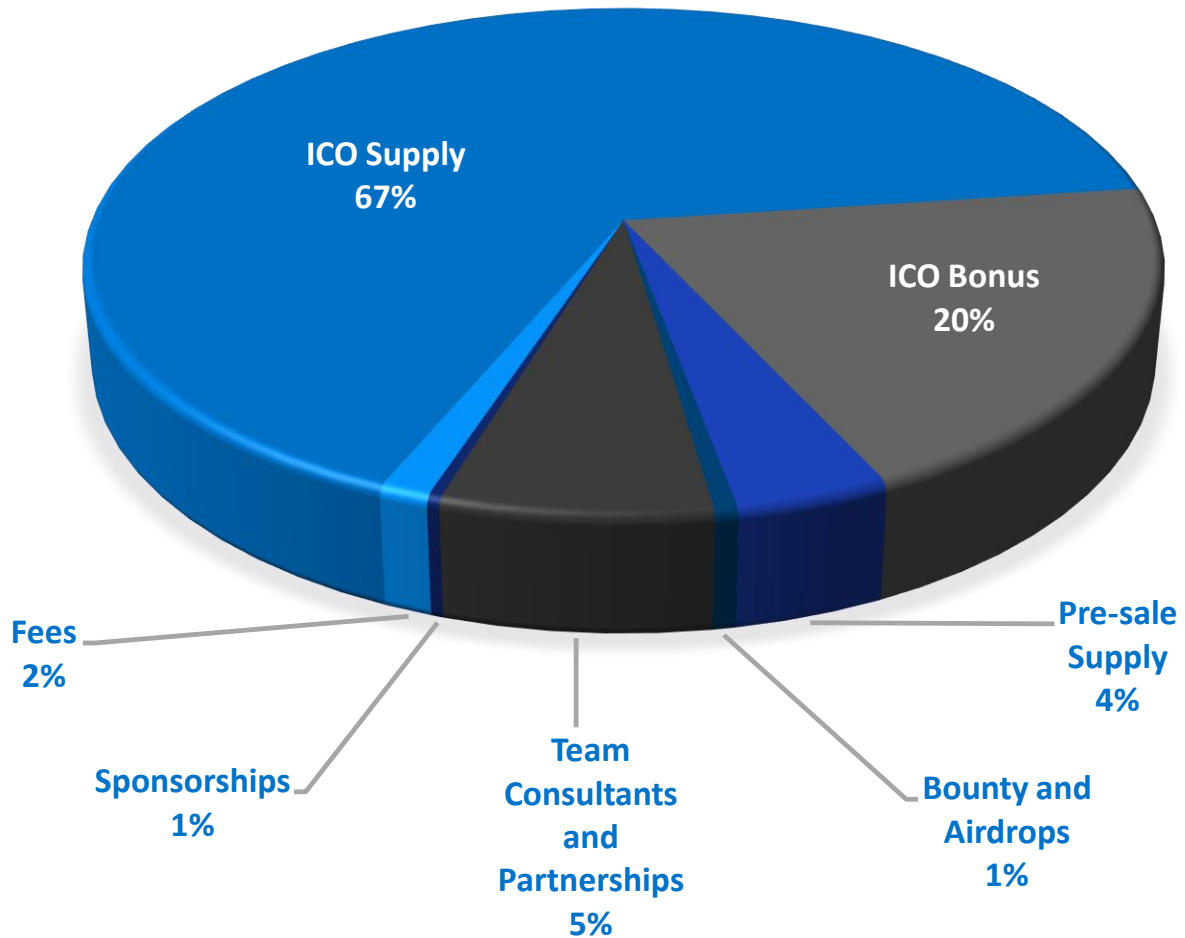

**Fees for payment gateways and wallets:
10,000,000**

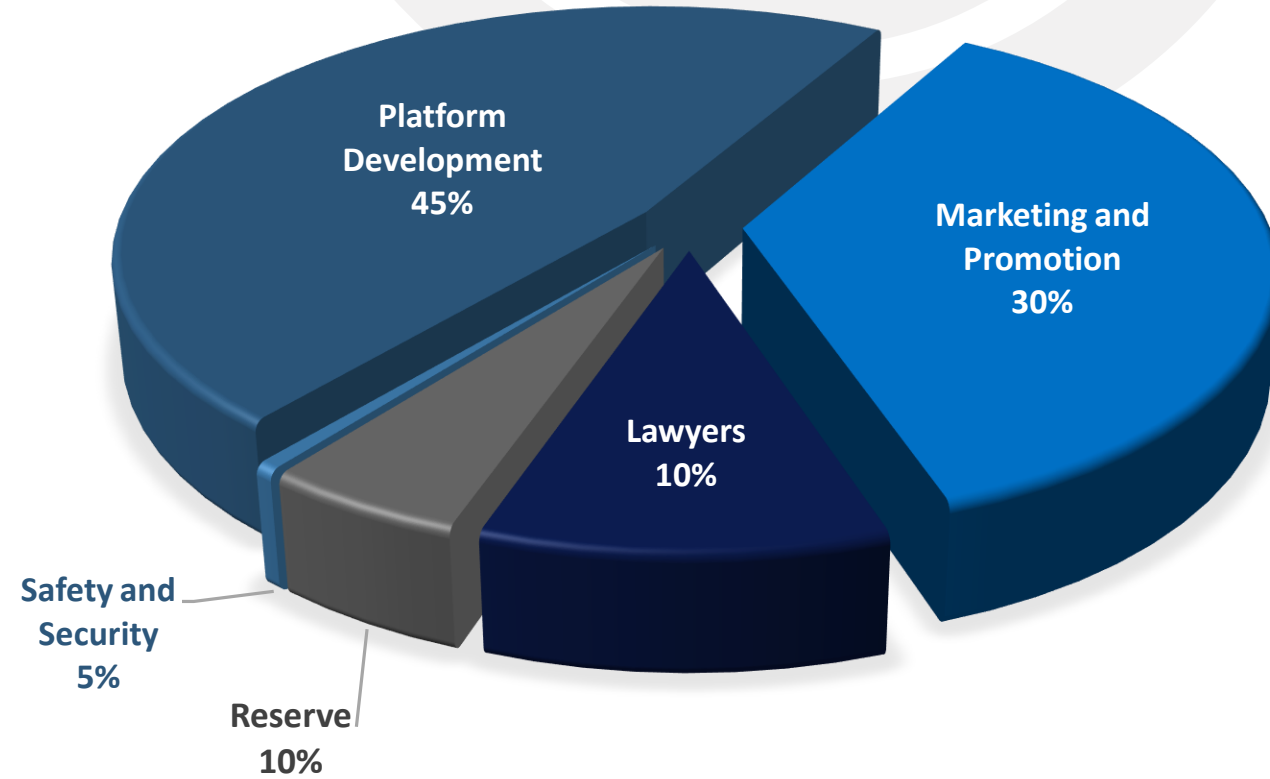

ICO will be restricted from U.S persons and token issuer entity will be incorporated outside the U.S

15.1 TOKENOMICS

Token Distribution

Token Funding Usage

ROADMAP

Q3-Q4 2017

Created the idea of Engage Token and the concept it would bring to the gaming and E-commerce industry

Q3 - 2018

Designed and built the Engage Website for the ICO. Team working on costumed design of the Payment Gateway

Q1 - Q2 2019

Final ICO rounds begin.
Development of Engage Platform begins.

Q3 - Q4 2019

Release of payment gateway for desktop and smartphone. Fully functional payment gateway for gaming platforms.

Q1-Q2 2018

Contacted a few gaming organizations and E-commerce platforms suppliers to understand the need and desire for such a digital currency. Received feedback from several organizations to implement an ICO funding structure to fund the project and get our payment gateway involved within platforms.

Q4 - 2018

Pre-sale Launch of Engage Token at \$0.05c

Q2-Q3 2019

Further development and testing of Engage Payment gateways.

OUR SPONSORSHIPS AND PARTNERS

INEXORABLE GAMING MGO

Inexorable Gaming MGO has agreed to allow us to sponsor all their teams within the MGO
