VIP Shiba

In it's history Shiba has never had VIP members. Why Not? The Binance Smart chain is becoming a very difficult place to navigate, and as soon as you hear about a project it's already spiked and poof there goes your chance.

Whoops!!! Somebody grabbed that 6 figure cat NFT 10 minutes after you saw it and was trying to move your crypto over sheesh I'm sorry about that.

What if you had exclusive access too the hottest projects, games and NFTs. A Community that REALLY GIVES BACK BECAUSE ITS ACTUALLY RAN BY THE F#-&\$7G COMMUNITY (They know who we are talking about)

Welcome to VIP Shiba!

To truly live the VIP Lifestyle you must hold at 500 Billion VIP Shiba to get exclusive access to all our newly launched projects, NFTs, game betas, and TBA "VIP Shiba World" the first ever Shiba Metaverse!

This project just looks like another run of the mill meme coin project. We advise if you get in to hold your positions because every project we release afterwards will be courtesy of VIP Shiba. That's how you will know our stamp.

Our decision maker and head dev is 100% doxxed and available though multiple channels. We are also challenging Devs, graphic designers, Influencers etc to join us in building a true VIP brand the Shiba culture deserves!

How it started vs How it's going

VIP Shiba Lifestyle is going to be the ultimate lifestyle to live in the cryptospace

Welcome to the VIP life. A hyper deflationary token that works for you. Our vision is simple make legit projects with transparency and change lives. Your investment will always be valuable because of your exclusive access!

What about you? The guy or gal that doesn't have 500 Billion for a crypto credit check We got your back! We are going to be launching VIP Shiba Passes that will give you exclusive rights to a project and can also be sold as NFTs. Love Music?? We do too. Look out for the VIP Shiba Soundtrack which will also serve as a NFT collectable!

Tokenomics

Circulating Supply- Less than 500 T

Max Supply- 1000 T

6% \$VIPSH Rewards on every Transaction (Buy/Sell) Note: Rewards are paid out depending on Volume pace. Contract will do this automatically!

6%
Buy Back for Stability

3%
Marketing Wallet
for Roadmap

Verified Contract

Liquidity
Locked- 3 years

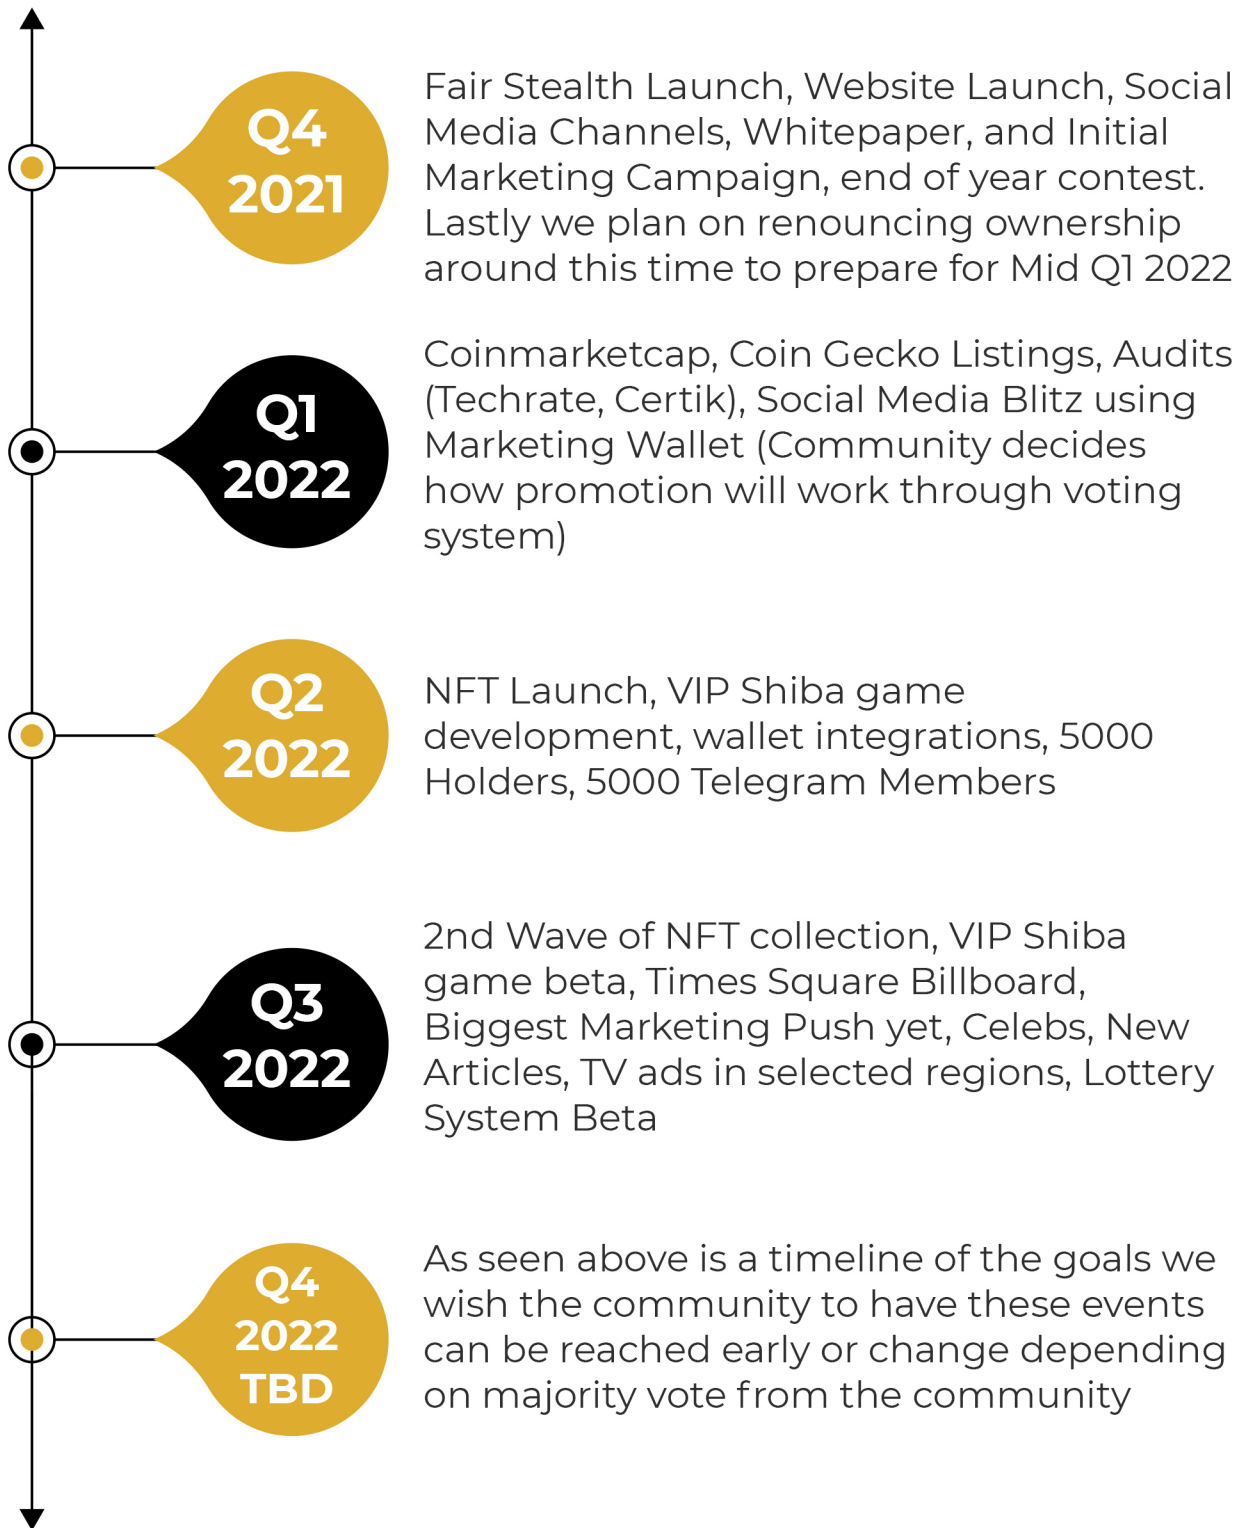

100%
Community Based

As seen above the tokenomics of the contract:
0x83e852a03C9dE1D7902110A4DF77Fe14125344D9

Our Road Map

Here are some the projects associated with VIP Shiba

Meta Cyber Floki will be the first of many projects that will use VIP Shiba as a utility token for it's main features.

The First project courtesy of VIP Shiba is a Cyberpunk NFT builder that also distributes 10% rewards to holders. Introducing Meta Cyber Floki (\$MCF) \$MCF will be used to mint the NFTs but to create the NFTs you must own \$VIPSH our master currency for all of our projects. More Details coming soon.

Gangster Elon in the cut is a scary site!

Coming Soon you better beware!!! Gangster Elon says he's done playing games!!! "If you can't play the game get out of the space" he says. 15% doge rewards to all holders!! 5% Marketing Wallet because Elon is gangster and knows how to market! 21 Million Supply because "G.E" wants you to party instead of work!!! Utility to be revealed soon and we'll also plan to donate to to homeless because the streets is where our heart is at!

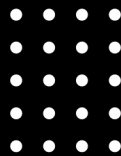

Win Big with Lottery Finance. Here's why!

Here at VIP Shiba we had an initial idea. Create a community based lottery system that keeps giving back to it's holders big and small!!! Welcome to lottery Finance where we reward you through holding and participating in our social media channels! We have secret wallets holding our LOTTFI token and every air drop earned will also get a bonus of \$VIPSH our master currency for all of our projects!!

Shiba VIP has it's own Bitcoin, and it has more utility than Bitcoin!

I'm gonna let you in on a little secret if you made it this far. When we talk cleaning the bsc we mean it in so many ways! We honor Bitcoin as the first ever cryptocurrency by creating our own for VIP Shiba, however that's not it! We will create a VIP Shiba version of all stable coins in an attempt to improve on the original idea. Cryptocurrency is based on solving problems, so what better way to approach this than improving on the tokenomics of the coins we create for our ecosystem? Coins like Ethereum, Solana, YFI Finance, Dogecoin and more will be improved only with our VIP Shiba community in mind. Welcome to our first iteration of it's kind!

THANK YOU
