A woman with short blonde hair, wearing a dark blue uniform, is shown in profile from the chest up. She is holding a yellow cordless power tool, likely a torque wrench, and is working on the engine of a car. The background is a blurred industrial setting, possibly a car dealership or repair shop. The overall lighting is bright and professional.

ergonomics...

USING POWER SCREWDRIVERS? IT'S TIME TO SET YOURSELF FREE!

For a truly uplifting experience, try our brushless BCP - BCV range of battery clutch tools. The BCP and BCV represent freedom – true freedom – from cables or hoses! They are also fast, powerful and offer superior ergonomics. BCP - BCV tools mean higher productivity for quality critical assembly operations in all types of industry.

power...

BATTERY

Li-Ion batteries 18 V and 36 V

- 2.1 Ah – flat pack for low weight
- 4.2 Ah – big pack for maximum working time
- 2.1 Ah – for 36 V models

Li-Ion charger 18 V and 36 V

LED's indicating battery status with low battery warning.

All your BCP and BCV batteries connect to the same charger. All regions available.

Optimize your costs with 1 charger only!

A TRUE FRIEND IN DIFFICULT PLACES

With BCP and BCV tools there are no cables or hoses, and the battery pack can be mounted on the tool in two directions for optimum accessibility.

Multicharger (Fits all Atlas Copco batteries)

Work for twice as long with the big pack battery.

Low weight with flat pack battery.

Optimum accessibility with variable battery position.

freedom...

LIGHT UP YOUR WORKDAY!

Two powerful lights on the front of the tool illuminate the workpiece for maximum efficiency. It will make your job much easier.

BCP BCV BATTERY CLUTCH TOOLS

- **LED's:** For clear operator feedback.
- **Ergonomic trigger:** Designed to give a soft, smooth feel.
- **Buzzer:** For audio feedback.
- **LED front lights:** Powerful illumination of the work area.
- **Shut-off clutch:** Adjustable torque setting with $\pm 10\%$ accuracy.
- **Dual battery position:** For the highest level of operator comfort.
- **Ergonomic handle:** Grip design gives excellent balance.

OPTIMAL SPEED FOR YOUR ASSEMBLY

The tools are programmable to offer variable speeds. The chosen speed is set by attaching a speed setting unit (SSU) to the tool. Once the speed is set, you simply remove the SSU and use it in another BCV or BCP.

FEEDBACK TO THE OPERATOR

The tool shuts off automatically at the preset torque. If the tightening is OK, the LED on the upper part of the tool shows a green light that is visible from a wide angle. If the tightening result is not OK, a red light will alert you. The LED also tells you the status of the battery and gives a low battery warning. A buzzer can be activated to make the feedback even more clear. These features verify your tightening results and give you peace of mind.

Speed setting unit

Direct feedback with big LED.

freedom...

YOUR IDEAL WORKING PARTNER

The brushless BCP - BCV tools are perfect for low-torque, non-critical joints in a broad range of applications. Final assembly of cars, offroad vehicles, buses, trucks, aircraft, motorcycles, engines, and white goods are just some examples of applications which can benefit from the performance and accessibility provided by the ergonomic BCP - BCV tools.
